When winter's snow is falling outside—and the wind roars through the trees—when the friendly logs blaze up in the fireplace
—have a Camel!

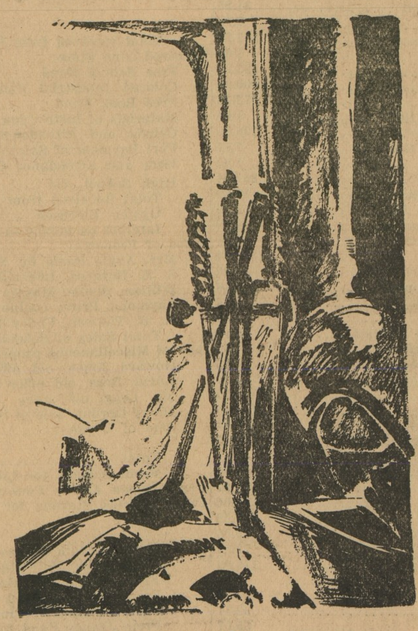

WHEN it's a winter night and the day that was busy is done. And outside the snow is driving through the trees before the wind. When, inside, the crackling logs catch fire and burst into flames above the hearth—*have a Camel!*

For Camel is the tried and trusted friend of millions of experienced smokers. Whether your returning steps bring you home tired or jubilant, no sweeter, more mellow fragrance ever came to you from a cigarette. There's not a cigaretty after-taste, not a tired taste in a whole county full of Camels. Only mild and mellow flavor, deep-down contentment in your home or any home where Camels are lighted.

So this night, before your roaring logs of oak or hickory—*have a Camel.* Open up the famous package of Camels and know the fragrance, the contentment that brings happiness to millions. Put a Camel between you and a light and taste the mellowest, most delectable blend ever made into a cigarette.

Have a Camel!

No other cigarette in the world is like Camels. Camels contain the choicest Turkish and domestic tobaccos. The Camel blend is the triumph of expert blenders. Even the Camel cigarette paper is the finest—made especially in France. Into this one brand of cigarettes is concentrated the experience and skill of the largest tobacco organization in the world.

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price.

DAIRY FACTS

IMPROVEMENT OF DAIRY COW

Department of Agriculture Has Six High-Producing Animals on Its Farm at Beltsville.

(Prepared by the United States Department of Agriculture.)

The improvement of dairy cows means a great deal more than increased profits to the dairyman. It means cheaper food and more milk, the best bone and muscle maker for children. What this improvement means is brought out forcefully by a poster prepared by the United States Department of Agriculture and sent free to interested persons.

An ordinary cow or scrub produces only enough milk to feed five children a quart a day, while a good cow yields enough to give 20 children a quart a day. The supercow, and there are more and more of them in this class each year, gives enough milk so that a small herd of them might supply this quantity to all the small children in a small town.

A High-Producing Holstein.

On its farm at Beltsville, Md., the department has six cows, the result of its breeding work, that have produced an average of more than 22,000 pounds of milk in 365 days. This little herd of six big producers yields enough milk to provide 170 children a quart a day. One of them could supply nearly 30 children, or six times as many as the ordinary cow could take care of.

Good breeding, first, and good feeding, second, have made the difference.

MAKE COW RATION TEMPTING

Animal Will Not Do Well on Food That Is Not Palatable—Avoid Any Sudden Change.

The good dairy ration must be attractive. A cow is a self-respecting sort of animal and she likes palatable food. In fact, a cow will not do well on food that isn't palatable, and it should be remembered that the condition of the food has the most to do with its palatability. Moldy grains or roughages do not appeal to the appetite of the cow, and consequently are unsatisfactory. Thus the unsatisfactory feed, no matter if it does contain the proper elements, may cause a reduction in the milk supply due to the cow's unwillingness to eat a plenty to keep up a good flow of milk.

At the same time it must be recognized that it is not a wise idea to change a ration suddenly in order to make it better. A cow is a pretty delicate sort of a milk-producing machine and, especially if she is a large producer, sudden changes in the food are quite likely to upset her in one way or another, and the result will be a loss of milk.

KEEP FEED UTENSILS CLEAN

Average Farmer Is Liable to Grow Little Careless About Pails in Summer.

Wide-awake dairymen realize the importance of keeping calf feeding utensils scrupulously clean at all seasons of the year. The average farmer, however, may grow a little careless about the calf pail, especially during the warm summer months. These pails should be of tin or galvanized iron, never of wood, and should not be allowed to get rusty or battered. They should be thoroughly washed, rinsed and sterilized after use, and kept in a clean place. Never use calf pails for feeding hogs, or live stock other than calves.

ESSENTIALS FOR DAIRY HERD

Cows and Young Animals Should Be Provided With Plenty of Pure Water and Shade.

Provide plenty of shade and cool, pure water for the cows and young animals. Spray cows at milking time to keep off flies. Look out for sour milk and cream. Bacteria and warmth cause milk to sour. The modern way to spell bacteria is d-i-r-t. Keep it out of the milk, thoroughly wash and scald all milk utensils. Keep the milk or cream cool, 50 degrees or lower if possible, and it will stay sweet for several days.

Wisconsin in Lead.

