#### FLEAS HAVE RIVALS

IN TAME OYSTERS

The educated fleas have rivals, the trained oysters of Prof. W. E. A. Slaght, head of the psychology department of Cornell College, in Mt. Vernon, Iowa. Slaght declares that after a month's regular feeding on corn meal and water, some oysters which he packed in seaweed would jump over on their backs and open their mouths like hungry birds when meal time came. Jarring of the basement stair door, he says, caused the oysters to open their jaws and become attentive. Slaght admits his training process had one handicap—the oysters lived only five or six weeks.

Miss White, the county nurse, will be at the next meeting of the P. T. A. at Swan Creek School, Tuesday, February 5th, at 7:30 p. m.
