BETTERTON

A large crowd enjoyed the play which was given by Still Pond folks for the benefit of the Epworth League in the school auditorium last Friday evening.

Mr. and Mrs. James T. Crew have moved into the Betterton Hotel after having spent the winter months in the bungalow.

Henry Price, of the Ericsson Line, has been spending a few days with his family here.

Mrs. Friedman and daughters have returned to their home here after spending the winter in Baltimore.

Mrs. M. V. Turner had the misfortune to fall down stairs while visiting her son, George, near Wilmington. Mrs. Turner was paying a visit to her son and intending to attend the session of Wilmington Conference. Though severely shaken up there were no serious injuries.

The Women's Auxiliary of St. John's Church held their April meeting at the home of Mrs. John Myers on Wednesday afternoon.

Mrs. Harold Crew and small daughter, of North East, spent last week with Mr. and Mrs. Wm. Crew.

Richard Moore, of Philadelphia, is spending the Easter holiday with his aunt, Mrs. Elwood Bramble.

The Womens Club held an all day session at the school on Thursday of last week.

Mr. and Mrs. Leroy Owens and son, of Middleown, were week-end guests of his parents, Mr. and Mrs. Harry Owens.

Allie Myers has been very sick from an infection of the mouth.

Mrs. Oscar Wilmer and son, of Lansdowne, Pa., are spending the week with her parents, Mr. and Mrs. Lotan Rasin.

Some of the members of the Ladies' Aid Society served luncheon at the Stokes' sale the past Tuesday.

A change in the schedule of St. Johns Church will take place next Sunday (Easter). The members of I. U. Church, who have been attending the chapel during the winter will return to their regular service. The hour at St. John's will be 7.30 p. m. with the exception of every fourth Sunday when service will be held at 9 a. m.

4H CLUB BOYS HOLD BANQUET

Virginia Lee Dulin, A 11-Year-Old Owner Of A Fine Calf, Surprises All By Her Talk—Prominent Young Breeders And Owners Of Cattle Make Addresses At Meeting — Mr. Derrick Deserves Praise for His Work.

Chestertown High School auditorium was the centre of attraction Friday night when the 4-H Calf Club of Kent county held their fifth annual banquet. These four H.'s stand for head, hand, heart and health.

Covers were laid for one hundred including about 30 Calf Club members. The dinner was served by the women of St. James' M. P. Church in a most delectable manner.

Walter T. Morris presided at the after dinner program with adeptness and grace.

Short talks were made on various topics by Virginia Lee Duling, Herschel Carroll, Franklin Moffett, Marion Sutton, Norman Sutton, Wilbur H. Morris, Jr., Norman Pennington and Stanley B. Sutton, members of the club. The 11-year-old Virginia Lee Dulin captured the audience by he rdescription of how she was raising a calf.

Other speakers were Louise McL Merryman, nationally-known Guernsey breeder; E. G. Jenkins, State Club Agent, and Fred. G. Usilton, on behalf of the banks of Chestertown.

Music was furnished during the dinner by the Washington College Orchestra.

Scarcely any club in the State can boast of as many members of State and national reputation as this club.

There were seated around the tables Norman Pennington, owner and breeder of the State's champion dairy cow; Stanley B. Sutton, member of the national judging team which participated in the world's judging contest in London two years ago; his brother, Martin L. Sutton, a former member of the national cattle judging team and also a member of the national 4-H. poultry judging team which won high honors at the Madison Square judging contest in January; Walter T. Morris and Wilbur H. Morris, Jr., members of one or more county and State judging teams, and a number of boys who have won blue ribbons on exhibits of their calves at the State Fair held at Timonium.

County Agent H. B. Derrick has done a fine work in organizing and encouraging these boys in dairying This Club is one of the most promising bodies in Kent and is to be congratulated upon the work they are doing.

Eminent Domain

Eminent domain is the right of a government to take private property for public uses without the owner's permission, provided just compensation is given. In this manner land is obtained for parks, post offices, forts and sites used for other public purposes. Governments often confer the right of eminent domain on railroad, telephone and other private companies engaged in callings generally regarded as essential to the public welfare. Eminent domain is based on the principle that an individual's private interests should not be permitted to stand in the way of the interests of the whole community in which he lives.—Exchange.

