PUBLISHER'S NOTE

The wide diversity of the manuscript types in this collection and the serious deterioration of their condition has presented a challenging technical problem. Despite the use of the highest quality materials and equipment, the reader will encounter a number of illegible images. This unfortunate result was anticipated prior to the commencement of the micrographic operations but it was established as a policy that the scholar was entitled to the best facsimile possible of <u>all</u> pertinent documents, regardless of the degree of readability of the original.
