ROAD OIL AND CATTLE

The following letter will explain itself inasmuch as it has been stated that cattle die from drinking oil in water along State road:

Baltimore, Md., July 10, 1922.
Dr. J. P. Franklin, Chestertown, Md., Dear Dr. Franklin:

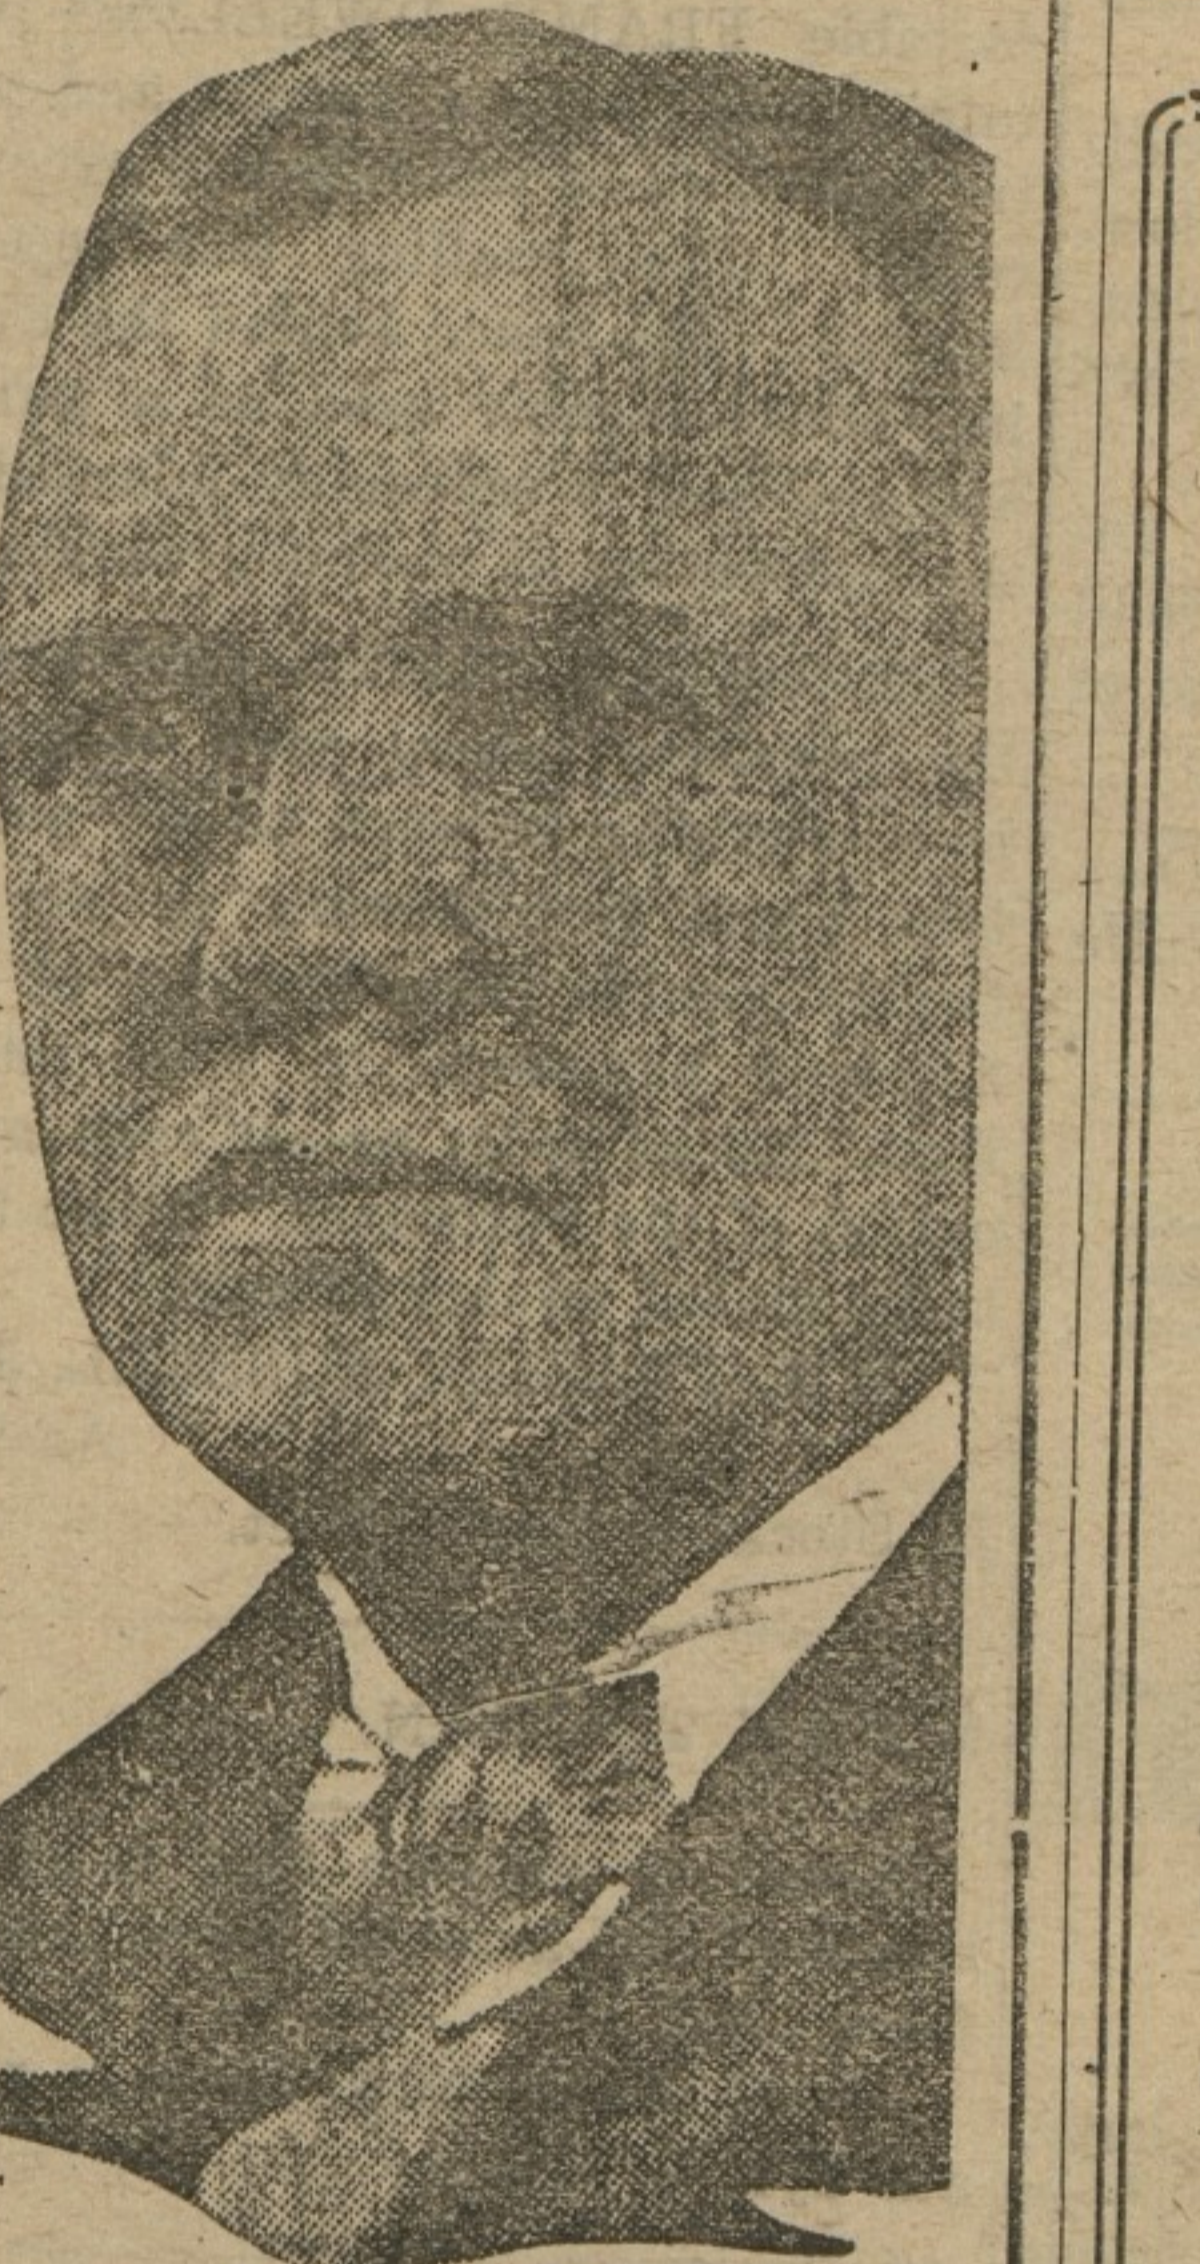

Your letter of June 30th and also the samples to which you refer therein were duly received, the water sample on Saturday last.

A report showing determinations made upon the water sample is enclosed. It indicates what I should characterize as a "marsh water," rather turbid and colored by vegetable growth. The "albuminoid ammonia" figure is unusually high, which appears to be due to the decay of vegetation. There is no evidence of the presence of heavy metal derivations (which would include most mineral poisons), nor of the presence of tars or oils such as would be used in road construction.

