Princess D, owned and driven by J. P. Zebley, of Wilmington, won the free-for-all stake at Doylestown, Pa., on Saturday from a field of six high class pacers. The mare was in fine form and won with ease in two straight heats, in the fine time of 2.14 and 2.14½ for each of the miles. Mr. Zebley and others of her admirers were well pleased with Princess D.'s performance and a great season is predicted for her. She will make her first start in the Delmarva circuit at Harrington next week.

Two Worcester young men, Wm. Hickman and Curt Gordy, are playing stellar roles on the Fort Pierce, Florida, baseball team. In a recent game Hickman, according to a news dispatch, performed like DazzyVance, the speed and strik-out king, causing ten batsmen to whiff the air, and holding his opponents to four hits. Gordy knocked out a home run in Babe Ruth's most approved style. Two men may not be equal to nine, but with two Worcester Countians performing such feats as did Hickman and Gordy, it is no wonder that Fort Pierce won in a walk—2 to 0.

For the third year in succession the farmers are about ready to ship green tomatoes to the northern markets from Talbot county. The first picking will be received at the Central Packing House, Talbot Fruits, Inc., Monday and Tuesday of next week. There is one thing that is conclusive. Each year the growers learn something new, and eventually they will have experience enough to grow the fruit at the right time to command a big price.

McCORMICK-DEERING MANURE SPREADERS

Let's Put Back
what we take from the soil

MEN who make good money at farming are very careful to keep their soil fertile and rich. They realize that there are poor years and good years in farming but that the man who puts manure on his fields in the right way will reap big profits.

The McCormick-Deering Manure Spreader is one of the most valuable machines on the farm. It increases yields, pays for itself in a hurry and goes on building bank accounts.

It spreads smoothy and evenly, putting on just as light or just as heavy a coat as you want. The pitch-fork method of spreading cannot equal the yields that follow the McCormick-Deering. That has been proved many times. Besides, hand spreading is hard work; the McCormick-Deering saves many hours of time and much hard labor. Its good strong beaters tear the manure rapidly and spread it well beyond the wheels.
