3. That the said Walter H. Miller is a non-resident of the State of Maryland and lives at Mt. Claire, State of New Jersey.

4. That the said Merritt T. Miller departed this life sometime during the year 1905 leaving a last will and testament, which was duly admitted to probate by the Orphans' Court for Dorchester County, State of Maryland, and duly recorded in the Office of the Register of Wills for Dorchester County aforesaid a duly certified copy of said Last Will and Testament being filed in the Office of the Register of Wills for Kent County aforesaid and recorded in Wills Liber. WORLD'S LEADING TOCACCO TOWN

Winston-Salem, N. C., Now Manufactures More Tobacco Products Than Any Other City In The World.

Following are extracts from an address delivered by Col. A. D. Watts, Collector of Internal Revenue for the Fifth District of North Carolina, at a smoker given by The Twin City Club, Winston-Salem, February 4th, 1916:

"Some Comparisons

"Winston-Salem is supplying one-fourth of all the chewing and smoking tobacco consumed in the United States, besides exporting vast quantities to foreign lands. This statement is taken from the report of the Commissioner of Internal Revenue for the first quarter of the present fiscal year and from private advices from Washington, as to the second quarter, which ended December 31st, last.

"Your city is making one-seventh of all tobacco products—chewing and smoking tobacco, cigars, cigarettes and snuff—manufactured in the United States. Your manufacturers are paying on an average about $37,000 a day revenue taxes to the government and the amount is increasing from month to month. When your government building, much the handsomest in the State, was completed last July at a cost of $250,000 your newspapers made the statement that the taxes paid in your city to Uncle Sam for the first days of its occupancy would pay for it. Since September, it has taken only a fraction over seven average days collections here to average its cost. So far this week, Mr. Cranford has taken in $206,428 50. I predict that before 1916 shall have ended your average weekly payments to the government on tobacco will more than pay for this magnificent building, leaving the collections for the other fifty-one weeks as clear profit to the government.

"Tobacco Shipments

"Winston-Salem is shipping on an average each week day to all parts of this country and to foreign lands at least $150,000 of tobacco products.

"In conclusion, Winston-Salem manufactures more tobacco, all tobacco products are taken into this statement, than any other city on earth, little or big. Industrially, she is easily first in North Carolina, population considered, first in America, and I believe, in the world; socially, a never failing delight to her friends."

Extract From The Sermon Preached in The Still Pond Church December 19, 1915, by Rev. R. P. Nichols.

What am I talking about? I am talking about just this, anything we do to injure or weaken these bodies of ours is a sin against ourselves. We are clipping the wings of our ambitions. We are making the large place, which is ours by right, a narrowed and a mean one.

When I see our young men, fine young men and boys, smoking their cigarettes, I feel like going out to war, to fight the American Tobacco Trust. Listen to the word of Thomas A. Edison in a letter to Henry Ford

"FRIEND FORD:—

The injurious agent in cigarettes comes principally from the combustion of the burning paper and tobacco. The substance formed is called, "Acrolein." It has a violent action on the nerve centers, producing degeneration of the cells of the brain. Unlike most narcotics this degeneration is permanent and especially affects those controlling the will. "I employ no person who smokes cigarettes."

And he might also have added that no cigarette smoker ever advanced far, because he could not advance into any large place of power and responsibility or high physical efficiency is an absolute condition,—it being the foundation for a larger life and growth.

LOVE POINT NOT SOLD

Report Not True Concerning Reported Sale Of Resort.

The accompanying article in the Baltimore Sun of Monday morning created considerable excitement in Kent and Queen Anne's

Love Point, the resort that has been patronized by thousands of excurionists in the last ten or fifteen years, has been sold to George W. Brown, colored, and next summer will be used as a resort for negroes from Baltimore, Annapolis, Washington and Eastern Shore towns. Brown bought the place from Capt. Vivian Phillips, who recently got control of the tract of land.

While the financial transaction has been completed, it is understood that the ownership papers have not been formally transferred but will be in a day or two. Six Eastern Shoremen controlled the resort until several months ago, when Captain Phillips bought part interest, three of the former owners dropping out. The new interest wanted some definite understanding about the property, saying that he wanted the remaining three Eastern Shoremen to buy his part or sell their part to him. Captain Phillips finally gained full control.

A railroad and factory development wants the present resort used by the negro excursionists, which is on Rock Creek. Brown began looking around for another place and learned that Captain Phillips would sell. There is a hotel, with sixty rooms, on the ground and this will become a place for summer boarders. The dance hall, swimming facilities and wharves also are included in the deal. It is understood Brown has practically closed negotiations for steamers to run from Baltimore, Washington and Eastern Shore towns to Love Point.

Upon inquiry, Captain Vivian Phillips absolutely denies that there has been any sale of Love Point to anybody. The property, Capt. Phillips states, is for sale for the high dollar, and he has fixed a minimum price for it, and while there are several parties now dickering for it, no one has offered him his price but when they do, he will sell it no matter who the purchaser may be. This statement was issued by Capt. Phillips the middle of the week and up to the present time there are no new developments.

The article in the Sun created the talk of the day and property holders adjoining the resort were very much worked up over the sale, as well as the M. D. & V. Railroad and a meeting was later held in Baltimore to see if legal steps could not be taken to prohibit the transfer.

Altar Furniture Presented.—A beautiful piece of altar furniture has been recently presented for use in St. Stephen's Chapel. It is technically known as the "Fair Linen Cloth." Of the best and costliest material, purest white in colour, something over a foot in width, it covers the mensa from end to end, spreads almost to the base of the super-altar, its ends hanging far down on either side toward the footpiece of the Sacred Structure. Its most noticeable feature is the embroidery with which it is decorated. This is truly an exquisite setting forth of skilled and tasteful ecclesiastical needlework, and was wrought by the deft fingers of Miss Eddie Fergurson, who, though she has been residing for several years past in and near to Chesapeake City, is a devoted communicant of old St. Stephen's (North Sassafras) Parish. The embroidery design is, of course, in strict accord with church tradition and practice. The pendants are heavily set with fleurs de lis. The mensa-plane is beautifully ornamented with five Greek crosses, two at each side, on the corners, and one in the centre; these, as is generally known, symbolize the five wounds of Jesus, our most Sacred Redeemer. The new Fair Linen Cloth was placed on the chapel altar on Christmas Day, and has been greatly admired. Miss Ferguson is to be heartily commended for her exquisite skill in the difficult work of ecclesiastical embroidery, and the members of St. Stephen's are to be congratulated on the possession of this most useful and attractive result of her devoted labours.

An 8-foot Spread From a 45-inch Box

IN the **Low Corn King** catalogue it takes pages to tell about the good construction that backs up the "**8-foot-wide spread** from a narrow 45-inch box." Here the space is limited.

See the spreader and study these things: The simple worm and worm gear which drive the apron can be reversed, doubling the wear qualities. The gear is entirely enclosed, away from dust and dirt. The relation of beater and apron is just right to do the best work on the manure with the least power. **Low Corn King** is a steel spreader—frame, beater axles, wheels, driving parts—all of light, strong, compact steel. You return the apron by a convenient foot lever—no hand cranking, no getting down from seat.

These things—remember—back up the even, satisfactory 8-foot-or-better wide spread. Get acquainted with the **Low Corn King** spreader. See the local dealer who sells it.
