Dear Arthur -

Well we still seem to be hung on a center. Today we have not even made a bluff at working & I am very glad of it. Because it is hot as cotton. The water is just running off of me in streams & drops down on every thing.

We have finished all the work in reach & are waiting orders. Some thing seems to have hung fire some where.

The chief amusement at present is snake hunting. You know they are just coming out & the rock bluffs along the river are lousy with them.