I have consulted with Dr. W. B. D. Penniman, who was my predecessor in this office and who is an expert in road-making materials, and have been assured by him that it would be out of the question to charge the death of the cattle to such materials. A rainfall sufficient to wash such materials into the stream would produce so high a dilution at the same time, that all danger from drinking the water would be removed. Practically no soluble matter is to be found in such materials and Dr. Penniman further asserts that cattle will not drink water with the such evidence as we have before us, the cause of the death of these cattle is not to be found in the road washings. Believe me,

Very truly yours,
(Signed) WYATT W. RANDALL

WILSON GIVES HIGH PRAISE TO DAVID J. LEWIS

Ex-President Says Maryland Would Be Fortunate In Such A Senator.

Washington, July 23.—Former President Woodrow Wilson has given what amounts to an endorsement of the candidacy of David J. Lewis for the Democratic nomination for United States Senator, it was learned today.

In a letter to Mrs. Robert R. Henderson, of Cumberland, made public here today, Mr. Wilson speaks in the highest terms of Mr. Lewis, of his past public service and of his qualifications for Senator.

The letter of former President Wilson follows:
WASHINGTON, July 20, 1922.

My Dear Mrs. Henderson: It gives me pleasure to reply to your letter of July 19 because it is always a pleasure to testify to the character and attainments of such a man as Mr. David J. Lewis. My observation of him and my association with him in public matters have led me to entertain a very high opinion of his integrity, his ability and his equipment to deal with public questions.

