Keeping the Talk-Tracks Clear

The telephone you see before you is a very small part of the telephone system—one of the finger tips, as it were. More than 60% of the telephone plant is located outside of the central office and the subscriber's premises.

Thousands of dollars in telephone plant is hidden under the city streets and strung out along the country road. When you talk over a telephone line, you have thousands of dollars worth of equipment at your exclusive service.

It is the unseen telephone plant which enables you to send your voice where you will.
