By the communications that purport
to my having England with some of the Ministers it
appears to be their wish that the Southern Indians
should be supported in the War now between them
of the United States, in consequence I have supplied
them with 2000 Stand of Arms, Ammunition &c and
I am now going to send a detachment of Marines with
a further supply of Arms by the Artists they stand need
in need of. What they appear most particularly
to want of what I have some at my disposal is Bayonet
fixtures, short-barreled Pistols &c of good
quality &c &c of the same kind to be sent
