It is the lightest draft riding plow made, due to the entire absence of landside friction and the even distribution of the load. The weight of the plow and driver is CARRIED instead of being DRAGGED along.

One share on the No. 11 will outlast four walking plow shares. It holds to the ground at all times, especially in dry weather. May be used with or without tongue. The turning and scouring qualities of the OLIVER PLOW BASES are unequalled.
