KRIT CARS

At the Motor Show to be held in Baltimore January 20th to 24th, we will exhibit the entire production of our Detroit factory, both assembled and dissembled, showing the mechanical construction throughout, also the beautiful body effect of this handsomely finished car.

To those contemplating the purchase of a car this season we extend a cordial invitation to visit the show, where we will be pleased to compare each feature with cars near the price or cars selling for even more money, and this will be a most excellent opportunity of seeing the difference.

AT the Wisconsin experiment station it has been found that the large cows return more profit per cow than the small ones. Cows 900 pounds and under returned products worth $54; cows 901 to 1,000 pounds, $61.36; cows 1,001 to 1,100 pounds, $66 28; cows 1,101 to 1,200 pounds, $72.21; cows 1,201 to 1,300 pounds, $72.01; cows 1,301 to 1,400 pounds, $79.64; cows over 1,400 lbs, $88 01. Mr. Warren, in his book on "Farm Management," in commenting on the above, says: "The large animals of any breed are much more economical of labor and barn room and usually give as much or more milk for the food eaten." The larger cows used their feed with the same efficiency the smaller ones. In fact, the largest were a trifle more efficient than the small ones.

IT will surprise many Marylanders to learn that there are more than 2,000,000 acres of land in the State which either have never been cultivated or else have fallen so low in point of productivity that the crop yield is far below the average. In the work of helping to "build up" the soil Mr. Robert M. Pindell, the State Manager, will have the active co-operation of Dr. Cyril G. Hopkins, the famous soil expert, who is well known to Maryland farmers. Dr. Hopkins has made a tour of the State and is of the opinion that by the adoption of a system of permanent agriculture, based on the scientific upbuilding of the soil, Maryland's non-productive acreage can be brought to a high state of fertility and productiveness.

ROCK HALL NOTES.

Now that "Aunt Mary's" legislators have got down to work after their first week's vacation, our goodsbox orators are making use of the opportunity afforded them by the weather man, to formulate and promulagate various plans by which the watermen may be benefited. Would-be signers of petitions are scanning the counters and desks of the merchants for a chance to spread their illustrious (?) names for and against the measures proposed.

Postmaster J. W. Downey spent several days out of the county recently but he was not wire pulling on the postmastership; he says wire pulling is useless as the "power that be" will not give ear until the time is on the dot, then it will be the hardest feud on.
