Why Worry With Coal

for your furnace with its uncertain heat, soot, ashes and constant work and bother, when you can have a satisfactory oil burner installed complete for less than \$200.00. An oil burner for heating is one of the most essential of all modern home conveniences.

We have heated our large frame house for the past two years with an oil burner in a steam boiler with perfect satisfaction. The owners of ten other homes I installed burners like ours the same fall are all enthusiastic about oil burners, and my wife says she would not take a thousand dollars for ours if she could not get another like it. She never has a bother with the furnace when I am away for a day or more or worry about having plenty of heat all the time. It is practically noiseless and the oil is very little if any more expensive to use than coal. No janitor is needed to tend the furnace.

I can install one for you and guarantee it to give you heating satisfaction if, after an examination, I find your conditions suitable for oil heating. Phone or write me if interested, giving size of house, make of furnace and average amount of coal used in a season, and I will help you to secure satisfactory heat if possible.

The hidden comfort of costly homes

For years owners of costly homes have enjoyed a comfort others have been obliged to do without—a cozy warmth in winter, a pleasant coolness in summer, and restful quiet.

The secret? It is insulation—heat-insulation. Hitherto it has represented a cost prohibitive for most home builders. Few have enjoyed the comfort it gives to homes.

But now even the simplest home can have it. Now Celotex Insulating Lumber makes possible a completely insulated house practically without extra cost.

Let us tell you how Celotex will reduce your fuel bills approximately one-third and give your home a new degree of all-year comfort. Just phone us.
