Your Old Corn Field Can Again Be Made to Produce Big Corn Crops

You can make fields that have been repeatedly cropped to corn again produce the old time yields. The remedy is not expensive and consumes no time. It is applied successfully and extensively under similar conditions in many sections.

Stop in our store the first chance you get and ask us about applying fertilizer at the same time the corn is planted. We can show you a corn planter which, besides dropping the desired number of kernels in each and every hill, is equipped with a fertilizer attachment that successfully distributes any standard fertilizer. It drops the fertilizer without any choking up or bridging of fertilizer in the hopper and it does not let the fertilizer come in contact with and fire the seed.

Don't overlook the "accurate planting" features of this planter—the instant variable drop. A kick of the foot and the drop can be changed to 2, 3 or 4 kernels per hill, as desired. A push of the foot lever and the planter changes instantly from hill dropping to drilling, or back to hill dropping, and you don't have to get off the seat nor touch the seed plates to make these changes.

Come in and see our John Deere No. 999 Corn Planter.

Of said increased levy six cents on the hundred dollars shall be for the benefit of the Chestertown Volunteer Fire Company, and all of the monies collected therefrom shall be paid by the Commissioners of Chestertown to the said, The Chestertown Volunteer Fire Company.

If a majority of the votes cast upon said question shall be "For Additional Tax Levy," the Commissioners of Chestertown shall have the power to make the additional levy authorized by this Act; but if a majority of the votes cast upon said question shall be "Against Additional Tax Levy," then this Act shall be null and void and said Commissioners shall not have the power to make an additional levy.
