A bacon we're proud to call Corkhill

"OLD fashioned curing method" is a phrase you have often read, *but*—If you prefer old fashioned automobiles and old fashioned trolley cars, then by all means use old fashioned bacon and ham.

The *Corkhill Curing Method* is the very last word—the outgrowth of more than a half century's experience in the production of quality meat products.

No—there's nothing old fashioned about Corkhill Bacon; it's the nearest approach to perfection that we know.

Your dealer has it, or can easily get it at your request.

Say Corkhill

Gill Bros. Formula Is An Open Secret

A young man once suggested "that we sell our formula for Gill Bros. Ice Cream to manufacturers in other towns who wanted to know how to make Ice Cream as Chestertown enjoys."

We told him we had no formula to sell. Any chemist could readily analyze Gill Bros. Ice Cream and find just how we make so delicious in flavor, so rich and so pure.

Gill Bros. Ice Cream contains the same choice fruits, nuts, berries available to any other ice cream manufacturer.

More than this, it is made from our pure cream furnished in constant plenty from the pasteurized output of our private sources of superior milk supply.

Above all, it is produced with all possible skill and care to maintain the GILL BROS. reputation for highest quality—and to keep faith with a public that has put the stamp of approval on our daily production. There is no richer, no better flavored, no purer ice cream anywhere.

CRUMPTON MAN HELD UNDER $1,000 BAIL

Charged with running down Edw. T. Talley, of Wilmington, and reckless driving, Harry Cannon, Crumpton, was held under $1,000 bail in the Municipal Court at Wilmington, for a hearing. It is expected that Mr. Talley will be able to appear soon.

The accident occured last week when Mr. Talley stepped off a street car. He is hurt about the legs.

THE REPORT ON NEW FERRY PROJECT

Owing to natural economic conditions, says a report submitted to Governor Ritchie, of Maryland, by Ezra B. Whitman, chairman of the Public Service Commission, and J. N. Mackall, chairman of the State Roads Commission, Baltimore, never will be the point to which the greater part of the produce of the Eastern Shore of Maryland will be shipped. With respect to passenger traffic the report asserts, the railroad schedules "undoubtedly favor Philadelphia and Wilmington, rather than Baltimore."

The report was primarily on the question of a State-owned ferry between the Eastern and Western Shores of Maryland. The commissioners recommended that if it be decided to engage in the enterprise, the Sandy Point-Kent Island route will be selected. This route, they said, is the shortest one which can be chosen, the distance between the two shores being approximately four and one-quarter miles.

Cost of the project itself the commissioners estimated at $2,680,000. Of this sum $1,350,000 is for boats and piers and $1,330,000 for roads approaching the terminals.

The commissioners asserted, however, that it would be only fair for the State to buy the existing ferries, and that this would cost $950,000 additional, assuming the value given by the companies to the Public Service Commission. The grand total cost, therefore, would be $3,630,000.

The estimate of operating charges, interest and sinking fund is $432,200 without purchase of the existing ferries, and $536,300 with this purchase.

Income for the first year the commissionres placed at not less than $70,000 and not more than $100,000. Assuming that in 10 years the traffic over the ferry will be as great as that over the Havre de Grace bridge is now, they forecast the income by that time at $430,000 a year. Suggested charges for the ferry are $1 for every automobile and 25 cents for every passenger.

Haven't You Heard of the New Way to Grow Better Crops?

Cured Fertilizer—The Result of Years of Research

For a lifetime Mr. Royster and his large organization of farm experts have searched, tested and toiled to improve fertilizer and thus increase the earnings of farmers.

A Startling Development

One of the most startling discoveries has been the *curing* of fertilizer. Mr. Royster and his helpers found that after aging in bins for four to six months, fertilizer grew better crops! The various chemical elements combine with one another and the close association of these elements brings about a chemical action which makes every food element in the fertilizer available to the plant, *just exactly as it is needed*—from seed time to harvest.

Double Milled

After this aging, Royster's Fertilizer is re-milled (to prevent lumping) and then bagged. All this additional work and care certifies the quality of Royster's Fertilizers—and assures you of proper feeding for plants.

Be Sure to get Royster's

The name "Royster's" appears on every bag of Royster's Fertilizer. Look for it. Ask for Royster's Fertilizer by name—and stop guessing about brands.

What Farmers are saying:

"——best I've ever used."

"Your goods are fine crop-makers."

"My crop this year is far better than ever before."

"I can frankly say I have received the best results, by test, with Royster's."

"I am expecting a fine crop this year, and I give Royster's Fertilizer the credit."

"I will not buy anything else as long as I can get Royster's."

"Every time I use it I make money."
