

ATLAS PORTLAND CEMENT

BUSINESS short cuts built the bridge. The need for permanence and economy made it concrete. Your building material dealer will tell you to consider any construction from a business angle. He can help you select the material best suited to your purpose.

If, because of fire protection, health or permanence, your structure should be concrete—he will tell you Atlas Portland Cement is "the Standard by which all other makes are measured."

"The Standard by which all other makes are measured"

His Wife Suggested He Take a Drink

"The drink I want you to take," she said, "is Pot's Extra. I tasted it at Mrs. R.'s today—and I liked it so much that I want you to order a case of it so we both may enjoy it. I think a bottle at lunch or dinner, and one at night would do our systems a world of good—it's so refreshing and nourishing. Order a case tomorrow—will you, John?"

A Triumph for Value

IN the past two months Firestone has built and marketed more tires than in any similar period in its history.

This steadily increasing public preference is proof of the recognition by car owners of the greater values offered by Firestone. It is a tribute to Firestone men—all stockholders in the company—all actuated by the operating principle of Most Miles per Dollar.

The high average performance of Firestone Cords is without equal in the annals of tire making and is reflected by the general tendency to specify Firestone for hard service. Taxicab and bus lines, buying tires by the mile, are universally equipping with Firestone Cords.

There are many reasons for the high quality of Firestone tires but chief among the special manufacturing processes are double gum-dipping, thus eliminating internal friction by insulating each cord strand, and air-bag cure, insuring a well-balanced and perfectly shaped product.

Don't speculate in tires—you will find the right combination of price and quality in Firestone. Come in and let us tell you about the service these Cords are giving other car-owners whom you know.

The Noblest Instrument—Is An Organ

and it ought to be in every musical home, but space and cost sometimes prohibit the installation of a pipe organ. However, an

ESTEY

two manual reed organ, built on the exact principles and measurements of a pipe organ—and used in the studios of such organists as Gibson, Dethier and others—such an instrument closely approximates a pipe organ and has everywhere given great satisfaction. It can be built to the special specification of organist and to match the design of any room. Adapted for lodges. Call and hear it.
