

and twenty, to one hundred and fifty tons more may
be furnished this yard. The sizes most convenient
according to my experience are those of 24 inches long
6 by 6 inches square - 24 inches long 5 by 5 square, and
18 inches long 5 by 4 inches square - The first weighs
about 216 lbs each - The 2^d - 150 lbs each - and the 3^d about
90 lbs each - And I beg leave to advise that a moiety
of the quantity ordered, may be of the largest size
two thirds of the other moiety to be of the second size
and the residue, or one sixth of the whole, to be of 3^d size.
Each piece should have a hole about one inch in diam
pass transversely through each end, as described below.

I have the honor to be
very respectfully

Sir Your Obedt

Wm. F. Smith
