

Kent News

SATURDAY, MARCH 2, 1929

On Monday next, March 4th, Herbert Hoover will be inaugurated as President of the United States. Mr. Hoover will enter upon his duties as Chief Executive with the best wishes of all good citizens.

In another column will be found a report of the Good Roads Meeting held in Chestertown. The News cannot for a moment endorse the effort to bond this county for a million dollars without a referendum. It is against all principles of justice and fairness. As to the merits of the Bond Issue it will be our duty and privilege to discuss same when it comes before the voters.

A telegram from Congressman Goldsborough says, "Chestertown has been selected by the joint committee for the location of a postoffice building subject to a Congressional appropriation for that purpose which will probably be made at the next session of Congress."

For violating the Volstead law the U. S. Senate and House have passed a law increasing penalties to \$10,000 fine and five years imprisonment.

Rock Hall Council No. 25 installed their new officers for the following year:

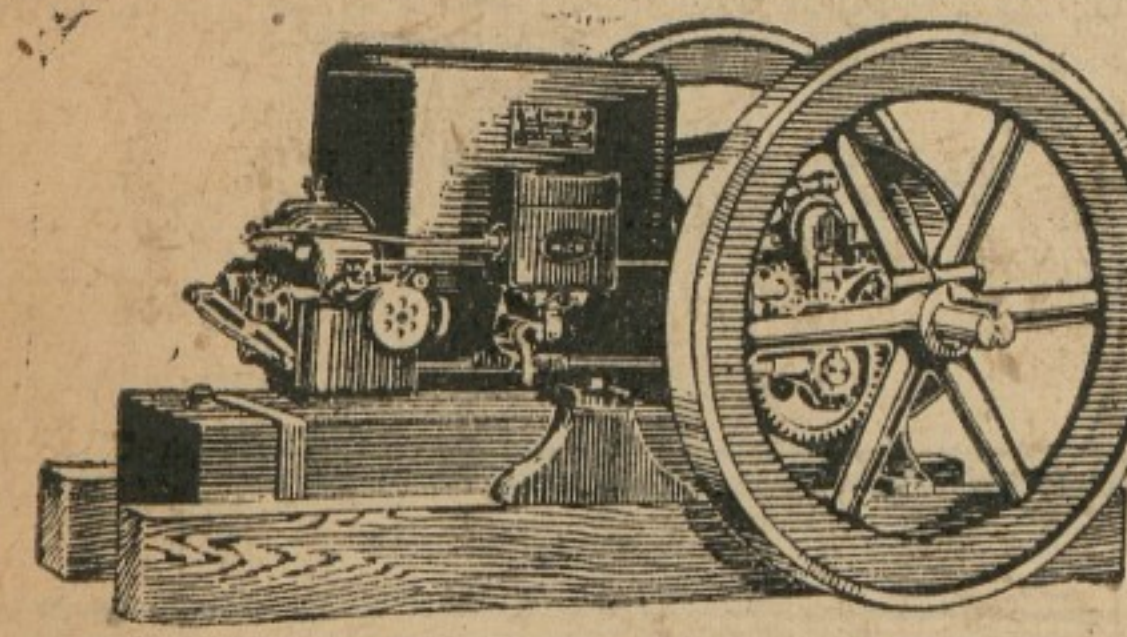

- Councilor, Kate Stevens.
- Asst. Councilor, Mattie Davis.
- Vice Councilor, Annie Urie.
- Asst. Vice Councilor, Mary Donnelly.
- Conductor, Emma Hanna.

HUDSON TO SPEND \$1,000,000 IN NEWSPAPERS

The Hudson Motor Car Company, manufacturers of Hudson and Essex cars, will spend one million dollars in newspaper advertising during the months of March and April, it is announced by Courtney Johnson, general sales manager of the company.

Hudson, largest manufacturer of six cylinder cars in 1928, is experiencing the greatest year in its history and this extensive campaign, the largest ever undertaken by the company, is designed to bring about even greater success to a sensationally successful line.

The feature of the campaign will be a national "Essex Challenge Week" which commences March 4th. During the week Essex cars will undertake every kind of test to prove their right to the militant "Challenger" slogan, says the announcement.

When You Can Be Safe With A Makomb Brooder

Sizes 42, 52, 62.
When March winds begin to blow the owners of a Makomb Brooder does not worry, because it has the BY PASS CONTROL, the only AUTOMATIC CONTROL NOT AFFECTED BY HIGH WINDS. The method of control is the heart of any brooder and the BY PASS CONTROL is the most sensitive and positive ever devised. It is one reason why the Makomb holds fire over night so easily. When the proper temperature has been reached the fire is checked at once, preventing fuel waste.
