## Hochschild Kohn & Company

Howard and Lexington Streets
Baltimore

THE STORE THAT GETS THE NEW STYLES FIRST

When you come to Baltimore to shop—as you probably do at intervals during the year—you will naturally feel safest in the store whose stocks are always fresh.

It is a matter of pride with us—and a matter of principle as well—not to allow old-style or shopworn merchandise to accumulate.

Periodically, we hold special sales in which this merchandise is disposed of at ridiculously low prices. We would rather give it away than permit it to remain in stock.

As a result, whatever is shown to you as new at Hochschild, Kohn & Co's is new.

The woman who does not keep in close touch with the styles can buy here with perfect safety—and our people will be glad to give helpful advice and assistance to anyone who is in doubt as to what to choose.

*Hochschild, Kohn & Co.*

### HOSIERY

We are, as we have always been headquarters for hose. We have children's hose, the best that money can buy, for 15c per pair, or 2 pairs for 25c. They are hard to tell from the regular 25c a pair quality. We have a special grade of ladies hose, medium weight and great wearers, at 3 pairs for $1.00.

### CORSETS

The best advertisement on earth that a man can have is a satisfied customer. A lady whoever puts on a pair of Bon Ton or Royal Worcester Corsets is certainly satisfied and comfortable and she tells her friends and neighbors. That's the cause of our immense sale.

### GROCERIES

This is the season of the year for parties and when giving one you always want nice things to eat. We have the best at all times. Why pay a high price for second grade goods when you can get the best here.

We use coffee as our leader. We have a special grade of coffee which are selling at 20c a pound and which cannot be duplicated at any other store for less than 25c a pound. Our 28c quality, our customers say, is as good as they are used to paying 35c a pound for. Try a pound, and if not satisfied no charge will be made for it

Soliciting a trial to convince you am yours for business.

# HOG CHOLERA LOSS MANY THOUSANDS

### Precautions Against Spread of Disease Urged By County Demonstration Agents

### Serum Readily Obtained From State Laboratory

Amount Needed Determined by Weight Of Hog — Symptoms Easily Recognized—Annual Loss From This Source Estimated At $300,000.

College Park, Aug. 17.—Continued reports of hog cholera outbreaks in Maryland bring to the attention of the farmer the fact that our annual loss from this source is estimated to be about $300,000. During the present season, this loss has been considerably reduced through the activity of farmers in taking steps to prevent the spread of the disease. The County Demonstration Agents have been especially helpful in urging hog owners to take the needed precautions against the spread of cholera to their farms.

The symptoms of this disease are easily recognized and every hog owner should take steps to have his hogs inoculated before they are affected. When affected with hog cholera, the animals appear dull and are inclined to lie quietly in the bedding. Several affected animals will lie huddled together. The eyes are at first dull and droopy. Later they become watery and the discharges dry up, leaving the lids more or less gummy and glued together. As the disease progresses, they become weak and stagger in walking. The back is arched and the abdomen tucked up. The respirations are short and rapid. The appetite is poor, and thirst, due to fever, is increased. Temperatures vary from 103 to 108 degrees F. The animals may cough and vomit frequently. Loss of flesh is well marked. Red or purple spots or areas, to be seen back of the ears and along the belly, are due to skin hemorrhages. There may be constipation or diarrhoea. The discharges may be thin and show the presence of blood. Evacautions are painful. In some individuals and in some herds, the symptoms may be well marked and characteristic, while in others, they are scarcely noticeable.

The Maryland Agricultural Extension Service is co-operating with the County Demonstration Agents through its specialist in Animal Husbandry, Dr. S. S. Buckley. In regard to taking the necessary precautions for preventing the spread of cholera, Dr. Buckley says, "Keep hogs and pens in the best possible condition. Avoid placing newly-purchased hogs in the pens with others for at least thirty days. Do not allow hogs to graze where they will be exposed to other hogs or to graze at all near railroads over which hogs are shipped. Report any cases of sickness among the hogs in your neighborhood promptly to your County Agent and secure, if possible, the services of a competent veterinarian."

"Have your swine treated with protective serum, or at least acquaint yourself with the method of protecting hogs against this disease and avail yourself of it as soon as your swine are exposed. Do not regard the serum treatment as such a perfect specific in the immunization of hogs against cholera that all other measures of protection, care and management can be disregarded. The hog owner who wishes to be successful must familiarize himself with hog cholera."

Farmers can secure hog anti-cholera serum at cost by applying to either their County Agent or where an Agent is not employed, by applying direct to the Biological Laboratory, Maryland State Board of Agriculture, College Park, Maryland.

The following table gives the amounts necessary for different weights of hogs:

| | |
|---|---|
| 1 cc per pound weight up to | 10 lbs. |
| 10 cc for weights from 10 to | 20 lbs. |
| 20 cc for weights from 20 to | 50 lbs. |
| 30 cc for weights from 50 to | 75 lbs. |
| 35 cc for weights from 75 to | 100 lbs. |
| 40 cc for weights from 100 to | 150 lbs. |
| 50 cc for weights from 150 to | 200 lbs. |
| 60 cc for weights from 200 to | 250 lbs. |
| 70 cc for weights from 250 to | 300 lbs. |
| 80 cc for weights from 300 to | 400 lbs. |
| 90 cc for weights over | 400 lbs. |

### Seeding Crimson Clover

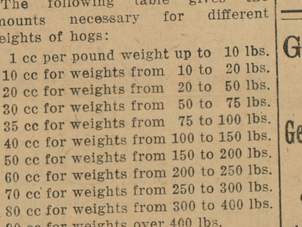

College Park, Md., Aug. 17.—In a circular on Crimson Clover, Nickolas Schmitz, of the Maryland Experiment Station, advises seeding between the middle of July and the middle of September. He says, "Along the water fronts in Southern Maryland and in the southern part of the Eastern Shore, it may be safe to sow as late as the middle of September or a little later, but by far the best results are obtained if seeded a month or six weeks earlier. In the northern part of the Eastern Shore and in the crimson clover section of Harford, Baltimore, Howard and Montgomery counties, it should not be seeded later than September 1st, and preferably four or five weeks earlier. In Carroll county and in almost all the lower altitudes of Frederick and Washington counties and in the Mountain Section, it is seldom safe to sow after August 25th, and it may be seeded as early as July 15th.

# A REMARKABLE STATEMENT

### Mrs. Sheldon Spent $1900 for Treatment Without Benefit. Finally Made Well by Lydia E. Pinkham's Vegetable Compound.

Englewood, Ill. — "While going through the Change of Life I suffered with headaches, nervousness, flashes of heat, and I suffered so much I did not know what I was doing at times. I spent $1900 on doctors and not one did me any good. One day a lady called at my house and said she had been as sick as I was at one time, and Lydia E. Pinkham's Vegetable Compound made her well, so I took it and now I am just as well as I ever was. I cannot understand why women don't see how much pain and suffering they would escape by taking your medicine. I cannot praise it enough for it saved my life and kept me from the Insane Hospital."—Mrs. E. SHELDON, 5657 S. Halsted St., Englewood, Ill.

Physicians undoubtedly did their best, battled with this case steadily and could do no more, but often the most scientific treatment is surpassed by the medicinal properties of the good old fashioned roots and herbs contained in Lydia E. Pinkham's Vegetable Compound.

**If any complication exists it pays to write the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special free advice.**
