## Well balanced— Uniform— A Good Boot

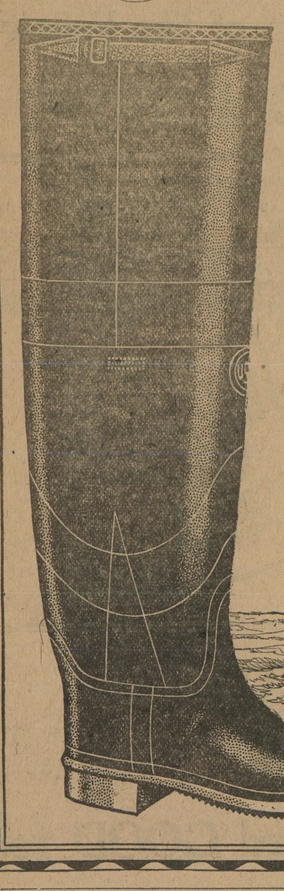

Like a rope or a chain, a boot is as strong as its weakest point. One crack —one snag and the boot is useless.

"U. S." Gray Sole Boots are well balanced throughout, uniform in construction, strongly reinforced where there is a danger of cracking.

Chesapeake fishermen have put these boots to the test and are hailing them as a great achievement in waterproof protection.

Ask the men who are wearing them. Be sure you get "U. S." Gray Sole Boots.

## Fox Runs Thru Centreville

**200 Riders And Scores Of Autos Enjoy A Big Chase — Green Spring Valley Riders Have A Great Hunt Over The River.**

One of the most unusual hunts in the history of fox hunting on the Eastern Shore occurred last week. A fox led more than 200 sportsmen and sportswomen, comprising the Green Spring Valley Hunt Club and local riders, and nearly 100 couples of hounds, through the heart of Centreville, while the streets were thronged with Saturday shoppers.

Undaunted by the shouting crowd that quickly joined the throng of excited riders and the baying pack, the fox darted from street to street, cut across lawns, through shrubbery and over back lots, finally reaching the open country, where he streaked for Corsica Neck. It was there that he had been started six hours earlier.

For hours the fox had been playing back and forth between the ravines and hilsides and across meadows and branches through the country where the Pacas and Tilghmans and Earles, DeCourcys, Spencers, Wrights and other illustrious hunters of ante- bellum dates kept green the memory of the chase as it came here from England. He had been found first near the old Mellfield farm of the Earle family and carried riders and hounds on a long, circuitous route through what is reputed to be the best fox-hunting country in Maryland.

Then at 3 o'clock that afternoon, when every thoroughfare leading into the wooded country was filled with automobiles carrying sightseers, something occurred to turn the fox from his accustomed haunts, and the populace of Centreville was startled by the appearance of a great pack of hounds in pursuit of the flying fox.

The animal seemed the least concerned of all about the unusual visit, and proceeded to run through traffic on the congested streets. For a few moments he seemed nervous, but later, in a businesslike manner, he crossed several town lawns and headed for the open country.

Late in the afternoon he had led horses, riders and hounds deep into the woods country, and sportsmen were offering wagers of 10 to 1 that he would outrun the pack.

The Green Spring Valley Hunt Club, comprised of about 50 riders, their horses and 25 couples of hounds went to Centreville Thursday night. Saturday morning they started the annual hunt at Blakeford farm, the historic estate of De Courcy W. Tom of Baltimore.

Saturday the hounds of the valley club were augmented by the pick of Queen Anne's county fleetlegged pack. Several hundred riders followed the hounds. About 300 automobiles filled with lovers of the sport, circled the countryside and kept in constant touch with the chase.

For several years the valley club has been coming to Centreville, until now the event is regarded as the hunting classic of the year. Riders from all parts of neighboring counties participated in the hunt.

### ATHLETIC MEET ON TUESDAY, MAY 13TH

According to a statement given out this week by Dr. William Burdick, Supervisor of Physical Education, the annual athletic meet held by the schools of Kent county will take place this year at the College campus, on Tuesday, May 13th. Colored schools throughout the county will have their gathering on Monday, April 1st.

This annual meet is always eagerly looked forward to by Kent county schools pupils as well as the parents of the children. Because the winners of the different events are given a trip to Baltimore to participate in the State-wide Olympic Meet, keen competition always takes place.

# FALSE ECONOMY

Some of us often believe we are saving money when we buy an article at a distance, priced at a few cents less than offered at your nearby dealer.

Sometimes these goods do not meet up to your expectation.

Sometimes these goods must be returned for exchange.

Sometimes you keep them against your will.

And this extra expense, inconvenience, and dissatisfaction to the first cost, also add the price of auto transportation and extra time from home duties which means about ten cents per. mile. Compare your prices and average them at home. We believe you can save money at home..

## Heard the Latest

Have you heard any of the comments all around the county about the new doctor in Chestertown? According to folks who have been to him he cures 95 per cent of all human ailments by working on the spine and spinal nerves.

Some say he practices the greatest Health System known. Others call him a fake. Those who praise him have tried him. Or some of their friends have told them of the remarkable results they obtained. Those who "knock" are the kind who knock everything new without trying it. Some day some one will knock at their bed room door, and walk in to find them "knocking" their heads against the bedstead, because they had nothing else to knock. While yet a comparatively new method in this part of the country, Chiropractic is growing by leaps and bounds and winning public confidence and favor.

If you are sick of being sick and want to get well, call on Dr. Dill, the Chiropractor, in Chestertown. You will find him honest and reliable, and anxious to rid you of your troubles. He uses no medicine, pills, massage or electricity. He traces 95 per cent of all human ailments to the spine, the great switchboard of the body.

## Your Old Corn Field Can Again Be Made to Produce Big Corn Crops

**You can make fields that have been repeatedly cropped to corn again produce the old time yields. The remedy is not expensive and consumes no time. It is applied successfully and extensively under similar conditions in many sections.**

**Stop in our store the first chance you get and ask us about applying fertilizer at the same time the corn is planted. We can show you a corn planter which, besides dropping the desired number of kernels in each and every hill, is equipped with a fertilizer attachment that successfully distributes any standard fertilizer. It drops the fertilizer without any choking up or bridging of fertilizer in the hopper and it does not let the fertilizer come in contact with and fire the seed.**

**Don't overlook the "accurate planting" features of this planter —the instant variable drop. A kick of the foot and the drop can be changed to 2, 3 or 4 kernels per hill, as desired. A push of the foot lever and the planter changes instantly from hill dropping to drilling, or back to hill dropping, and you don't have to get off the seat nor touch the seed plates to make these changes.**
