The sixth millionth model "T" Ford Motor was produced May 18th, in the Ford Factory at Detroit. In other words, from the time back in 1908 when the Ford Motor Company began marketing the now famous Model "T" Motor Car until May 18th, 1922, a total of six million Ford Cars and trucks have been produced. Out of this total 5,517,956 were delivered to purchasers in the United States alone, and according to the latest statistics, 4,478,248 of these Ford Cars and Trucks are still in daily service.

Thus, it will be seen that out of every five Ford Cars and Trucks sold to retail purchasers in the United States alone during the past fourteen years, four are still in actual daily use, which is really remarkable when the hard service of commercial cars is taken into consideration. This seems to forcibly conform the popular knowledge of the longevity of Ford cars. Ohio leads with a total of 290,769 Ford cars and trucks in daily use; Illinois comes second; Pennsylvania third; Texas fourth, and Michigan fifth, with a total of 234,081. New York, Iowa and California follow in the order named, each having more than 200,000.

Commencement of Chestertown High School will be held in Washington College, Wednesday evening, June 14. Commencement of the Grammar School will be held at the same place at 10 a. m., June 14. Rev. J. A. Dudley, pastor of Denton M. P. Church, will deliver the address to the graduates of the high school.
