RETAINING EFFICIENT TEACHERS A SERIOUS PROBLEM

Agricultural College Bulletin Points Out Difficulties and Remedies For This Condition In Country Districts.

One of the great problems, at present, is the retention of an efficient agricultural teacher for any great length of time in our rural high schools. This is due to the great demand for these men in other agricultural pursuits and to the limited supply of trained teachers. The problem may be reduced by the employment of home teachers, by the adjustment of salaries, and by increasing the length of the term of service.

The agricultural teacher should be employed for the entire year in order that he may render the greatest possible service to the community. By employing him for a longer term his position will be on an equal footing with other agricultural callings, thus reducing the chance of losing his services when he has become valuable to the school and to the community.

It is as important to consider the personality of the teachers as it is to consider his college training. He comes in closer touch with the life of the country community than any other school official. He, through his exemplary habits, ability to do things, and general culture, must be able to command the respect of the entire community. The boy in the school must feel that his teacher knows of what he speaks, and the parent must be satisfied that the child is being directed by one who is qualified to instill correct ideals of farm life and its possibilities. —J. E. Metzger, in Bulletin No. 3, on Agricultural Education of the Agricultural College which will be mailed free to all requesting it.

POULTRY RUNS SHOULD BE FRESHENED AND SOWN TO RYE FOR SPRING GREEN FEED.

ROY H. WAITE.
Maryland Agricultural Experiment Station.

If you are keeping your chickens in yards, they will need some green feed next spring and the yards ought to be cleaned up so that diseases and parasites will not develop at will. You can perform these two operations at one time if you will dig or cultivate your yards and sow them to rye. If you have a double yard system, you can use one yard or set of yards in the summer and the other set in winter. The summer yards ought to be sown to rye about the first of October, and the hens kept off. Then in the spring when the rye gets a good start they can be turned back and if about 50

RYE FOR CHICKENS.

square feet is allowed for each bird and they receive a bulky mash, green feed will be provided furnished until the rye is ripe. Other things might be sown but rye is hardy and stands pasturage well.

RYE VALUABLE FOR EARLY SPRING FEEDING.

Will Help Out Shortage In Long Feed If Sown Now.

NICKOLAS SCHMITZ.
Maryland Agricultural Experiment Station.

Rye when properly used is one of the most valuable crops on the farm. It will produce fair yields on land too poor to grow wheat, corn, coats or barley, and in view of the present shortage of roughage on many Maryland farms, it promises to be especially helpful to stock owners at this time.

Where a soiling crop is not desired, it will provide excellent spring pasturage. This method of handling it requires less work than soiling, and while only about one-half as much food, is obtained as from soiling, it can be used over a much longer period of growth.

In fact, instead of furnishing food for only about two weeks as in case of soiling crops, it will furnish good pasture from four to six weeks. Furthermore, it begins to do this two or three weeks earlier than the first cutting can be made when the rye is used as green forage. But this it not all; if sown in early September, it will afford considerable late fall and early winter grazing after the grasses have disappeared. In the spring it is usually ready for light grazing before pasture grasses have made sufficient growth.

The cultural and fertilizer requirements of rye are the same as those of wheat.

MRS. THOMSON TELLS WOMEN

How She Was Helped During Change of Life by Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"I am just 52 years of age and during Change of Life I suffered for six years terribly. I tried several doctors but none seemed to give me any relief. Every month the pains were intense in both sides, and made me so weak that I had to go to bed. At last a friend recommended Lydia E. Pinkham's Vegetable Compound to me and I tried it at once and found much relief. After that I had no pains at all and could do my housework and shopping the same as always. For years I have praised Lydia E. Pinkham's Vegetable Compound for what it has done for me, and shall always recommend it as a woman's friend. You are at liberty to use my letter in any way."—Mrs. THOMSON, 649 W. Russell St., Philadelphia, Pa.

Change of Life is one of the most critical periods of a woman's existence. Women everywhere should remember that there is no other remedy known to carry women so successfully through this trying period as Lydia E. Pinkham's Vegetable Compound.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman, and held in strict confidence.
