yours or any other precise period be in all cases actually taken evangeline office by mir own unaided exertions we can only in the up in getting through this course - the student being allevered. I ned - she must in the one energelise herself . that is who must to take sank every six minths according to his progress. cover many thus occur in which a student many complete his unse in there and others in five years. I have said that this course usualle be insisted upon, in the Some time since before. This cause was resolved upon by. The deed littege. I to studentrit can mit be dispensed with. Mer the Bill will be with me as a private student and of sume of the have it at my often to pursue the course signiffy or not. But I would must earnestly all the attention of the Board to this subject and unge when the important of thoroughly educating their charge if politile. ought not always to be defendant. when America for humberly of medical Science. it is our eluty men to send them the mener a seion of knowledge and just as much our duty to send them genuine stock - I know not what he bills talents may, he . It we all com see that if a son of effice . with a pure suintific medical education were to are raise the standard of medicine. at, henring or tanker even in one life times we might have that. two. kninkelye had taken sest where suferitition has for eyes held undis futed trong - There is another light and a for

being premised upon entrance. He do net insist that four imputants one I mean its bearing upon religion. He can never find the men. And if we study only slightly the character of heather man we see at once that they consider every one who pepeter. more knowledge than themselves tes as a mobile of course able to control and conquer dinere. In sense their sessening and we see at once that whenever a medical unisted when it with my private students. yet found myself man throng limited a heather community he of all others confelled in some instances to depart from it. With University is more easily take able to lay held of their minds and lead Them where he will - bower sout as you are I presume with hufuin any affairs I much not occupy time to show here quest an aux. diay medecine has been and one will be in carrying committee to the heart of the heather of the power and beneather of the seligion of the Bleful Jems. Bright we not then to take time efficient measures to establish a Saharl of medecine in Africa. as som as petitle? and ought ne met to look to it with extreme care. that pure science be actually tought at funt-? The fullie (I know what I apost and and prepared to define it) are not aware. That all quartery is charge the where The Freully Them selves. They have some the seed. They alone have mured and watered it - The public have only purnished sil in which to plant. he don't mut that. God will blefs every effect to recover it would be attended with immediate meets, and that their her dequalition, but will be not more abundant. by thep, exertiens to establish pure and undefiled truth whatever may be its originat. It may be suggested that I am living right of belonization in the views I have taken
