Indigestion

Many persons, otherwise vigorous and healthy, are bothered occasionally with indigestion. The effects of a disordered stomach on the system are dangerous, and prompt treatment of indigestion is important.

Theford's BLACK-DRAUGHT

for indigestion and stomach trouble of any kind. I have never found anything that touches the spot, like Black-Draught. I take it in broken doses after meals.

DAIRY

HANDY GATE FOR DEHORNING

Holder Rigged Up Leaving Sufficient Space for Animal's Head is Easily Constructed.

A lock gate for catching and holding cows while they are being dehorned and marked, is simple in construction.

First make a gateway in the lot fence, using not less than 4-inch material for the gateposts. Now nail a 6-inch board on each side of these posts, across the gate at the ground, and also two others across at the top of the posts. Close up half of the opening by nailing boards diagonally to the boards at top and bottom of the posts, about 4 inches in diameter and 12 feet long.

When ready to dehorn or mark a large strong animal, drive her toward the gate. Just as she passes her head by the pole, pull it over against her neck, and she is easily held. There is no danger of her doing damage with her horns, for she cannot move her head.—Popular Mechanics Magazine.

A Gate, Rigged Up So as to Leave Only an Opening Big Enough for the Animal's Head, is Useful When the Animal is to be Marked or Dehorned.

is no danger of her doing damage with her horns, for she cannot move her head.—Popular Mechanics Magazine.

AVERAGE WEIGHT OF CALVES

Figures Secured From Dairy Herds of University of Illinois—Factors That Influence.

A very well-bred Holstein bull calf weighing 112 pounds was recently dropped at the Kansas state agricultural college farm at Manhattan. Most of the dairy infants, however, weigh considerably less than this Kansas heavyweight.

In the dairy herds of the University of Illinois the average weights of the calves of the various breeds at birth have been as follows: Holstein male, 90 lbs.; female, 88 lbs.; Ayrshire male, 77.7; female, 74.4; Guernsey male, 70; female, 68.5; Jersey male, 62.4; female, 59.7 lbs.

It is a good practice to note and record the approximate weights of calves at birth, because this information is valuable in apportioning milk to the young animals. The 112-pound Kansas giant, for instance, could handle a feeding of milk that would put a Jersey calf of average weight in line for castor oil.

WATER FOR COWS IN WINTER

Good Plan on Very Cold Days to Heat It Just Enough to Take Disagreeable Chill Off.

The dry cow must have plenty of good water and on very cold days in winter it is a good plan to warm it just enough to take the chill off. When cows are forced to drink ice cold water in zero weather they will turn away from it before they have consumed enough to meet their requirements.

FOR WASHING MILK BOTTLES

Fill Receptacles With Water When Emptied to Prevent Albumen and Casein Hardening.

The milk bottle, if not washed as soon as emptied, should be filled with cold or lukewarm water till it is washed. The albumen and casein harden and stick fast when they dry as well as when heated.

A BROWNIE FOR THE YOUNGSTER

Your play golf—he's too young. He plays baseball—you're too old. Photography is one pleasure that you can enjoy together.

The No. 0 Brownie pictured above would be just the thing for him. Expensive? This sturdy little picture-maker that gives a picture—a good picture too—1 1/2 x 2 1/2 inches is priced at \$2.00.

There are other Brownies—some of them fold and are autographic as well—at prices ranging to \$17.50. Autographic Kodaks from \$8.00 up.
