ICE BOX BISCUITS

There has been a lot o ftalk the last few years about whether baking powder ought to 'act' in cold water or not. Some say it should, if it's good baking powder, and others say it shouldn't.

Mr. F. Simpkins, the Snow King representative in this terrieary, argues this way:

"Do you bake your biscuits in an ice box or in an over? If you bake them in an ice box, then you've got to have baking powder that will act in cold water. But if you bake them in an oven, you want baking powder that will wait for oven heat before it will act.

"If it acts while the dough is being mixed, or while it is standing, then just that much of its leavening power is wasted when you do put it in the oven."

"Which is better, a gun that shoots when you pull the trigger or one that goes off half-cocked before you get your sight set?"