Wisconsin now leads in the number of accredited tuberculin-free cattle with 36,183 head. Minnesota is second with nearly 34,000 head.

Metal Milk Utensils.

Milk utensils for farm use should be made of metal and have all joints smoothly soldered. Never allow them to become rusty or rough inside.

Never Mix Milk.

Never mix fresh, warm milk with that which has been cooled.

Relics of Past Age

Most English towns have lost their walls and city gates. York and Chester, however, still retain them. Many English castles, abbeys and colleges still have their medieval barriers.

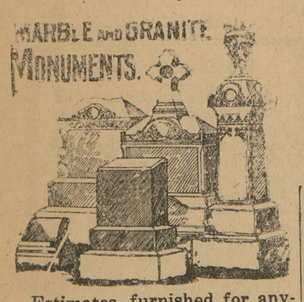

Family of Freaks

A family of women without fingernails or toenails was discovered in Italy recently by a scientist. For three generations no woman in the family has had a full-fledged finger or toenail. In every other way the women are normal and healthy.

Nothing Beats Good Old Epsom Salts

Now supplied in Tablet Form and Sugar Coated—Called Dill's Epso-Tabs

Everyone ought to get the wonderful cleansing benefits of Epsom Salts at regular intervals. The trouble has always been that only a few could take them without getting sick and nauseated.

Now science has come to the rescue and perfected a sugar coated tablet of Epsom Salts with a special coating of Salol—the greatest intestinal antiseptic in all medicine. Druggists and dealers everywhere are being supplied with this new tablet as fast as possible.

To insure getting the genuine Salol coated Epsom Salts compound tablet—specify Dill's Epso-Tabs. All dealers dispense a large box for 25 cents. New fangled and habit forming laxatives will have to go now. Activate your liver—cleanse the blood and intestinal tract with Dill's Epso-Tabs. The Dill Company, Norristown, Pa.

IS YOUR BREATH BAD?

A few drops of Goff's Bitters before eating settles your upset stomach, which is the cause of bad breath. Goff's Bitters give immediate relief for gas, heartburn, pressing on stomach, and bad taste in mouth. From Mr. J. E. Gladding, Horntown, Va.: "My stomach would not digest anything and I lost many pounds in weight. Finally I gave up the doctor and used your Herb Bitters. They completely restored my health and I now weigh as much as I ever did."

SPEND MILLIONS TO EXTEND LONG DISTANCE LINES

A. T. & T. Co.'s Plant Additions For 1925 Call For Outlay Of $19,000,000.

In order to take care of the increasing use of the Long Distance telephone lines and to provide adequate service, the Long Lines of the Bell System during 1925 will expend the sum of $19,000,000 in plant and additions. Construction work will be carried on in forty-one states.

Toll cable work makes up a large part of this construction program. The sum of $9,500,000 will be expended in this way. This will provide for the completion of cable work now under way between Cleveland and South Bend., Ind., the final section of the New York-Chicago cable which it is expected will be put into operation some time this year. It also provides for cable work on the New York-Buffalo route from Catskill through Albany and Schenectady towards Utica; a second cable between Cuyahoga Falls and Newburgh, O., and the Chicago-Terre Haute cable. Toll cable will also be installed during 1925 from St. Louis to Peoria via Alton and Springfield and, at a later date, will be extended to Chicago.

The aerial open wire projects for the year, including new pole lines, will amount to $1,800,000 and will include the extension of the southern transcontinental route from El Paso to New Orleans via Dallas.

Other building and equipment work, costing $4,000,000, and line work not included in the aerial wire and cable projects amounting to $3,200,000, form a further part of the construction program for 1925 which will be larger than any the Long Lines Department of the American Telephone and Telegraph Company has hitherto undertaken. Last year plant additions costing approximately $17,500,000 were made.

C. & P. TO SPEND $61,650,000 FOR NEW PLANT

Make Big Gain In Telephones

Additions to telephone plant will cost $61,650,000.

The Chesapeake and Potomac Telephone Company will spend a large sum, increasing its plant facilities during the next five years in the District of Columbia, Maryland, Virginia and West Virginia.

New buildings, switchboards, storage batteries, testing equipment and other central office apparatus are included in the authorization. Underground conduit and cable extensions, pole lines, aerial cable, telephones, and many other classes of equipment will be placed in service.

The Chesapeake and Potomac Telephone Company has added 10,611 telephones to its system in the first four months of this year. Compared to 1924 this was a 39 per cent. gain in a 33 1-3 per cent. period of time. The gain in telephones for the District of Columbia was 4,655; Virginia, 2,583; Maryland, 2,342, and West Virginia, 1,031.

A recent survey made by telephone engineers shows that The Telephone Company expects to have in operation 650,000 telephones by 1930. This is a gain of 150,000 stations in a five-year period. The Company now serves 504,098 telephones, which is more than double the number operated ten years ago.

On January 1, 1915, there were 215,000 telephones owned by the Company in the District of Columbia, Maryland, Virginia and West Virginia. By 1920 this number had increased to 350,000 telephones. During this five-year period several thousand telephones were taken over by the Chesapeake and Potomac Telephone Company in northern West Virginia, which had previously been operated by an associated Bell Company.
