Chamber Of Commerce Endorse The Bay Bridge

At a meeting of the Board of Directors of the Kent County Chamber of Commerce held at the headquarters in Chestertown on January 7, 1927, the following resolution was adopted:

That the Kent County Chamber of Commerce strongly approves and offers its fullest co-operation to the Chesapeake Bay Bridge Company in their effort to secure authority for the construction of the proposed bridge from a point in Baltimore County south of Back River to a point in Kent County.

We believe this to be an improvement which will render the greatest benefit to all counties on the Delmarva Peninsula and should merit the co-operation and aid of the Federal Government, the State Government and citizens on both sides of Chesapeake Bay for by its completion the State of Maryland will be more united commercially and in other ways than ever before in its history.

We urge our Representatives in Congress to use every influence with the officials of the War Department to remove any obstacles to the proposed bridge which may arise by reason of the location of the Government Proving Grounds at Aberdeen. We feel that the Arsenal being situated in such a thickly populated territory and bordering on the most magnificent inland body of water in the world should be operated in such manner that it will in no way interfere with the construction and operation of the bridge.

We also urge His Honor, Governor Albert C. Ritchie, Hon. John N Mackall, Chairman of the State Road Commission, the Baltimore Association of Commerce, Delmarva Association and all local Chambers of Commerce to give their support to the project.

MARION deK. SMITH, JR.,
W. B. COPPER,
R. HYNSON ROGERS,
Committee.

ANOTHER BRIDGE IS PROPOSED ACROSS THE CHESAPEAKE BAY

John N. Mackall, chairman of the State Roads Commission, Monday night said he was opposed to the erection of a bridge across the Chesapeake Bay between Sandy Point and Kent Island, unless the span "was sufficiently elevated to prevent interference with navigation."

Mr. Mackall was asked to comment on the plans disclosed yesterday when Clarence Soper, real estate broker, filed an application with the Public Service Commission for permission to build a bridge between the two points, which are south of the mouth of the Patapsco river.

Mr. Soper refered all inquiries to John L. G. Lee, attorney, who declined to name his principals.

Little could be learned about this second group except that it has no connection with the Chesaveake Bay Bridge Company, incorporated more that a month ago to erect a bridge from a point north of Bay Shore to a point about midway between Tolchester Beach and Rock Hall.

Mr. Mackall pointed out that although a bridge between Sandy Point, in AnneArundel county, and Kent Island, in Queee Anne's county was physically possible, he regarded the scheme as economically unsound.

Any plans for a highway bridge across the bay must be approved by Mr. Mackall, as the State would have control over toll rates and would have the option of buying the bridge. Mr. Mackall said unofficially several weeks ago that the plans for the Bay Shore-Rock Hall bridge met with his approval.

"As desirable and necessary as a bridge across the Chesapeake Bay is at this time, I feel that the port of Baltimore is of far greater importance not only to the city of Baltimore but to the whole State of Maryland," Mr. Mackall declared.

"Much of our future prosperity depends on the development of our port. Baltimore cannot enjoy prosperity unless the whole State is prosperous, and the State as a whole cannot make progress unless Baltimore develops.

"For that reason I am opposed to the placing of any barrier across the bay at a point where it would interfere with navigation bound to or from Baltimore. Large ocean liners now come here and within a few years the number will be greatly increased.

"To eliminate interference with navigation a bridge between Sandy Point and Kent Island would have to have a span at least 1,500 feet long which at all times would be at least 175 feet above the water.

"The problem could not be solved by means of draws. During the day the volume of navigation is to great that draws would be elevated practically constantly. Consequently, vehicular traffic would suffer long delays. The delaying of shipping is out of the question.

"The carrying of the bridge 175 feet above the water for 1,500 feet would be a costly proposition, particularly since the depth of the water at the point where this elevation would be necessary approximates ninety-five feet. The saving in total distance of the bridge would not equalize this advantage."

Mr. Mackall asserted that the new group had not informed him of its plans. He also doubted whether the War Department would permit the erection of a bridge at the proposed site.

Except for a narrow stretch, the proposed Bay Shore-Rock Hall bridge would span water not more than 20 feet deep. For a narrow stretch near the Eastern Shore the water approximates a fifty-foot depth. This bridge would be eight miles long. The proposed Sandy Point-Kent Island bridge would be about four miles long.

NOTICE

The Directors of the Chestertown Bank of Maryland, beginning on Jan. 3rd, 1927, will meet until further notice on Mondays at ten o'clock a. m. By order of Board.
