CHILLED MILK BRINGS TOP PRICES

Chill milk to 40° in 3 minutes

with an Oil Flame!

PREVENT spoilage, end rejections, make bigger profits by chilling milk with the wonderful new Superfex Oil-Burning Milk Chiller. Just burning a few cents' worth of kerosene creates sufficient icy cold for cooling 20 to 30 gallons (larger size 25 to 45 gallons) from animal temperature to 40° as fast as drawn! Insulated storage box for keeping chilled milk well below 50° until shipping time easily built from specifications furnished *free* with each chiller.

Superfex cuts chilling costs to about 2c per can—far cheaper than ice—quickly paying for itself in better milk prices. It has no moving parts; nothing to get out of order. Enclosed burners are self-extinguishing. Phone today for further information, or come in and see Superfex work.

Two sizes, $350 and $385, f. o. b. Cleveland. Easy time payments.

NEW—ICELESS REFRIGERATOR FOR COUNTRY HOMES
We also handle the new Superfex Oil-Burning Refrigerator.
Keeps food icy-cold, *right in the kitchen.* See it.

SHOTGUN LAW UP IN CECIL CO.

The fate of the unwritten pact among poultry raisers in the lower section of Cecil county to wage a shotgun campaign against chicken thieves will be decided when the slayer of Lloyd Burris, 40, Negro, who lost the top of his head while fleeing a coop, will be given a hearing. Marshall Fields, colored, a tenant of the Smith farm in Middleneck, is charged with the slaying.

For weeks farmers in that section have been the victim of chicken thefts on a large scale and despairing of the authorities rounding up the robbers, gave notice they would use shotguns on any suspicious characters around their hen yards.

Fields, who was one of the farmers who had given the warning, shortly after he went to bed last night heard a noise in his chicken house. He seized his shotgun and as he approached the poultry house saw two men leaving and fired. At the hennery he discovered he had blown off the top of the head of a man. An investigation disclosed it was Burris, an employe of Fields.

When he was struck, Burris was evidently in a bent position, attempting to escape and was hiding back of a hedge fence. The victim's companion ran down to the end of the lane, which led up to Field's home, and escaped in a truck, which had been brought along to haul away the chickens.

Authorities believe they know Burris' companion, and an arrest will probably follow in a short time.

Sheriff G. Clinton Logan and his deputy, Darry Burkins, of Elkton, also Coroner Howard N. Green, arrived at the scene shortly after midnight. Fields was placed under arrest and brought to the county jail here. It is likely that he will be released today or tomorrow under bond. Coroner Green had the body of the dead Negro brought to Pippins' funeral establishment here, and Monday summoned a jury of inquest over the dead man. It will meet later in the week and hear several witnesses who have been summoned.

Many poultry-raisers in lower Cecil county and sections of Delaware who have been victims of chicken thieves, are almost unanimous in declaring the action of Feld will have the effect of putting a stop on the work of poultry thieves.

148th Celebration Washington College

Degrees Awarded At College

Degrees were conferred on the following:

Bachelor Of Arts

Joseph Francis Alexander, Waterbury, Conn.; Florence Naomi Anthony, Still Pond; Helen Louise Ashley, Rock Hall; Alice Catherine Ayres, Rock Hall; Elmer Larry Bennett, Mardela Springs; Arrianne Bonwill, Still Pond; William Theodore Boston, East New Market; Wilbur Clifford Bozman, Deals Island; Sidney Benjamin Bradley, Crumpton; Myrtle Estelle Bryant, Marydel; Henry Thomas Caldwell, Church Hill; Frances Alice Clements, Chestertown; Beulah Loretta Clopper, Denton; James Clow, Jr., Sudlersville; Levin Samuel Comly, Kennedyville; Clinton Goodsell Dawson, Centreville; William Cushing Dodds, Waterbury, Conn.; Howard LeRoy Dopson, Woodbury, N. J.

Ruth Millicent Gabler, Cambridge; Robert Ellsworth Green, Chestertown; Harvey Bowen Hall, Chestertown; Grace Araminta Lambertson, Pocomoke City; John Magunia, Lima, Peru; Clarence Walton Mason, Pocomoke City; Raymond Reed Moffett, Chestertown; Harriet Naudain Moore; Baltimore; Mary Tharp Nuttle, Denton; Ella Gertrude Rees, Chestertown; Martha G. Robinson, Chestertown; Sarah Edith Sard, Secretary; Elmer Winfield Stewart, Chester, Pa.; Anna Elizabeth Sutton, Kennedyville; Elizabeth Rose Titsworth, Chestertown; Helen Virginia Tyler, Chestertown; Virginia Elizabeth Walls, Price; Jane Evelyn White, Chestertown; Bernice Porter Wooters, Denton; LauraDukes Wooters, Ridgely.

Bachelor Of Science

Thomas Bayard Ayres, Rock Hall; John Leonard Bond, Havre de Grace; William Gover Duvall, Annapolis; Thomas William Fleming, Cumberland; Stanley Brennan Giraitis,Hartford, Conn.; Joseph Edward Glackin, Rising Sun; Howard Franklin Griffin, Berlin; Marie Goldie Hales, Snow Hill; Everett LeRoy Kexel, Hampstead; Clara Anna Meredith, Federalsburg; William Allan Robinson, Chestertown; Thomas Vernon Warthen, Belair; Lewis Butler Whiting, Baltimore; William Thomas Willis, Jr., Church Creek; Eric Huse Wood, Baltimore.