Tough Job for Mr. Fish

The palm for sacrificial parenthood should go to a certain species of catfish. Although the male of this species (Arius-Galeichthys) is so constructed that he needs an unusually large amount of food and though he has the accompanying voracious appetite to satisfy it, he fills his mouth with the eggs laid by his mate and carries them until the eggs are hatched. The eggs of this species are unusually large, too, says a scientist writing in the Forum, some of them measuring 17 to 18 millimeters in diameter, so for a fish that reaches even his length of three to four feet, a spawning of such eggs makes a cumbersome mouthful.

Seems to Be Book Surplus

With 55 miles of books on its shelves, the British museum has to find places for 35,000 more each year, according to an article in Capper's Weekly. "To place new books and newspaper and periodical files, the museum has been building extra swinging tresses and supporting them on the cast iron framework of the dome," Capper's Weekly continues. "It has now warned that if more weight is placed on the dome the whole structure may be pulled down. What is the world going to do with its books?"

MILD?.. Yes! VERY MILD— AND YET THEY SATISFY

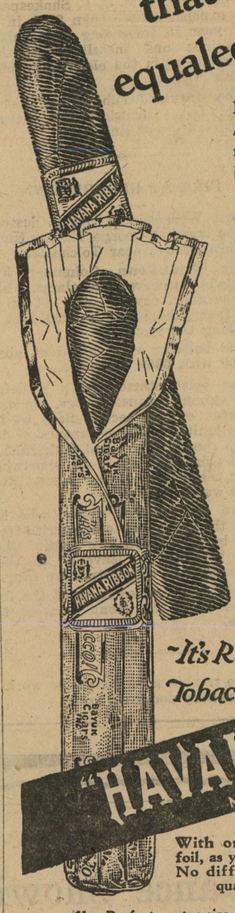

WE STATE it as our honest belief that the tobaccos used in Chesterfield cigarettes are of finer quality and hence of better taste than in any other cigarette at the price.

LIGGETT & MYERS TOBACCO CO.

CHESTERFIELD CIGARETTES

Any man with one nickel can now buy himself a ripe tobacco cigar that has never been equaled for the money

NO PERHAPS about it—no maybe—*Havana Ribbon* will revise every estimate you ever had of the cigar-purchasing power of a nickel. *Havana Ribbon* stands ready to prove that a five-cent cigar, made as Bayuk makes it, can be a really *good* cigar; that it *can* give you true, mild tobacco flavor without pungent bitterness or insipid flatness.

Here's the secret: *Havana Ribbon* contains no *under*-ripe top leaves of the tobacco plant. No *over*-ripe bottom leaves. But only fragrant *fully*-ripe middle leaves, age-mellowed and blended into a roll of completely satisfying smoke enjoyment.

Try *Havana Ribbon*. Shove a small five-cent piece across the nearest cigar counter and see how big it is coming back—in genuine cigar *value*.

"It's Ripe Tobacco!"

CROP RESULTS *prove the difference*

"ALMOST without exception," says a local merchant, "the farmers in this section who use 'AA QUALITY' Fertilizers get successful crops and bank substantial profits." Why? Because, year in year out, even under adverse growing conditions, "AA QUALITY" Fertilizers grow bigger, better, more profitable crops.

Read the letters at the right. Scores of other farmers in this and neighboring counties say the same thing. Larger yields, better quality, earlier maturity, extra profits—obtained with "AA QUALITY" Fertilizers.

Actual crop results prove that there *is* a decided difference in fertilizers of the same chemical analysis. Chemical analysis does not fully disclose the sources from which the plant-food elements were derived, neither does it indicate the physical condition of the fertilizer—two very important factors affecting the crop-producing power.

"AA QUALITY" Fertilizers produce more profit for every dollar invested in fertilizer because of the infinite care used in selecting the materials from which the plant-food elements are derived; because these famous formulas are based upon a thorough knowledge of crop and soil conditions. Backed by over 60 years of successful crop production. Any farmer will tell you that "AA QUALITY" goods are famous for their splendid mechanical condition.

