Mr. and Mrs. Samuel Walls entertained friends from Wilmington on Sunday.

### WORK BOAT RACES

Kent county boatmen will be glad to know that the date for the Annual Workboat Races has been announced by the Chesapeake Bay Championship Workboat Races Association. This year the races will be held off Oxford, in Talbot county, on Saturday, June 25, and according to information in our possession, Kent and tidewater counties will be well represented.

The races, which have been regarded as the chief event of the tidewater sections of the Chesapeake Bay, will be started at 9 a. m., so as to take the best advantage of wind conditions at that season of the year.

### *Map of Silver*

A silver map of the world, exhibited at the Royal Geographical society, London, is the best of four such maps in existence. It is a thin, circular silver plate, and commemorates Drake's voyage 'round the world, 1577-1580.

### *A Definition*

Our idea of a stingy person is the fat lady who hopes she has gained weight so that she will get her money's worth out of the scales when she drops her penny in.—Dallas News.

HEARN WITH ETHYL ETHYL GASOLINE CORPORATION NEW YORK, U.S.A. GASOLINE

Announcing

# HEARN

## ETHYL GASOLINE

IT answers the demand for a better fuel for present day automobiles. In its economic aspects Ethyl Gasoline is a fuel which operates without "knocking" in engines of higher compression, thereby making possible smaller motors, delivering more power with less fuel consumption.

It is our regular Hearn Gasoline plus Ethyl Brand of Anti-knock Compound—the ingredient developed by the General Motors Research Laboratories.

You will notice an improvement in the operation of your car with the first tank full.

Give this new fuel a trial.

*NOTICE· Dilution of Ethyl Gasoline with other fuels decreases its effectiveness. Therefore, it is important to use Ethyl Gasoline exclusively. Remember also that no motor fuel will grind valves. While Ethyl Gasoline makes carbon or agency of service you must keep your valves in good condition.*

## HEARN OIL COMPANY

### *Thermometer for Fishermen*

The wise fisherman of the future will test the temperature of the water in which he casts his lines. The biological board of Canada, after an extensive survey, has found that haddock and cod especially are very particular about temperature, says Popular Science Monthly. The cod will not stay where the water is freezing, and for him 50 degrees is unbearably hot. Between 40 and 45 degrees is about right, and if fishermen will fish where such temperature prevails it is claimed they can scoop cod up wholesale. Haddock prefer water about five degrees warmer.

The board urges fishermen to use deep-sea thermometers and not waste time where there are no fish.

### *North and South on Maps*

In geographical drawing, the north is always drawn as being up and the south down. It is a practice established merely by long custom. No scientific principle or orientation makes this arrangement essential. The majority of early geographers adopted this scheme and it was found convenient for those who came later to follow it. A few old maps have the east at the top of the page and west at the bottom, but such cases are rare.

### *Where She Ranked*

"Am I the only woman you ever loved?"

"Oh, no," he answered, promptly; "you are the sixth."

"The sixth!" she exclaimed, suddenly relieving his shoulder of the weight of her head.

"Yes," he said, coldly, "there were five before you—my mother, an aunt, and three sisters."

And thereafter she endeavored to be more specific when she asked questions.

### *Phone Pests in Mexico*

Parrots and monkeys are causing the telephone company in parts of Mexico great trouble and expense. After dark large numbers of these tree dwellers appropriate the wires that traverse the thinly settled parts of the country and play on them to such an extent that the service is badly crippled at times. Their weight has caused some lines to snap, with the result that miles of heavier wire have had to be strung.

KENT NEWS $1.50 PER YEAR.
