Union Of Methodist Churches Is Approved

Kent countians who are affiliated with either the Methodist Episcopal or the Methodist Episcopal, South, churches, and who have interestedly watched the proposal for organic union of the two branches of Methodism, are well pleased with the outcome of the decision of the General Conference of the Southern Church, in special session at Chattanooga, Tenn., in approving the decision of the General Conference of the Northern Church at Springfield, recently.

The Methodist Episcopal General Conference at Springfield, Mass., recently accepted the proposal and ordered it submitted to its annual conferences in 1925 if the Southern General Conference should act favorably.

The official vote of the Southern General Conference was 297 to 75, more than the required two-thirds majority.

The conference adopted a resolution requesting that the annual conferences of 1925 be directed to vote upon ratification of the union.

Another resolution requesting that when the annual conferences vote on ratification it be done by secret ballot was adopted.

Should two-thirds of all the members of the Southern conferences ratify the proposal the next step would be a meeting of the bishops of the two churches as one body to notify their respective general conferences of ratification of the union. They also would call upon the two conferences to meet in joint session in the same city.

Would Halt Destruction Of Fish.

Six possible causes for the wholesale destruction of fish in the Chesapeake Bay were outlined last week by T. C. Schaetzle, assistant engineer of the State Board of Health. These causes, given in the order of their importance are: A parasitic growth on the fish, natural death during the spawning period, change in temperature of water, the effect of tar used on nets, contact with oil spilled in the bay at Sparrow's Point and road tar washings due to heavy rain falls of the last few months. Immediate steps are being taken to combat the various causes of destruction.

At a meeting of the Judges of the Orphans' Court for Queen Anne's county, last Tuesday, Charles Edgar Smith, of Church Hill, was awarded the scholarship to Washington College. Mr. Smith was one of the graduates this year at Church Hill High School and was honor man of his class. He is a son of Mr. and Mrs. C. Edgar Smith, of Church Hill.

Pioneers Of The Tomato Industry In Maryland Built More Wisely Than They Knew.

The tomato has a story equally as interesting, and the fact that the tomato will build up tissues and remake bodies is a factor which the tobacco pageant could not equal. The laboratories have discovered some wonderful things regarding tomatoes, and these things should be familiar to all growers and consumers.

Five points should be memorized:

Tomatoes are richest of all foods in vitamins.

Tomatoes are the most wonderful of blood cleansers.

Tomatoes are the richest of all vegetables in natural health acids which keep the stomach and intestines in order.

Tomatoes are diuretics, washing away poisons that cause disease.

Tomatoes are prescribed by physicians for Bright's disease and diabetes.

Charles Q. Snyder, one of the best known residents of Centreville, is in Maryland General Hospital where he underwent a serious operation.

Three bids are now in for the Chestertown postoffice, after the expiration of the lease August 1: The present location, in the Lyceum Building where the office has been located for fifteen years, this building to be enlarged and remodeled; the lot next to the Voshell House; and the lot upon which Jack Clendaniel's garage stood, but which burned, located near the depot, owned by C. N. Satterleld.

In loving memory of our dear mother, Mrs. Harriett R. Satterfield, who we laid to rest five years ago July 14th, 1919. May the sweet memory of dear mother always linger near us.

Her Loving Daughter, Bessie.

No Car Like It!

42 horsepower! 50 miles and more an hour—hour after hour—without over-heating—without loss of power—without carbon cleaning!

And at the end of a long sustained high speed, your motor will be cooler, will need less water than any similar sized poppet-valve engine.

This engine's power curve keeps climbing *up* while the power of a poppet-valve car is dropping off. Furthermore, the Willys-Knight is entirely free from those engine repairs which make up 50% of the upkeep cost of practically all poppet-valve cars. It has no cams—no springs—to get out of order. A car you can keep season after season. Take a ride today.
