ROCK HALL, - - MARYLAND

BIG GUNS OF A CENTURY AGO

Turks at That Time Had the Most Effective Cannon Known to the World.

It would scarcely appear feasible that a shot weighing 800 pounds could have been employed a century ago, yet the Turks, who used the largest cannon in Europe, actually used guns of such caliber at that time. When Sir J. Duckworth passed the Dardanelles to attack Constantinople in 1807 his fleet was dreadfully shattered by the immense shot thrown from the batteries. The Royal George, of 110 guns, was nearly sunk by only one shot, while another cut the mainmast of the Windsor Castle almost in two; a single shot knocked two ports of the Thunderer into one; the Repulse (74 guns) had her wheel shot away and 24 men killed and wounded by a shot, the ship being saved only by the most wonderful exertions. The heaviest shot which struck our ships was of granite, weighing 800 pounds, and was 26 inches in diameter. One such shot, to the astonishment of the tars, stove in the whole starboard bow of the Active, and, having crushed this immense mass of timber, the shot rolled ponderously aft, the crew standing aghast at the singular spectacle. One of those guns was cast in brass. It was composed of two parts, its breech resting against massive stonework, and the difficulty of charging such a monster would not allow of its being fired more than once.—The Dundee Advertiser.

MANAGEMENT OF THE BODY

Extreme Care Should Be Exercised by Those Who Are Afflicted With Defective Heart.

A person with a defective heart must remain, in everything he does, well within the limit of his strength. Though able to walk fifteen blocks, he should not walk more than twelve; though able to work three hours, he should work only two, and rest, if possible, every hour for a few minutes, to avoid fatigue. When able to get along with seven hours' rest and sleep, he should rest and sleep at least nine hours. His recuperative power is lowered and it takes, when overtired, days and weeks to regain strength which a healthy person recovers in one night. He endangers his future whenever he goes beyond his strength even a little, or only to the point where he begins to feel tired. He may do as much as an average healthy person, but he must divide the work into periods of short duration. What may happen in a year or two must be considered rather than whether, for the present, the heart can stand the effort. The best protection for the future is a proper adjustment of effort at all times to one's strength.—Exchange.

Marvelous Instrument.

A marvelous instrument, the compound interferometer, has been invented by Prof. C. W. Chamberlain, president and head of the physics department of Denison university. With this instrument it is possible to measure a distance as small as 1-20,000,000th of an inch. This instrument will in all probability be the most delicate measuring instrument of its kind for many years to come. It is practically impossible for the human mind to realize the smallness of the distance measurable by the compound interferometer, which is 400 times as powerful as the most perfect compound microscope, but some idea can be formed by the use of comparisons. This 1-20,000,000th of an inch is the apparent size of the head of an ordinary pin viewed at a distance of 227 miles, or the size of a 50 cent piece viewed at a distance of 9,000 miles, or the size of a human face viewed at a distance equal to twice the circumference of our mother earth.

New Armored Motor Car.

A novel type of armored motor car has been designed by a resident of Lowell, Mass. It contains some very original ideas as to protection from rifle and gun fire. The car is shaped exactly like a turtle, the upper and lower shell being joined at a distance of about sixteen inches above the ground. The wheels are almost entirely covered by the armor. The latter is composed of steel shells, curved to represent a turtle back, the inventor claiming that such a construction renders the persons in the car immune from rifle and machine gun fire, as the bullets are deflected into the air. Loopholes for firing, a periscope for steering, emergency doors in the rear and on both sides, a powerful motor under the driver's seat, and a quick-firing gun mounted on a revolving base—these are all parts of the design.

Parrot Fights for Master.

When R. A. Whitby, a United States marine, was arrested by the police a parrot that Whitby carried under his arm put up a fight, and the sailor was compelled to call off the bird before the officer could place Whitby in the patrol wagon.

When the prisoner was taken to the city hall the parrot refused to let the police put Whitby in a cell without permitting the bird to occupy the same place of confinement. Whitby and the parrot were both released after a hearing.—Chester (Pa.) Dispatch to Philadelphia Inquirer.

Growth of Cotton Industry.

American cotton mills are now using more than 5,000,000 bales of cotton a year, as compared with 1,000,000 bales 45 years ago.

Make Each Acre of Wheat Produce an Extra Dollar or Two

Many farmers say that Swift's Fertilizers produce 1 to 3 bushels more wheat per acre than any other brand.

Even one bushel more makes Swift's Fertilizers worth $10.00 per ton more to the farmer than another brand.

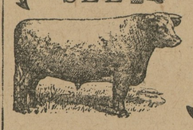

Here Is The Way It Figures Out:

200 lbs. Swift's Fertilizer per acre
Extra Yield 1 bushel . . . $1.00

2000 lbs. Swift's Fertilizers on 10 acres
Extra Yield 10 bushels . . $10.00

Use Swift's Red Steer Fertilizers And Make This Extra Profit

The Organization in Kent stands for progressive ideas in our schools looking to the better equipment of our boys and girls to take up farm life.

S. SCOTT BECK, ATTORNEY.

Order of Publication

Walter S. Jamison,
vs.
Bertha M. Jamison.

In the Circuit Court for Kent county, Md., In Equity. No. 1925.

The object of the bill of Complaint in the above case is to procure a Decree for divorce a vinculo matrimonii.

The Bill states:

1. That for more than two years last past your Orator has been and still continues to be a resident of Maryland and now resident in Cecil county.

2. That your Orator and Bertha M. Jamison, the defendant, were married at Freemont, Pa., on or about the 10th day of July, 1902 and lived together until about the 7th day of November, 1913.

3. That the four children were born to them as a result of said marriage, namely: Edwin Jamison, twelve years old, Raymond Jamison, ten years old, Gertrude Jamison, eight years old, and Medford Jamison, six years old, all of whom are now living and are in the custody and care of your Orator.

4. That, although the conduct of your Orator towards his wife, the said Bertha M. Jamison, has always been kind, affectionate and above reproach, the said Bertha M. Jamison has, without any just cause or reason, abandoned and deserted him, and has declared her intentions to live with him no longer.

5. That the said Bertha M. Jamison has committed the crime of adultery in the State of Delaware with one Clarence Swain sometime in the year 1913 and with divers other persons whose names are unknown to your Orator, at divers times and places, which offenses your Orator has never condoned.

6 That ever since their marriage your Orator has behaved himself as a faithful, true and affectionate husband towards the said Bertha M. Jamison.

7. That the said Bertha M. Jamison is a non-resident of the State of Maryland, and is now residing at Wilmington in the State of Delaware.

It is thereupon this 20th day of August, 1915, ordered by the Circuit Court of Kent County in Equity, that the plaintiff by causing a copy of this order to be inserted in some newspapeh published in said Kent County, once in each of four successive weeks before the 27th day of September next, giving notice to the said non-resident defendant, Bertha M. Jamison and warning her to appear in this Court in person or by Solicitor, on or before the 15th day on October next, to show cause, if any she had why a decree ought not to be passed as prayed.

JAMES T. DIXON, Clerk.
