

soldier has all this time been a sufferer with rheumatism as before mentioned.

Now claimant is not disposed to lay down on his wife, and relatives for a support.

My husband got him a job soon after discharge but he was not physically able to do the work & had to quit. Don't remember that soldier had a cough when he first came to live with me; but he did some time after that, and has <sup>had</sup> it at times since that.

I have assisted his wife, and through her him, many times since he came home from the army. Did this because soldier was not able to work and earn a support for himself, and wife. Soldier married my husband's sister. I am not interested pecuniarily in this claim for pension.
