UPSHUR FOR CONGRESS

FRANKLIN UPSHUR

OF WORCESTER COUNTY

Candidate for Nomination on Democratic ticket in the Primaries September 14th, 1926

Mr. Upshur is a regular Democrat of old school. He is a Lawyer. He was a member of the Maryland Legislature in 1924. He is President of the School Board of his county, serving without pay.. He was educated at John Hopkins and Princeton Universities and the University of Maryland School of Law, and the still greater and more difficult University of Experience. He is a progresive citizen, who by a long and close study of public affairs, is well qualified to represent this District in a Congress of the United States.

THE LIQUOR PROBLEM

With a life-long record of temperate habits, Mr. Upshur stands for modification of the 18th Amendent and the Volstead Law as a means of truer temperance and in the interest of the morals of our boys and girls and the old-time respect for law and self respect that our fathers and mothers had and which we, withregret, are fast losing.

Mr. Upshur is against the return of the saloon forever. He favors a system of liquor regulation which has been adopted by the Province of Quebec in Canada and which has come to be known, thruout the world as the Quebec Plan, recognized by all fair minded students of this problem, to be the best plan in operation anywhere in the world today.

THE QUEBEC PLAN

In 1921 the Province of Quebec abandoned their Prohibition law, which, like ours, has shown its failure to prohibit. The plan consists in a well-regulated Government Dispensary, where one can buy a limited quantity of pure liquor at a reasonable price within restricted hours, the Dispensary resembling on the interior a bank building or post office, where the purchaser steps up to the window, states his wants, receives it in a sealed package, which he is instructed not to open on the premises or streets.

This removes the liquor question from people's minds. All elements of the population are satisfied with the plan and the liquor question is thus removed from politics. The effect has been a marked decrease in drunkeness in the Province. The plan also has a local option feature so that any community can vote not to have a dispensary located within its boundaries, in which case the citizens would have to send direct to a Government liquor commission for what they want.

The above plan works admirably there and would work admirably here and give us a real solution to a most vexing national problem.

SQUARE DEAL FOR THE FARMERS

Mr. Upshur charges his opponent, who has already held three terms in Congress, with the failure to properly look after the interest of the farmers and tomato growers of this District, when the present incumbent representative in Congress sat by and without a protest, saw the Republican Party exact a high tariff bill to make prices high for things they manufactured in the North to sell to us and drop tariff on canned tomatoes which is one of our leading industries and our one agricultural industry. The result was that the country has been flooded with Italian and other foreign canned tomatoes to the number of 87 million dozen cans last year and fully as much this year and the farmer is, on this acount, receiving $2 less per ton for his tomatoes this year than he otherwise would be getting.

Mr. Goldsborough was polite to the Canners Association and introduced them around to the Republican members of the Congress who might help them to get the tariff restored, but he declined himself to advocate a return to the tariff to where it had been under the Wilson administration (Democratic) on the grounds that he was a low tariff Democrat. Mr. Upshur is a low tariff Democrat, but tariff should be low for all or else high for all, for he believes in that paramount Democratic doctrine, equality for all and special privilege to none.

Mr. Upshur favors a more just compensation to farmers whose cattle are killed by the Government on account of tuberculosis troubles.

Mr. Upshur stands for States Rights and is against the tendency of the National Government to interfere more and more in matters which should be left to the jurisdiction of the States themselves so that we will not, in our intimate affairs, be ruled by some clerks in a government bureau in Washington, D. C.

Mr. Upshur deserves and invites the vote of every man and woman entitled to vote in the Democratic Primaries next Tuesday.
