"IT'S THE LONG BLUE CHIMNEY"

IF you are a business man, if you are a professional man, if you are employed at a daily wage, make up your mind to deposit weekly a certain sum of money in the bank. You'll be surprised how the sum will grow. Cash in bank gingers up the man who has it there. He has more confidence in himself. The business man is ready for a dull season. He is ready for an opportunity.

So is the professional man. The man who is working for a daily wage and who hasn't any money in bank frequently is fearful of a loss of his situation. He does not work as well or with the confidence in himself as does the man with something laid aside for a rainy day.

COUNTY TREASURER'S

TAX NOTICE

IN PURSUANCE OF AN ACT of Assembly passed at the January Session, 1894, Chapter 203, the undersigned Treasurer of Kent county hereby gives notice that the County Commissioners of said county have levied a tax of $1.53 on the Hundred Dollars, on the taxable property of said county.

Said taxes are due and payable September 1st at the offices of the County Treasurer in Chestertown, at which place the State Tax of 82½ cents on the Hundred Dollars is due and payable July 1st, and delinquent September 1st.

Persons desiring a statement of their taxes may receive same by applying at the Treasurers office.

HOW TO SECURE A GOOD STAND

Proper Seeding Of Crimson Clover Is Essential To Successful Production.

NICKOLAS SCHMITZ
Maryland Agricultural Experiment Station.

The lack of rain in late summer and early fall is responsible for many failures of crimson clover, because the young seedlings are very easily killed by lack of moisture or hot sunshine. The seedbed, then, should be firm, moist and finely pulverized. Where sown in cultivated crops, such as corn and tomatoes, the cultivation necessary for these crops is usually sufficient for the clover; where following small grain the stubble should be plowed down as soon after harvest as possible, and the land well worked-up. Then, after one or two good rains and a light surface-working, the field is ready for crimson clover seeding.

Of late years, preparing stubble land for crimson clover by discing thoroughly has been practiced, and under favorable conditions has given good results. This saves labor, but can not be recommended for hard clay soils.

Method Of Seeding.

The seed may be broadcasted by hand, or sown with one of the broadcasting machines found on the market, of which the wheel-barrow seeder is about the most satisfactory. In cultivated crops the seed may also be sown with one of the special single row horse-seeders, made for seeding intertilled crops; but, generally, the machine is best.

When sown in corn a rotary hand-seeder may be used on horse-back. This seeder should be supported a foot or so above the saddle horn, and the horse's ears covered to prevent the seed entering.

Time And Rate Of Seeding.

It is best to seed some time between the middle of July and the middle of September. Along the water-fronts in Southern Maryland and in the southern part of the Eastern Shore it may be safe to sow as late as the middle of September or a little later, but by far the best results are obtained if seeded a month or six weeks earlier. In the northern part of the Eastern Shore and in the crimson clover section of Harford, Baltimore, Howard and Montgomery counties, it should not be seeded later than September 1st, and preferably 4 or 5 weeks earlier. In Carroll county and in almost all of the lower altitudes of Frederick and Washington counties and in the Mountain Section it is seldom safe to sow after August 25th, and it may be seeded as early as July 15th.

The most common rate of seeding is 15 pounds per acre. A few use 20 pounds, while others use only 12 pounds per acre. If the weather and soil conditions are just right, 12 pounds is enough.

SHRUBS FOR HOME GROUNDS.

B. W. ANSPON
Maryland State College Of Agriculture.

According to their flowering habit, shrubs are divided into two groups. One group of shrubs produces flowers from buds that were formed the previous season. The other group produces flowers from buds that are formed on the new wood of the current season.

It is the first group in which the flower buds are prepared before hand, that we especially are interested in at this time. Among this group are the following shrubs:

Azaleas	Golden Bell
Calycanthus	Japan Quince
Daphne	Mock Orange
Deutzias	Mountain Laurel
Dogwoods	Privets
Dwarf Almond	Rhododendrons
Flowering Currant	Spireas (Spring Flowering)
Flowering Crab	Viburnums
Flowering Peach	

The growth of these shrubs can be controlled by pruning now. As soon as the flowers fade, shorten back the old wood. Old shoots that tend to crowd should be removed. Those growing out of the bounds should be cut back to conform to the general outline of the plant. By this method of pruning, strong shoots will develop, on which the flower-buds for the ensuing year will form. Where the growth of such shoots becomes too vigorous, pinch them back.

On Rhododedrons and Azaleas cut out the old flower heads as soon as they fade.

Climbing roses need little pruning, save cutting off the flower clusters after they are through flowering.

Evergreen trees, to develop into good specimens, should have the lowest limbs extending the greatest distance out from the trunks. When upper limbs are allowed to grow out beyond the lower limbs, serious injury results. The longer branches will shade the lower and also throw off the rain from them. Soon the lower limbs will drop their needles or leaves and die. All upper branches that extend beyond the lower limbs should be cut back until they are shorter than the ones directly beneath them. Always cut back to a strong bud, so as to leave no stub. Pinching out the terminal bud will check growth in that direction, when the branch tends to grow out of bounds.

YOU should have a Kanawha or a Red Jacket Pump because they are

SO EASY TO WORK—SO EASY TO FIX

A child can operate them, and when repairs are needed, you can easily do the work yourself. When your well is properly fitted with a KANAWHA (wood) or RED JACKET (iron) PUMP you are assured of having the best. Over forty years of successful pump building is your guarantee that we will build it correctly. Send for our illustrated catalog. If your dealer cannot supply you—write direct.

HUSBAND SAVED HIS WIFE

Stopped Most Terrible Suffering by Getting Her Lydia E. Pinkham's Vegetable Compound.

Denison, Texas. — "After my little girl was born two years ago I began suffering with female trouble and could hardly do my work. I was very nervous but just kept dragging on until last summer when I got where I could not do my work. I would have a chill every day and hot flashes and dizzy spells and my head would almost burst. I got where I was almost a walking skeleton and life was a burden to me until one day my husband's stepsister told my husband if he did not do something for me I would not last long and told him to get your medicine. So he got Lydia E. Pinkham's Vegetable Compound for me, and after taking the first three doses I began to improve. I continued its use, and I have never had any female trouble since. I feel that I owe my life to you and your remedies. They did for me what doctors could not do and I will always praise it wherever I go."—Mrs. G. O. LOWERY, 419 W. Monterey Street, Denison, Texas.

If you are suffering from any form of female ills, get a bottle of Lydia E. Pinkham's Vegetable Compound, and commence the treatment without delay.

Greater Telephone Comfort

For the business man or family who would have the greatest telephone comfort and efficiency, we suggest a direct line to the central office.

The advantages: You can always get the operator's attention when you want to make a call and you have a clear track for incoming calls.

Ask the local manager.
