

Lewis, and am of opinion with you, that  
a furnace in a launch, or rather in one  
of the fastest light barges, bought of the City of  
Balt. will answer better than any other  
mode. I wish Sir to have a <sup>couple</sup> couple

of light travelling gun carriages, to <sup>mount</sup> mount  
guns on in case of necessity. The <sup>size</sup> size for  
long twelves will answer.

I am respectfully yours  
Obr Lovd

Forlnat Barney
