

to and horticulture, canning and preservation as well as their production largely on conclusions a result of these inter it might well be stated tion that what the unit for this industry and many other industries measure has been made the recommendations of tiche to the Legislature ch studies. Building will be the al on the campus. Con ready been let and work very shortly. Money for ildings will not be avail- next summer; however, he worked out so that con- can be started as soon as y is available. Agricultural Building is one of needed buildings included in gram. It will be used for in canning and work to aid growers and vegetable grow. State, as well as for stu- ing purposes. No definite the Central Heating Plant en made public so far but it tralize heating for all build- the campus and will relieve of the congestion and waste by individual plants now lo- each. The new Girls' Dormi- cost \$125,000. h it has doubled in member- Engineering College is still into the same buildings that asidered adequate fifteen years This year, however, money was appropriated for a new addition to the building, which will enable it to take care of all of the engineering work in good shape. By refurnishing the old Chemistry Building, which last year was replaced by a new and larger one, roomy and pleasant quarters have been arranged for the Home Econom- College and new Girls' Rest and recreation Rooms. The building has been renovated, a new entrance built, new doors laid throughout.

**Much Older**

They had been up to town to see the latest musical comedy, and were discussing its merits as they traveled homeward in the train. "I think I liked the bad man best of all," declared the girl. "He was so very natural in everything—and oh, what lovely hair—so black and curly!" The young man beside her cursed inwardly. He was very fair. "What did you think of the big chorus of twenty-two?" he ventured, to change the subject. "They were more than that," declared the girl decisively. "There wasn't one under thirty, in my opinion."—London Answers.

**Quakers in World War**

The selective service law in vogue during the World war provided exemption to "a member of a well recognized religious sect or organization, organized and existing on May 18, 1917, whose then existing creed or principles forbid its members to participate in war in any form, and whose religious convictions are against war or participation therein." This selective service law applied to Quakers as well as many other religious sects. However, there were numbers of Quakers who served in our active fighting forces.

**Air's Temperature**

The temperature of the air at a given place depends not only on the sunshine it is then getting but also on its own recent history. Wind from the south on a cloudy day may be as warm as wind from the north on a sunshiny day. This is particularly true when, as often happens, these winds have some long way. Furthermore, when it is warm, humid air feels warmer than dry air at the same temperature. —Washington Star.

**One of the Band**

Saturday afternoon was a day set apart for the village band to indulge in its weekly practice march. On this particular day they happened to halt outside the local justice of the peace's house. The latter was a very irritable man who hated bands. Consequently, he was far from pleased when the sound of martial music fell upon his ears. "Look here!" he cried, rushing up to the bandmaster. "If you don't stop that infernal din, I'll go and fetch our policeman!" But the bandmaster was equal to the occasion. "You can't do that, sir," he smiled. "That's 'im playin' the trombone."—London Tit-Bits.

**Hats Denote Wealth**

The Yanks, who live on a little island south of Formosa, have two ambitions—to build fine boats, whose sides they ornament with beautiful designs, and to possess silver hats—the larger the better, for by the measure of his silver hat is the prestige of the individual judged. The first requirement is a quantity of silver coins, which are laboriously beaten with a stone into thin strips. The strips are then made into cone-shaped hats. Some of the hats belong to the more affluent of the colony come down to the shoulders. An oblong opening is left for the eyes, so that the owner may survey the admiration his large hat attracts.

**Word's Many Definitions**

Of the 414,825 words defined in the Oxford English dictionary, completed after 70 years of labor, the one that gave most trouble to the editors was the three-letter word "set." It has many meanings and so many extensions of meaning. The Living Age reports that the editors were obliged to devote a 30,000-word treatise to it alone. The sun sets in the west. A surgeon sets a broken arm. A woman gives birth to three sets of twins in five years. A yachtsman watches the set of his sails.

KENT NEWS \$1.50 PER YEAR

**List of Issues to be Voted on in Kent County, Md.**

W. O. Knight, Clerk.

**Why Alfred W. McCann certifies CREMO**

Each tobacco leaf entering the Cremo factory is fully sterilized by U. S. Government approved

made in air-flooded, sun-bathed, scientific factories! Not by antiquated methods... amazing inventions that fold, wrap and tip with sanitary metal fingers!

No purity is quickly sealed... in separate foil wrappers! Thus Cremo reaches your lips in taste and a clean, fresh aroma!

has made milk safe to drink... meat safe canned goods free from danger!

comes a certified cigar... Cremo... a cigar full of pleasure in trust."

Alfred W. McCann  
D. Litt., A. B., LL.D.  
Famous Pure Food Expert

**Cremono**  
The certified cigar-5¢

In addition to the health protection outlined by Alfred W. McCann, Cremo gives you the greatest possible cigar enjoyment, being made of selected tobaccos, all ripe and mellow. Over \$7,000,000 was spent in perfecting the method and means of manufacture that in Cremons insure uniformly fine cigars. Cremo comes to you fresh, germ-free and crush-proof—being individually foil-wrapped.

**AVERY CHAMPION SELF-DUMP RAKE**

**"Sure-shot, Double-barreled" Trip An AVERY PLUS Feature**

A dependable, self-dumping rake has for years been listed among the wanted implements. Not a rake that dumps now and then or in light crops. But a rake that dumps every time—whether handling hay or cotton stalks—a "sure-shot" self-dumper.

Here again Avery designers and inventors prove the value of the Avery system of thinking and building. For on the Avery Champion Self-dump Rake you find the Sure-shot Double-barreled Trip—the first tripping device

within our experience that actually and reliably does the work every time.

This "Sure-shot Double-barreled" Trip is an Avery Plus Feature, created and perfected by Avery and found only on the Avery Champion Rake. It is absolutely new in design and principle—the result of long study and hundreds of experiments and tests. Due to it this Avery Champion Self-dump Rake does a better job, a quicker job and a more profitable job. Naturally it is a more desirable implement.

**Avery Plus Features Save You Time and Money**

Any Avery implement costs what good quality is worth. These Avery Plus Features—created by Avery designers, inventors and craftsmen—are extra dividends which your money earns when you invest in the name Avery. They save both time and money. That is why an Avery Plus Implement is the cheapest implement any man can own.
