

in the nest at present.

I received a letter from Tom the day before yesterday. He still expects to come out as soon as I can get him a place. If we do not get canned our selves I do not think that that will be very long. Rose Crete is at the Hopkin's Hospital. She has had the appendicitis but Tom said she was beginning to pull through. If we only had the over system A.P.P. that the man in the "Sun" you sent me proposed you might come out & pay me a visit. We are having fine spring weather.

Things are pretty quiet as I have not any new news so good by I be very love to Alice

Sincerely
Darius
