

HOPE H. BARROLL'S LIFE

Hope H. Barroll was born in Chestertown, August 6, 1860. His ancestors were English people who for many generations had been seated in Byford and Mansell Lacy Parishes, Herefordshire, England, as will appear by Rev. C. J. Robinson's "Mansions and Manors of Herefordshire." In 1760 the Rev. William Barroll, who was a descendant of Col. James Barroll, of Cannon Frome, and a graduate of St. John's College, Cambridge, at the earnest solicitation of his venerable uncle, the Rev. Hugh Jones, came to Maryland and succeeded him as rector of St. Stephen's Church, North Sasfras Parish, in Cecil County. He continued as rector of this parish until 1777, when being unwilling to take the oath of allegiance, he was deprived of his living. In 1761 he married Ann, daughter of Alexander Williamson, of Cecil County, and three sons were born of their union: William, Richard and James. Of these three sons, William was admitted to the bar in 1788 settled in Chestertown, where he became a prominent and successful lawyer and one of the largest land holders in Kent. He married Lucretia, daughter of James Edmondson, of Talbot county. They were the parents of one son, James Edmondson Barroll, who was born in Chestertown, in Kent county, in 1789. He was educated at Yale and afterwards read law in Chestertown, where he was admitted to the bar in 1811. In his native place he engaged actively in practice until 1850, meanwhile building up an enviable reputation in his profession for integrity and ability. His marriage united him with Hen-

rietta Jane Hackett, whose grandfather, Gunning S. Bedford, of Delaware, was a member of the Continental Congress of 1776. They became the parents of six daughters and two sons, of whom only one left children, he being John Leeds, father of our subject.

John Leeds Barroll was born in 1830 and graduated from St. Mary's College, Baltimore, in 1849. He was admitted to the bar in 1851 and from 1855 to 1859 he held the office of State's attorney. In religious belief he was an Episcopalian and he died in 1866.

The youngest son, Morris Keene Barroll, was born December 31, 1866, and graduated from West Point in 1889.

Hope Horsey Barroll was educated at St. John's College, Annapolis, and Washington College, Chestertown, from the latter of which he graduated in 1878. He read law under Hon. James Alfred Pearce and at the University of Virginia, was admitted to the bar in 1883, and almost immediately was recognized as one of the leading members of the bar in Kent. He was a public spirited citizen, ready at all times to contribute his means and time toward the promotion of all enterprises calculated to advance the material interests of his native county and State. He was one of the promoters and organizers of the Second National Bank of Chestertown, now Third National Bank, was one of its largest stockholders, and at one time President. He was also one of the members of governors

of Washington College. Mr. Barroll is said to have had one of the largest and most lucrative practices in the State of Maryland, and his constant and zealous attention to business was attested by his large and ever-growing clientele. Active in the Democratic party, he was however, not an office-seeker, but steadily avoided public positions. February 9, 1888, he married Margaret Spencer Wethered, daughter of John L. Wethered, of Kent county. They were identified with the Episcopal Church and the parents of four sons: Lewin Wethered, Morris Keene Hopewell Horsey and John Wethered.

SPECIAL FORMATION NOTICE

Firestone

Double the Mileage at Half the Cost

Only a few years ago a 32 x 4 cord tire listed over \$50.00. Today, you can buy the highest quality 32 x 4 tire—a Firestone Gum-Dipped Cord—for about \$26.00.

Last spring crude rubber cord tire makers around 40 cents a pound. Today, it is over 90 cents a pound.

It was not so long ago that 7,500 miles represented the average life of a cord tire, while today, 15,000 miles—and more—is only the usual performance for a Firestone Gum-Dipped Cord.

Due to large, concentrated production, specialized machinery and simplified factory methods, together with economical distribution, Firestone is able to keep tire prices low—no matter where the price of crude rubber goes.

And, because of special Firestone processes, chief among which is Gum-Dipping, motorists are today getting thousands of extra miles by using Gum-Dipped Cords.

Gum-Dipping is an exclusive method used by Firestone. It is an extra process, carried out in special Gum-Dipping plants, after which the cords are put through the usual calendaring machines. Gum-Dipping insulates and impregnates every fiber of every cord with rubber, and practically eliminates internal friction and heat, and builds strength and endurance into the tire.

In the day-in and day-out service of taxicabs, buses and trucks—on the cars of hundreds of thousands of motorists everywhere—Gum-Dipped Cords are giving unheard-of mileage, dependability and satisfaction.

Get ready for the coming months of slippery pavements and bad roads. Assure yourself of greater safety, comfort and economy by equipping now with Firestone Full-Size Gum-Dipped Balloons.
