CALF DOESN'T LIKE GARLIC IN HIS MILK

William T. Harris, Centreville dairymen, is alleged to be responsible for the following story.

For many, many moons, Dairyman Harris' prize cows had not a sprig of grass. He has been feeding high priced feed in order to produce only the highest quality milk. Then came the news that Harrison's were out of the liquid milk market and that all milk, both good and garlic, would be sold at the same price.

So dairyman Harris turned his cows out on pasture. Early on the second morning he noticed the disdainful look on a calf's face. He investigated and found that the calf stubbornly refused to take his breakfast. There was too much garlic in his breakfast food. The calf had joined the ranks of Philadelphia consumers.
