Lower Operating Costs

The big problem confronting the business farmer today is "How can I lower my operating costs?"

To this there is only one answer, "Power Farming." You or your father answered it the same way when the scythe was discarded for the mower and reaper.

Two years ago you did not have to power, which is less costly than horse power, have saved money, time and other expenses, as well as hired labor. The tractor will do for you what the old methods did, but next what it has done for them.

Your business rests with you. It is a question of profit or loss. You, as a business farmer, can not afford to operate at cost or at loss. You must make a profit. Competition is as fierce as ever. You must operate by the most efficient method. The Samson Model "M" tractor is your answer. It will give you not only a better and easier means of doing your work but it will cut down your cost of production the same as it has that of your minute you put a Samson Model "M" tractor on your farm—not only in the operation of all your belt-driven machinery.

Early two hundred thousand farmers who have purchased tractors during the past year and through use of this Get ready for your spring work now.

Write Us For All The Facts.—Sit down now and write us to send you new information which we have gathered that will enable you to lower your production cost and increase your margin of profit. A postal card will bring it, no obligation. Write us today.

Known to Four Generations

For nearly a century the name "McCORMICK" has been known to men who farm along broad, progressive lines, as an assurance of highest quality in farming implements.

The McCORMICK IMPROVED BINDER meets a wide range of conditions. The rigid frame combines strength and light weight. The binder is easy to operate, its simple design making adjustments few and far between. It saves the grain whether short or tall, standing or lodged. A McCORMICK pulls light for horses or tractor.

McCORMICK Mowers and Rakes are made in sizes and kinds to meet your needs. A mower is not simply a "mower"—there are distinct differences, and it is these very differences in the McCORMICK that add years to the life of the mower and insure such satisfaction to the owner.

OUR PROSPERITY

There is nothing of greater importance to us than the prosperity of our community. Prosperity at home is based on local business conditions.

Every dollar sent out of our town to the mail order houses detracts just so much from our own individual prosperity, as well as from the prosperity of the store keepers and from the community in general.

Think of the consequences if we should all send to the mail order houses for our necessities and our luxuries. How long would it be before our local merchants would have the "closing out sale" signs on their doors, to be followed by the "for sale" signs on the stores themselves?

AND WHEN THE BUSINESS HOUSES ARE ALL ADVERTISED FOR SALE WHAT WILL BE THE VALUE OF OUR OWN HOUSES AND LOTS?

Such "prosperity" communities. It has failed in some instances because happened that the "mail-order" men of New York and Chicago for the greater part of their merchandise. The local merchants abandoned the field, because there was no business there for them. The burden of taxation fell on the various property owners, because there were no business concerns to bear the big proportion which generally falls to their share. Property values decreased until there were no bidders for undrinkable real estate. The town became dead.

In the meantime the head of a big mail order house in Chicago was drawing an income of over a million and a quarter dollars, made possible by the business received by his concern, by mail, from such communities as the above described and from our own community, as well as from others all over the United States.

Of course, it was done until it was done.
