3 for $1.00

TURKISH TOWEL
20x40 heavy weight turkish towels. Assorted blue, rose and gold striped borders. Usually sold for 35c.
Each 19c

NOLAND
Chestertown, Maryland

BASEBALL CIRCUIT TO DISBAND AT ONCE

Directors of the Eastern Shore League, in session Tuesday, passed a motion to disband the league on account of poor attendance, effective at once. Easton, Parksley, Cambridge and Crisfield approved the motion, while Salisbury and Northampton (Cape Charles) voted against discontinuance. James A. McAllister, secretary, was instructed by J. Harry Rew, president, to notify M. H. Sexton and J. H. Farrell, president and secretary of the National Association of Professional Baseball Leagues, of the action. As a consequence, the seventy-eight players on the rosters of the six clubs tonight became free agents, as do also the umpires. The towns surrender their franchises and privileges.

The failure of the league came unexpectedly, although it had previously been rumored that several of the towns would have to quit unless attendance improved. A motion by Harvey Renshaw, Easton, to the effect that the wheel cease functioning next week was amended by President J. M. Chanler, of the Parksley club, to become operative Tuesday, and it was carried, 4 to 2.

Each of the clubs reported accumulated deficits of several thousand dollars from losses during this and previous seasons and the representatives of the four towns voting for discontinuance expressed themselves as being unable to visualize any chance of improvement this season due abnormal conditions on the peninsula.

Dr. W. H. Wright, Veterinary Specialist, of Elkton, Md., who has had charge of the Hog Cholera Work in the district composing of Baltimore, Harford, Cecil, Kent and Queen Anne Counties for the last six years, will be transferred on July 15th to the Zoological Division of the U. S. Bureau of Animal Industry. The posieion will be filled by Dr. H. E. Henderson, Who will maintain headquarters at Elkton and will take up his duties on July 16th. Dr. Henderson has made an enviable reputation as a veterinarian and it is believed that the State of Maryland has been fortunate in securing his services. As has been the policy in the past, Dr. Henderson will be pleased to make an investigation of all diseases among swine in the district as may be referred to him.

Character's Importance

The character which you are constructing is not your own. It is the building material out of which other generations will quarry stones for the temple of life. See to it, therefore, that it be granite and not shale.—Rev. A. J. Gordon, D. D.

IMPROVED AUTO DEPENDS ON GAS

Sunoco Producers See Modern Refining Mehtods Inevitable Through Industry.

Automobile designers must work hand in hand with the men who devote their lives to the improvement of fuels or all their hours of careful study and work have gone for naught. The designers have developed engines of increased compression, thereby gaining greater power on proportionately less fuel, but the extent to whichcompression can be raised or spark effect increased depends entirely on the quality of the gasoline.

The basic problem of the fuel producer has been the development of something which may be added to the gasoline to render it smooth acting in advanced types of engines. Addition of benzol or ethyl fiuid or two ways in which highpowered fuels can be made. Such methods, however, are only regarded by the refining industry as one step in the general line of progress.

California crude oil produces a better gasoline by old fashioned methods than almost any other crude in the United States, according to officials of the Sun Oil Company, but it is very poor practice for a refiner to confine himself to a particular crude.

Gasoline extracted from almost any crude oil by the old methods would knock violently during acceleration or hill climbing in a modern engine, whereas a gasoline made by the most up-to-date- methods will operate as smoothly and as powerful as may be desired.

Equipment for making the improved type of gas is much more complicated and somewhat more costly. Consequently, it will be some years before all gasoline produced is of modern type, but it is inevitable that the orders of supply and demand ultimately will cause the disappearance of premium-priced motor fuels.

When Sun Oil began the manufacture of gasoline a few years ago on a large scale it was not handicapped by heavy investment and was able to erect its modern refining plants with a minimum of scrapped machinery. Within two years plant facilities for the production of Blue Sunoco have been increased 500 per cent and plants to be completed this year will add another 100 per cent.

Colloquial

"Yankee dime" is a slang term used in some sections of the United States, particularly the South, to denote a kiss, just as "Dutch quarter" is used to mean a hug. In some sections "Quaker nickel" is employed in the same sense as "Yankee Dime."

YES

Dodge Brothers Standard Six is the fastest car, with the fastest pick-up, under a thousand dollars.

HOWEVER

That is only HALF the story. The IMPORTANT point is that this exceptional speed is made practical by Dodge ruggedness of chassis and body construction . . . . . .

OTHERS

Might succeed in building a car at this price with equal SPEED, but to do so successfully they would also have to build a car with equal STURDINESS.

AND

That is where Dodge Brothers, with years of experience in building a dependable low-cost product, are years ahead of the field . . .

YOU

Can buy the Standard Six knowing that it is not only the fastest car in its class but the sturdiest—and the one is every bit as important as the other.

$875
COUPE F.O.B. DETROIT

Is the price, and you will find our payment-plan one of the most liberal you have ever investigated. Drive the Standard—without obligation—today!

Rotes' Jewlery Store
VOSHELL HOUSE

They called her a soulless "gold-digger" but—

Do you remember the sensational breach of promise suit, a few years ago, by a humble flower-girl against her young millionaire lover and his wealthy mother? At the trial many ugly charges were hurled at the girl. She was called a "gold-digger," a blackmailer; a shameless creature who loved only money and the luxury money could buy.

But when, in a voice broken by sobs, she told her pitiful story, men hardened to sorrow wiped their eyes furtively—women in the court-room wept aloud.

Then came that dramatic and unlooked-for conclusion. An unexpected witness was called to the stand—and in ten words hurled into the tense silence of the crowded court-room a bombshell that reverberated to the ends of the earth.

Most people were stunned by the unexpected outcome of the trial. Even today few suspect the true history of events behind that tremendous drama of intrigue, suffering and deathless love.

But now the entire story has been told by the girl who was the central figure in that amazing drama. Told in words that will bring tears to your eyes—tears of joy, of sorrow, of understanding and sympathy.

Don't miss this throbbing narrative from life, "The No-Account Girl," in the August issue of True Story Magazine.

When you want publicity the KENT NEWS is ready to serve you.

It is not surprising

that this oil saves your motor for it's an oilier oil specially made to lubricate better and stand up to the last drop

How much do you spend for gasoline? How much for tires? When did your battery last have water? The "Standard" Motor Record will tell you. Ask your "Standard" Service Station or dealer for a free copy.

"STANDARD" MOTOR OIL

"Standard" Greases, Transmission Oil and Gear Compound are made with the same care as "Standard" motor fuels and motor oils.

STANDARD

Better Lubrication for a Longer Time

In his engine laboratory, a large truck manufacturer made a fifty-hour test to compare "Standard" Motor Oil with other oils under the same operating conditions.

"Standard" Motor Oil not only showed 5 per cent greater initial speed, but maintained this speed during the test.

With the other motor oils, the number of revolutions per minute at the end of the fifty hours was only half as great as at the beginning. This shows why in a modern, high speed motor "Standard" Motor Oil can be depended upon to provide a greater margin of safety.