Read these letters from successful growers. Then plan to increase your own profits in 1928; insist on getting "AA QUALITY" Fertilizers from your dealer for use on your farm this season.

FIVE PER CENT ABOVE MARKET PRICE . . . Mr. I. W. Peacock, Pocomoke City, Md., says: *"I planted 25 acres of early potatoes this spring, and used 'AA QUALITY' Fertilizer on the entire crop. I harvested for early market a crop which averaged 100 bbls. of prime potatoes to the acre, and sold them for about five per cent above market price. I have been using 'AA QUALITY' Fertilizers for several years, and have always found them very satisfactory. Mechanical condition is excellent, and they come in good strong bags. I expect to continue to use 'AA QUALITY.'"* —Sept. 1, 1927.

143 BARRELS PER ACRE . . . Mr. M. S. Scott, of Cape Charles, Northampton Co., Va., says: *"I used 'AA QUALITY' Fertilizer at a rate of 1,500 lbs. to the acre, and this, together with carefully prepared soil, good cultivation and excellent stand, produced one of the largest crops I know of, namely, 143 barrels to the acre. My crop matured early, and brought a good average price."*—July 15, 1927.

ADDITIONAL YIELD BRINGS PROFITS . . . Mr. J. J. White, of Metomkin, Accomac Co., Va., says: *"This year I used 2,000 lbs. of 'AA QUALITY' goods to the acre, and dug 130 barrels of potatoes. This averaged a fair market price, considering the glutted market this spring. However, the additional yield will offset the low price. My corn crop shows every sign of being an excellent one, on the same application of fertilizer."*—July 15, 1927.

ONE-EIGHTH ACRE YIELDS 5,000 LBS. OF CABBAGE . . . Mr. W. Howard Fleet, of Mathews, Mathews Co., Va., says: *"This spring I planted a small piece of ground in cabbage, using Homestead Fertilizer ('AA QUALITY') at the rate of 600 lbs. to the acre. The results have been unusual, as I have the largest and finest cabbage ever grown in Mathews Co., or any county in this section of the State. The approximate weight of cabbage on this piece of ground will be fully 5,000 lbs."* —October 25, 1927.

"AA QUALITY" FERTILIZERS

Sold under a Double Quality Guarantee

1st Guarantee on the *front* of each bag is one of the following famous old names that stand for a fertilizer made to meet the exact needs of your soil.

Bowker, Listers, Patapsco, A.A.C., Hess, Detrick, Alexandria, E. Frank Coe's, Zell's, Pocomoke, Sea Fowl

Two MIANUS Motors

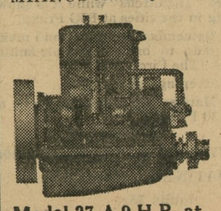

Especially Adapted For Work Boats

Model 416-A 20½ H.P. at 1400 R.P.M.

There are two new MIANUS Motors especially designed for crabbing, trawling and general work boat use.

There are MIANUS Models 27 A and 416-A. Both are equipped with the built-in reduction gear drive—and exclusive MIANUS feature.

Model 27-A 9 H.P. at 1400 R.P.M.

The silent herringbone reduction gears do away with vibration, permit running at low speed without strain, and enable these engines to swing a wheel used on engines of twice their horse power. All these features make for the long life and economical running of these important units.

Write us for further particulars about these and other models in the MIANUS line.

First at the get-away First on the straight-away

No car in the Victory price class can match the all around brilliance of Victory performance.

The Victory is first at the get-away and first on the straight-away—faster on the hills, faster in traffic—smoother on rough roads.

And accelerates as no other car at the price has EVER done: 5 to 25 miles in 7¼ seconds! 10 to 45 miles in 13½ seconds!

The public discovered all this even as the stop watch proved it.

More power per pound of car weight made it possible. Rugged Dodge construction made it practical. And the Victory's unusual design made it SAFE.

For the Victory gravity center is lower and there is no body overhang .... The chassis frame is the full width of the body—and the body sills are eliminated.

Exceptional charm of line and more headroom and seat width are further vital results of this unique construction.

Drive the car today and make your own comparisons!