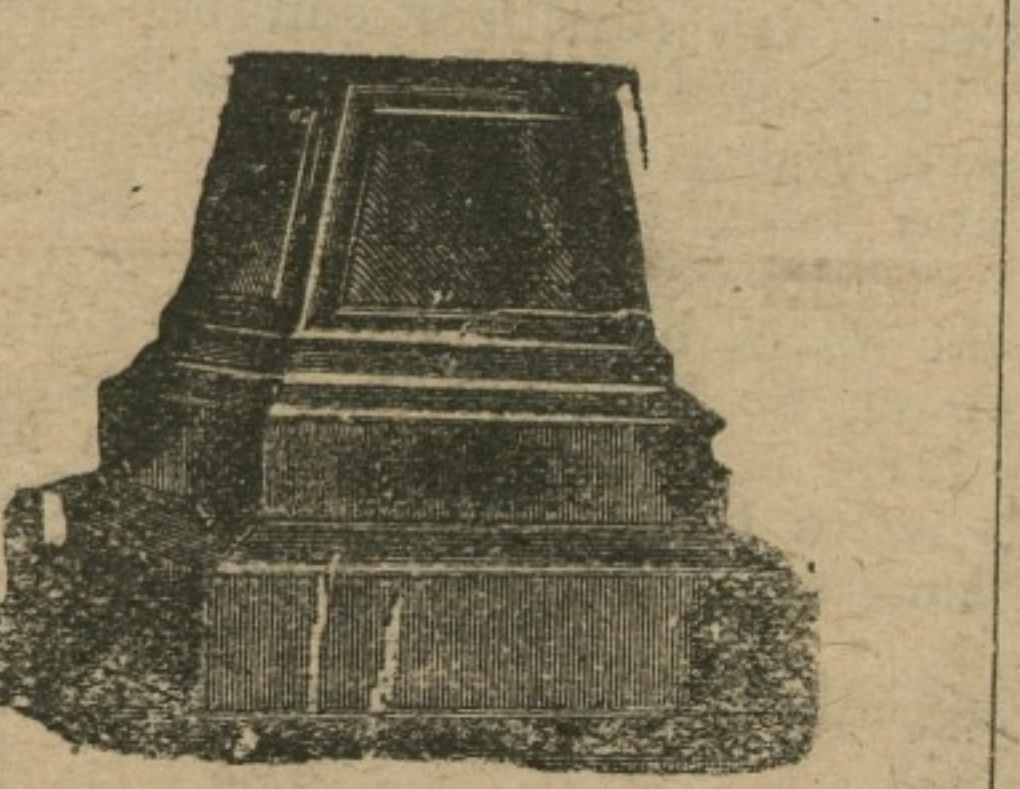

I have been very much interested to learn of his candidacy for the United States Senate and do not hesitate to say that I regard him as in every way qualified to fill the position of Senator. He is most conscientious in all his dealings with public questions and has, moreover, a legal insight into their merits and an extraordinary industry in familiarizing himself with their details.

I was often glad to be guided by his knowledge and judgment in dealing with legislative matters and should deem the State of Maryland fortunate in having such a representative in the United States Senate.

Mrs. Wilson feels me in warm regard and most cordial good wishes and I am, as always, your sincere friend.

WOODROW WILSON.

A 50 Horsepower, Six Cylinder Sedan JEWETT

Four Doors — All Steel — \$1395

Here is the closed car that you have been waiting for—the first all metal, six cylinder, 50 horse-power sedan that has ever been offered at—or even near—\$1395 f. o. b. Detroit.

The New Jewett Sedan is of all steel construction with four tightly fitting doors that close with snap and precision. The entire back is one solid stamping without joints or gaps in the metal. That means there can be no rattles, squeaks or annoying vibration.

The interior is as beautiful as Artist-Designers could make it. There are wide, thickly upholstered seats for five full grown adults. And you will find, not only the necessities, but the luxuries of the high grade, well appointed closed car. That means comfort and pride of ownership.

Then, up under the hood, there is a mighty Paige built six cylinder motor that develops full 50 horse-power. Because it is a six it is a mechanism of inherent balance, overlapping impulses. It will sweep you along at sixty miles an hour or throttle down to three in traffic. That means giant energy and smooth vibrationless riding qualities.

And underlying and supplementing every other detail, is a chassis that bears the stamp of engineering genius. The frame, clutch, transmission, drive shaft and rear axle are perfectly coordinated units—as strong as tested metal and fine craftsmanship can make them. That means long life, endurance and true economy.

Need we say more about this remarkable motor car value? It is sold and served by Paige dealers everywhere.
