

How to read Percentages

Were Dodge Brothers to sell 100 motor cars one year and 200 motor cars the next, they could truthfully announce that their sales had increased 100% in a single year. Yet they would only have sold 300 motor cars in all.

In other words, PERCENTAGE of annual gain is not conclusive. The NUMBER of cars sold is the true test.

That Dodge Brothers sales in 1926 showed an increase of 27.6% over 1925 is not the MAJOR fact to consider—striking as it is.

But that Dodge Brothers sold 259,967 cars in 1925, and then in 1926 sold *331,764*—a gain of 71,797 sales in twelve months—tells a story of growth that stands out like a tower on the skyline of the industry.

Three hundred and thirty-one thousand buyers LAST year! Many more vital improvements added THIS year! No increase in price! Three powerful arguments for earnestly investigating this smart and sturdy product before deciding what to buy!

DODGE BROTHERS MOTOR CARS

Gloucester Pt., Va., July 8, 1926
"This year I tried 'AA Quality' Fertilizer for truck on my potato crop and grew the best crop of early potatoes I have ever grown in my 20 years of experience. Dry growing seasons and bad conditions generally cut the crop short, but I have never had a more uniform and such a perfect crop of potatoes under any conditions. I dug 216 bushels to the acre. There were no scabs or imperfections of any kind. You can rest assured I will continue to use your fertilizers."
—Jas. P. Ash

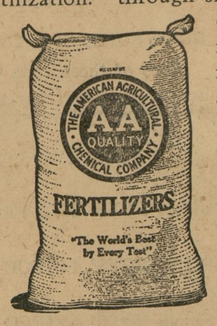

Albrightsville, Pa., Aug. 4, 1926
"I have specialized in the raising of potatoes for five years, and to my surprise this year I have had the best crop I ever raised. My crop averaged 426 bushels on 18 acres. I do not hesitate in saying I stand ready to challenge any potato grower in the state of Pennsylvania under the same conditions. My choice of fertilizer for future use is 'AA Quality' Fertilizers."
—Robert Getz

Is your fertilizer all going for potato tops rather than top-price tubers?

How many times have you seen row on row of beautiful potato plants that *seemed* to predict a big yield? But on digging, you found only a few in the hill. And these were small in size and poor in quality. Your crop had all gone up in the air—due to improper fertilization.

"AA Quality" Potato Fertilizers give an *even* development to the potato plant. They make both the feeding roots and the tops work together to produce the maximum number of fine-quality tubers. Their plant food elements are so formulated that they feed the growing crop *during the whole season.*

"AA Quality" Fertilizer formulas have been determined by leading soil and crop experts. Materials are scientifically prepared by processes perfected through sixty years of experience. Completely mixed, cured and remilled to give them an absolutely perfect mechanical condition.

Be sure that your fertilizers are going to make big, fine-quality tubers — bushels of them. Use "AA Quality" Fertilizers.

—oo—

With blood pouring from a wound in his right shoulder, Charles Harris, colored, was discovered running down High street late Saturday. He was taken in charge by some friends, who took him to the office of Dr. Copeland. It was disclosed that a five-inch knife thrust was the cause of his wound.

The wound, it was alleged, was inflicted by Roosevelt Maith, colored, 21 years, of this place, following an argument in which two colored girls were engaged. Maith was arrested by Sheriff Hadaway and is now in Kent county jail awaiting a hearing before Magistrate Collins. In the adjoining cell is Charles Holley, colored, serving a six-months' sentence, charged with having shot at Maith six months ago following a big crap game.
