My own darling Alice,  
You will see by my letter head that I am once more on the War path - and I am thankful to say feeling much better - I have the Nelson, Gelatine, Lozenges - and they have given me great relief - I really think they will cure my cough entirely - I want to get back to New York if possible by tomorrow night - as I am anxious to hear from you - I hope every thing is moving along smoothly - I told Jane to see Mr Garland and see what about the trees - I hope old Chance has mowed the blades - for your comfort - I only wished it had been so I could have remained during January - for I really think it would have done us

both good - and this beautiful weather I could have had all the rails mowed if I could have devoted myself to them a few weeks - I feel greatly relieved now that you have the farm in hand - for Harry is large enough to attend to all the thrashing which will be a load off you - he is surely a fine boy. I pray he may continue, if so you will have a great comfort for your diligent work in training him.

Love to the dear children -

Write me when you can -

Your son Loving -

Harry -
