Suits That Suit

Come in and try on some of the NEW COMERS FOR SPRING WEAR

HERE are Spring Suits that will be sure to put a smile that won't come off on the face of the men who wear them! There's always a snap and go to the garments we sell! Our styles are distinctive! We're out of the rut—and our clothes are different!

If we can't give you a regular "made to order" Fit and a regular "made to order" Tailoring Style WE WON'T TAKE YOUR MONEY.

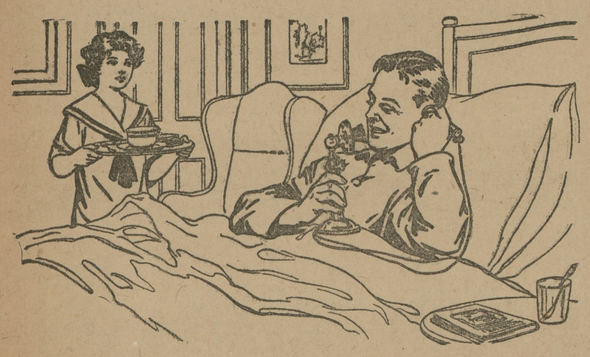

It's a revelation to some men to see how readily we can meet their every requirement with our EXCELLENT garments.

On every count and in every phase we are inclined to believe that our Spring Suits will satisfy every man that keeps his hand on his pocket-book and says, "Show Me."

PLAN OF SMALL GARDEN

A small backyard garden 75 feet long and 50 feet wide, particularly suitable for gardeners in southern cities, has been planned by the U. S. Department of Agriculture's specialist. In a previous article a plan was shown for a half-acre garden; the present suggestion is made for those who have not the room for such an extensive patch, but desire to have a supply of vegetables for the home. Provision has been in the plan for a hotbed, cold frame, and open seed beds running the length of the garden; also for an asparagus bed and a rhubarb or perennial herb bed. The other vegetables are planted in rows running across the width, and the suggested order in which the various kinds might appear, and in which later crops might follow is given herewith.

Lettuce, Radishes followed by Celery.
Onions followed by Celery.
Parsnips followed by Celery.
Carrots followed by Kale.
Beets followed by Kale.
Peas-Early Varieties followed by Fall Cabbage.
Peas-Late Varieties followed by Fall Cabbage.
Beans followed by Fall Potatoes.
Cabbage followed by Fall Potatoes
Cauliflorwer, kohl-rabi followed by Fall Potatoes.
Tomatoes followed by Spinach.
Eggplant, Peppers to be followed by Spinach.
Cucumbers followed by Turnips.
Muskmelons or Squash followed by Turnips.
Early Potatoes followed by Fall Beans.
Sweet Corn followed by Fall Beans.

In the above plan, the first two rows are devoted one to lettuce and one to radishes, the two crops to be followed later by celery. The next three rows are devoted to onions from seed sown in place and are to be followed later by celery.

The next two rows are devoted to parsnips to be followed later by celery and the next two rows are devoted to carrots, to be followed in the autumn by Kale. The next three rows are to be devoted to garden beets sown in succession and followed in the autumn by a crop of kale.

The next two rows, which are 3 feet apart, are to be devoted to early varieties of peas, the first sown about a week before the second row and after the crops are removed the land is to be devoted to autumn cabbage. Two additional rows are to be sown to late peas planted in the same order as the first and also followed by autumn cabbage The pea patch adjoins three rows devoted to beans, which are to be followed by autumn potatoes. The next two rows are devoted to cabbage, followed in the autumn by potatoes.

The next row is devoted to cauliflower or kohl-rabi, to be followed in the autumn by potatoes. The next two rows are devoted to tomatoes tied to stakes, and after the tomatoes have been harvested the land is sown in spinach. The next row is devoted partly to eggplants and partly to peppers to be followed later in the season by spinach. The next row, which is six feet from the eggplants, is devoted to cucumbers to be followed after the cucumbers are harvested by an autumn crop of turnips.

The next row is 8 feet from the cucumbers and is devoted to muskmelons or squashes, followed by turnips in the autumn. The next 2 rows are devoted to early potatoes, followed by autumn sow beans, and the next 3 rows are given over to sweet corn, planted one row each week after the proper season for planting has arrived and to be followed in the autumn by peas.

Where the distance between the rows is less than two feet, hand cultivation with a wheel hoe is comtemplated. If a hand cultivator or wheel hoe is not available, the rows should be at least two feet apart to give sufficient space for the horse cultivator. Straight lines should be followed, no matter what method of culture is used.

Of courre, the plan is only suggestive, and each grower will have to devise additional plans to suit his own conditions. Among the things that particularly must be considered in each specific case is the location of the garden. In this connection the question of proximity to the house should be given first consideration. As the work of caring for the garden is usually done in spare time, the location selected should be as near the house as possible. The slope and type of soil should be next considerations. A slope to the south or southeast is usually preferrable, because here the soil warms up early in the spring, which permits early planting and stimulates the early growth of crops Practically any type of soil can be used for the garden, but a sandy loam is to be preferred.

