Wood's Seeds.

Cow Peas
Sown after Harvest

make one of the surest-cropping and best of soil-improving and forage crops that you can put in.

COW PEAS sown in July will easily mature their crops in time to cut for forage and plow under to make seedings of fall crops, increasing crop productiveness and fertility of the land to a wonderful extent.

WOOD'S COW PEAS are all choice, recleaned stocks, of high tested germination and quality.

"WOOD'S CROP SPECIAL" giving full information about **Cow Peas, Soja Beans, Millet, Crimson Clover, Late Seed Potatoes, Etc.,** mailed on request.

Now is a good time to have yourprinting done.

LOCAL NOTES

Anthrax, the dreaded scourge of the cattle breeders, has broken out among Queen Anne's farmers across the river. This disease is almost always fatal among cattle, and can be contracted by man through inoculation. The State Veterinarian has the matter in hand to prevent further spread.

One man, on the farm of B. F. Potts, has contracted the disease.

Thirteen head of cattle have died to date, viz.: B. F. Potts, 4 cows; Hicks Tucker, 2 cows; J. C. Seney, 2 cows; Charles McKee, 1 cow; Harry Tucker, 3 mules, and Joseph Gears, 2 cows.

BRIDGE-KEEPER WHEAT occasionally counts the autos which pass over Chester bridge and says the highest number in anyone day was nearly 200 He has seen days when there were nearly 300. The Caroline Sun says: "On Monday the bridge tender at Ocean City kept a record of the cars passing over the bridge and his record showed that 800 cars went into Ocean City on Monday. It is estimated that during Saturday night, Sunday and Monday at least two thousand cars went over the bridge to Ocean City which goes to show what the good roads of Maryland will mean to this ocean resort. If each car averaged three people it meant 6,000 visitors for Sunday and Monday to Ocean City, and many of these people were from distant points who had never before visted Ocean City." Some were from Chestertown.

AN effort is being made to obtain one of the State boats to bring the P. O. S. of A. delegates to the State Convention to be held in Centreville, beginning Monday, August 21. The convention committee is arranging an automobile trip for the delegates who will attend the convention. They will be taken to different points of interest. Come over and see the prettiest river in America!

MARYLAND Agricultural College announces that the annual essay contest between the young men and young men and young ladies of the state will be held again this year. Twenty dollars in gold will be given for the best essay written by a boy, and a like amount for the best essay written by a girl. The subject for boy is: "What can be done to promote the interests of agriculture in Maryland" The subject for girls is: "How the daughters of Maryland farmers can make the farm home more attractive."

A NEW CEMENT WALK is being laid on Kent Circle in front of the homes of L. H. P. Vansant, Wm. H. Lambert and G. H. Cannan. It will be a decided improvement.

Typhoid Fever

How to Prevent Its Spread

ISSUED BY THE
State Board of Health
OF MARYLAND.

When TYPHOID FEVER appears in a family the source of the infection must be looked for in drinking water or food taken within the preceding twenty days. The patient may not have been infected at home, but if a second case occurs this second infection will in all probability be traceable to the first patient. In a majority of instances the drinking water has become infected. Your first business, therefore, is to find out the quality of your drinking water.

You can do this by asking your local health officer for instruction about shipping us samples of your drinking water. *The daily supply of drinking water should be boiled.*

The infectious material of typhoid fever is produced in but one way. It grows always in the bowels and sometimes in the bladder. It, therefore, escapes from the sick person in the stools and urine. If we kill the germs in the stools and urine as soon as they are passed, there can be no spread of typhoid fever. These discharges should, therefore, be disinfected as soon as possible. You will need a large quantity of a good disinfecting solution.

RECEIPT FOR A GOOD DISINFECTANT.

To four gallons of water add enough salt to make a strong brine. Put this in a five-gallon demijohn or jug and add a quart of crude carbolic acid Shake it up well and you will have a good disinfectant for stools and urine.

The crude carbolic acid, known as U. S. P. 90 per cent., is very good, and a quart will cost about 50 cents. There is a cheaper grade, known as a 36 per cent. acid, which is nearly as effective.

About a pint of this solution should be put in the chamber or bed pan before it is used, so that the discharges will begin to be disinfected as soon as they leave the body. There must always be at least as much of the disinfecting solution as there is of the discharges, so that more of the disinfecting solution may need to be added after the discharges are passed. If the stools are thin and watery, their disinfection will be accomplished in half an hour or so; but if the stools are thick or formed very much more time will be required. On that account it is best to have a covered jar or bucket into which the bed pan can be emptied, and to empty this jar only once in 24 hours. If the discharges cannot finally be thrown into a sewer, they should be buried in the soil at a convenient spot where there is no chance of their fouling a water supply. The discharges should never be thrown upon the surface of the ground, for you will hardly be successful in killing all the typhoid baciili, and you must not place them where those not killed by the acid may be blown about in the dust or carried away by flies to infect other people,

In spite of every precaution those who wait on the sick person will get their hands infected, and it is therefore necessary to wash the hands every time one does any service about the patient's bed or body. Whoever waits on the patient must not prepare food or drink for other persons in the house, or if it is impossible to mind this rule, one must most carefully and thoroughly cleanse the hands before performing any household duty outside the sick room Good scrubbing with soap, water and a brush, and then rinsing well in fresh water, will suffice for cleansing the hands.

If anyone else in the house falls sick within two weeks after the first patient, the probability is that the infection was lodged before the precautions were taken in regard to drinking water and the disposal of discharges. But if the second case occurs more than 20 days after the first case, that will signify that w ehave made a mistake somewhere in our precautions.

DR. GEORGE H. JONES,
Secretary Local Board of Health of Kent County, Galena, Md. jy17-tf

BALTIMORE'S BEST STORE
Hochschild, Kohn & Co.
Howard and Lexington Streets

Baltimore's Best Store Offers Absolute Security with Every Purchase

Whatever you buy at Baltimore's Best Store is returnable, within reasonable time, for refund or exchange, if you are not entirely satisfied with it.

This is not new. It was part of our policy when this store opened, nearly eighteen years ago, and it has been carried into effect every business day ever since.

It is this which makes this store an especially pleasant place to deal with by mail. With the best intentions in the world, you may order something and find that it is not what you want, or we may send you something which, upon examination, you find is not fully satisfactory. It is good to know that you are dealing with a store that "money-backs" its goods without question or argument.
