Kent News

SATURDAY, JUNE 14, 1930

The captains of industry are elected to their positions by the votes of thousands, and sometimes millions of customers.

The bad men would be easy to handle if they didn't have so many redeeming qualities that force us to like them in spite of ourselves.

NOTICE TO FISHERMEN

The attention of all fishermen throughout the State is hereby called to the fact that the shad and herring season in all the waters of the State except the Chesapeake Bay and tributaries above Poole's Island, closed May 31st last. The last day of season above Poole's Island will be June 10th.

The law prohibits any one from allowing their nets to remain in the water after the close of the fishing season and requires the removel of all stakes within ten days thereafter.

Any one violating the provision of the law regulating the season and the removal of nets and stakes, be guilty of a misdeameanor and upon conviction, subject to a penalty of not less than $25 nor more than $100. In addition thereto, nets or other equipment used are subject to forfeiture.

ALL STRING ORCHESTRA NEW DANCE SENSATION

Admitting that it was a difficult matter to develop anything new and unusual in the rendering of dance music, Carroll C. Stewart, President of the Coca-Cola Bottling Company of Easton, states that the response of the radio public to the program of the Coca-Cola Topnotchers has surpassed all expectations.

"Every piece they play," he said, "must be specially arranged for them, for there isn't a brass instrument in the whole orchestra. It is a thirty-one-piece, all-string outfit without even a "sax," and under the direction of Len, of Victor recording fame. The result is that the screen and stage hits of the day are given a really wonderful new effect, for nothing comes over the air as well as stringed instruments. The harmony is perfect.

Besides this unusual dance music, the Coca-Cola Topnotchers feature Grantland Rice, famous sports editor, and a different celebrity each week in the field of athletics. Graham McNamee announces this unusual program every Wednesday evening at 9.30 over Station WRC.

Mistaken Judgment

A harmless hilarity and a buoyant cheerfulness are not infrequent concomitants of genius; and we are never more deceived than when we mistake gravity for greatness, solemnity for science, and pomposity for erudition.—Colton.

MYERS "Honor-Bilt" Hay & Grain Unloading Tools

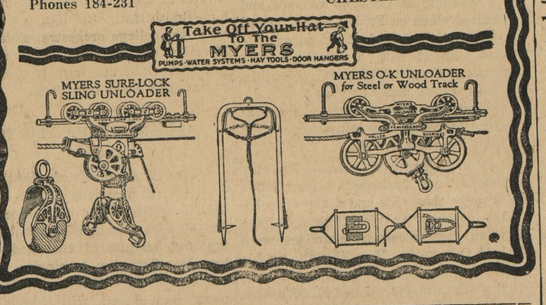

HAY once cut must be worked fast—mowed or stacked without delay—if it is to be saved from rapid deterioration.

At this critical time the profits from many acres often depend upon your hay unloading tools. With Myers Hay Unloading Tools you are assured of dependable, labor-saving equipment that never balks on the job. Your wheat, oats, and corn also, must be stored promptly and with a minimum labor cost. Myers Tools are "Honor-Bilt" for faithful service that will spare you and your help many hours of back-breaking labor.

The Myers Line is complete—any type of hay unloading tools you prefer—unloaders for forks or slings; forks for any kind of hay or grain, slings for handling hay, grain and fodder; steel tracks, pulleys and fixtures. Myers is also World Headquarters for hand and power pumps of all sizes and for complete Water Systems for farm and home.

For Better Planting and Bigger Profits

"A machine that does the work of thirty men—and does it better," said one grower who uses the NEW IDEA Transplanter.

Every plant is set at the right depth—Which is maintained uniformly throughout the field—Each plant is watered at the time of setting—The soil is packed firmly about the roots—Growth is uniform—Crops mature earlier than when set by other methods and the resulting production is greater and of higher quality.

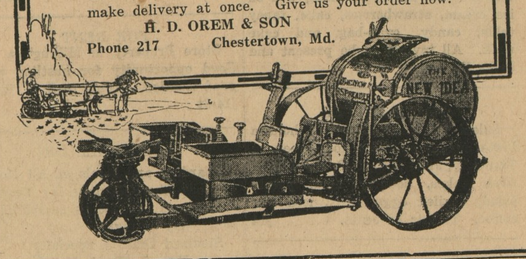

The NEW IDEA Transplanter is adjustable to practically all planting conditions and satisfactorially handles any transplantable crop.

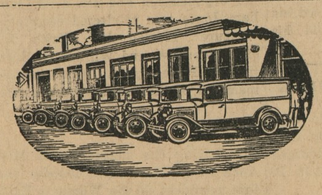

Let us show you this real machine that will save you money in planting costs and make you money by increasing production.

We have received a car load of NEW IDEAS latest model transplanters and are in a position to make delivery at once. Give us your order now.

SERVING MANY BUSINESSES

Experience of large fleet owners reveals the unusual reliability and economy of the new Ford

A SIGNIFICANT TRIBUTE to the value of the new Ford is found in its increasing use by Federal, state and city governments and by large industrial companies which keep careful day-by-day cost records. In most instances, the Ford has been chosen only after exhaustive tests of every factor that contributes to good performance—speed, power, safety, comfort, low cost of operation and up-keep, reliability and long life.

Prominent among the companies using the Ford are the Associated Companies of the Bell System, Armour and Company, The Borden Company, Continental Baking Corporation, Firestone Tire and Rubber Company, General Electric Company, Goodyear Tire and Rubber Company, Kellogg Company, Knickerbocker Ice Company, Morton Salt Company, Pillsbury Flour Mills Company, The Procter and Gamble Company, and Swift & Company.

Each of these companies uses a large number of Ford cars and trucks. The Associated Companies of the Bell System use more than eight thousand.

Modern business moves at a fast pace and it needs the Ford. Daily, in countless ways and places, it helps to speed the production and delivery of the world's goods and extend the useful service of men and companies.

Constant, steady operation over many thousands of miles emphasizes the advantages of the sound design of the Ford car, its high quality of materials, and unusual accuracy in manufacturing. Beneath its graceful lines and beautiful colors there is a high degree of mechanical excellence.

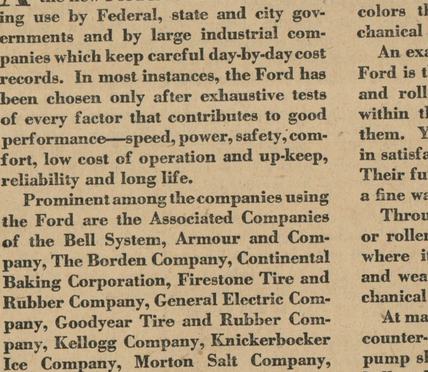

An example of the value built into the Ford is the use of more than twenty ball and roller bearings. They are hidden within the car and you may never see them. Yet they play an important part in satisfactory, economical performance. Their function is similar to the jewels of a fine watch.

Throughout the Ford chassis, a ball or roller bearing is used at every place where it is needed to reduce friction and wear and give smooth, reliable mechanical operation.

At many points, as on the transmission counter-shaft, clutch release, fan and pump shaft, and front drive shaft, these ball and roller bearings are used where less costly types of bearings might be considered adequate.

Additional instances of the high quality built into the Ford are the extensive use of steel forgings, fully enclosed four-wheel brakes, Rustless Steel, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, torque-tube drive, three-quarter floating rear axle, and the Triplex shatter-proof glass windshield.

The Ford policy has always been to use the best possible material for each part and then, through large production, give it to the public at low cost.