WOMAN STATE AGENT IS SECURED FOR MARYLAND.

Director T. B. Symons, of the Extension Service, announced this week the appointment of Miss Katherine A Pritchard, as State Agent in Woman's Demonstration Work of Maryland. Miss Pritchard is a native of this State, having been born in Somerset county. She received her education in Baltimore City graduating from the high school in 1891. Since that time she has been identified with the Teacher's College, Columbia University, both as a student and instructor in Domestic Art and Science.

Director Symons, in speaking of her qualifications said, "Miss Pritchard comes to us unusually well represented."

THE EFFICACY OF PRAYER.

Bobby had been taught to remember all of his relatives when he said his prayers. One night, as he knelt at his mother's knee, he did not mention the name of his favorite aunt.

"Why Bobby," said the mother, "you didn't say 'God bless Aunt Beatrice and make her happy."

"Well, mother," replied the little boy, "I don't have to say that any more. Aunt Beatrice's engaged.

Biggs & Peacock, horse trainers, left April 3rd with their string of horses for Radcliffe Park, Chestertown, Md. where they will train and condition their horses during the coming season. Among the horses are Princes March, 2.14¼; May Bird, 2.17½; June Bug, 2.14½; No. 2, 2.16 Lady Dewey, no record, and a green colt, by Director General, from which great things are expected at this track. Among the trainers are John Mallalieu, with 10 head of good ones; George Bultimor, with eight; Elmer Stafford, with five; George Satterfield, with five; Frank Barnes, of Baltimore, with six. Among Barnes' bunch is Charlie K., on old Wilmington favorite.—New Era.

Ten Weeks In Bed—Eminent Physicians Failed—Wonderful Recovery.

I wish to inform you of the great benefit I have derived from the use of Swamp Root. I had been a sufferer for more than twenty years from kidney and liver trouble and was almost constantly treated by the most eminent physicians who could only give me temporary relief. I had been in bed ten weeks when I began the use of Swamp-Root. Inside of twenty-four hours I could see that I had been greatly benefitted. I continued to use Swamp-Root until I had used several bottles when I really felt that my old trouble was completely cured and I am positive that any person suffering with kidney or liver trouble can be cured by the use of this preparation.

I am now in the best of health, better than I have been for ten years or more. I do not know how to express myself as strongly as I desire, in favor of Dr. Kilmer's Swamp-Root, as I am sure that it saved my life and that my good health is due entirely to this great remedy. I heartly recommend it to every sufferer and am confident they can be benefited as I have been. It is a pleasure for me, gentlemen, to hand you this recommendation. MRS. H. J. PRICE.
1406 Center St. Portsmouth, Ohio.

Personally appeared before me this 13th of September, 1909, Mrs H. J Price, who subscribed the above statement and made oath that the same is true in substance and in fact.

A. A. CALVERT,
Notary Public.

Letter to
Dr. Kilmer & Co.
Binghamton, N. Y.

Prove what Swamp-Root will do for You

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle It will convince anyone. No culls; ripens even up to the stem.
Perfect beauties, uniform in size and ripening.
Picks two to one to any other variety.
From 105 to 122 perfect fruit to the vine.
A perfect shipper; Blight proof.

"JOHN BAER" FIRST TOMATO PICKED THIS YEAR.

Mr. J. T. Wilson, Calvert Co., Md., August 19, 1914, writes: "'John Baer' Tomatoes are the earliest I have ever raised. They would have been very much earlier but for the long, dry season which nearly killed them; even then I was the first in my neighborhood to pick tomatoes. It is a fine tomato for table use or for canning. It has not as many seeds as other tomatoes. You can recommend 'John Baer' tomato highly for early use."

CAME FOR TEN MILES AROUND TO SEE "JOHN BAER" TOMATOES.

Mr. Thos. Howe, Washington Co., Md., writes July 30, 1914: "'John Baer' tomatoes done so fine for me I cannot say enough about them. I grew 1500 plants from the $1.00 package of seed. I picked fine ripe tomatoes from the last part of June to the last of July—300 baskets in all, selling them at $1.25 per basket and now the vines are still loaded with tomatoes. There were absolutely no cripples among them. Some of the vines had 105 tomatoes. People came for 10 miles around to see them. If I had bought one-quarter pound of the seed I should have made several hundred dollars more off the crop. Solid first, second and third pickings. Picked every other day since starting to pick."

"JOHN BAER"—3 WEEKS AHEAD OF ANY OTHER TOMATO

Mr. R. T. Scott Nottoway Co., Va., August 24, 1914, writes: "'John Baer' Tomatoes were ready for market three weeks before any other tomato in our locality. I have been picking fine, large tomatoes off of them for over two months. I had a very successful crop."

CROWNED WITH SUCCESS