Bachelor Of Science In Economics

Franklin Kent Cooper, Salisbury; George Irvin Coulbourn, Suffolk, Va.; Albury Hopkins Moore, Cambridge; Olyn David Veach, Cambridge.

Honorary Degrees

The degree of doctor of divinity was conferred on the Rev. Dr. Leonard Bayard Smith, president of the Maryland Annual Conference of the Methadist Protestant Church.

The degree of doctor of laws was conferred on Senator Phillips Lee Goldsborough and James Merritt Hepbron, director of the Baltimore Criminal Justice Commission.

Prizes Awarded

The following prizes were awarded:

Philadelphia Alumni Chapter medal, Stanley B. Giraitis.

Visitors and governors' medal, Elizabeth Applegarth Mace.

Alumni medal, Mildred Covey.

Simmons medal, Calvin Linwood Brinsfield.

C. C. Gumm medal, William Allan Robinson.

Washington Alumni Chapter medal, Beulah Loretta Clopper and Anna Elizabeth Sutton.

Harry P. Porter medal, Oliver Elwood Robinson, Jr.

Simpers medal, Joseph Francis Alexander.

Mount Vernon Literary Society medal, Elizabeth Rose Titsworth.

Adelphia Literary Society medal, Howard LeRoy Dopson.

President Titsworth announced the election of W. C. Corddry, Worcester county; L. C. Wales, Wicomico; W. B. Spiva, Somerset, and John I. Coulbourn, Philadelphia, as alumni representatives of the board of visitors and governors for six years.

Bee Colonies

The population of the average bee colony runs from 50,000 to 75,000 workers, with one queen and up to 1,000 drones, when the honey is being stored, and drops to a total of from 10,000 to 15,000 when brood rearing begins in the spring, this being the size of ordinary swarms.

White Oak Reproduction

Natural reproduction of white oak in the southern states may be either by seed or by sprout. Under usual forest conditions acorns are produced when the trees are about seventy or seventy-five years old. Good seed crops occur in every four to seven years.

Record for Nuisance?

"Can one hear color?" quotes the Providence Journal and immediately replies, "We can certainly hear a hue and cry." Louder to us, however, come those "blues" that are constantly hammering at eardrums.—Philadelphia Inquirer.

JUNE FETE AT COLLEGE

One of the most attractive features of the one hundred and forty-eighth commencement exercises at Washington College was the annual June fete, staged on the college campus Friday afternoon under the direction of Miss Doris P. Bell, director of physical education for women at the college.

The entire enrollment of women numbering between ninety and and one hundred students, participated in the pageant, which depicted a Russian gypsy encampment. The queen of the pageant was Miss Harriet Naudain Moore, of Baltimore. Miss Mary Tharp Nuttle, a senior, of Denton, was the queen's maid of honor, while Miss Geraldine Harwood, of Chestertown, performed the solo dance.

ABANDON BASEBALL AT SHORE COLLEGE

Saturday's game between the varsity and the Alumni at Washington College, may be the last baseball encounter of the college. At its meeting last week, it was revealed, the the athletic council of the Eastern Shore institution voted to abandon baseball temporarily as a spring sport. This action, it is said, was found necessary by the difficulty encountered in making up a schedule since so few of the colleges, hitherto maintaining athletic relations with Washington, are playing baseball.

This move will free local athletes for lacrosse and it is believed a stronger twelve may be developed.

Since the victory over Mt. St. Mary's Washington has been resting on its laurels and only a class tourney has been indulged in this week. The Juniors won the championship. Four outstanding athletes wound up their sports careers in the commencement game. They are Howard Dopson, of Woodbury, N. J., Joe Alexander, of Waterbury, Conn., Stanley Giraitis of Harford, Conn., and Wm. Burk, of Linwood, Pa. Among them they have accounted for nearly forty varsity letters and all are prominent in basketball and baseball.

Variable Timber Line

The timber line, above which trees will not grow, occurs at different heights, in the upper northwestern United States as low as 9,000 feet, while in New Mexico and Arizona between 11,500 and 12,000 feet.

DUCKING BLINDS

The opinion of the Court of Appeals of Maryland, Case No. 30, Thomas M. Wampler vs. E. Lee LeCompte and Frederick S. Barber, which is a very important opinion to riparian owners of this State who desire to erect ducking blinds on waters off shore of their properties is to the effect that riparian owners, before they can legally erect or establish a ducking blind on any of the waters of this State, must have the legal amount of shore front to comply with the law, namely:

Five hundred yards on the waters of all counties, (except in the tributaries of the Chesapeake Bay and in the tributaries of the Potomac river in Charles County and on the waters of Baltimore County, said blinds shall not be less than two hundred fifty yards apart. Therefore, riparian owners in said sections must have two hundred fifty yards of shore front before they would be legally entitled to establish a ducking blind off shore.

CATALOGUE UPON APPLICATION

You can see here how the weight is correctly distributed on the three main axle wheels. The weight of the bin is carried almost entirely on its own special wheel. Result, light draft. The Case combine is easy to pull.

A Case User writes: "Case combines are the best made and are balanced to pull straight. There is no side draft, and that means a whole lot in the saving of power." Name on request.

You can get this Feature Only in a Case Combine

THE MORE you know about combines the more you will appreciate the light draft and proper distribution of weight in the Case combine. It has large, sturdy, easy rolling wheels. Each one carries only its share of the weight. There can be no side draft or side strain. Here is the way it works:

1. A Universal Joint in the main axle permits the header to follow the lay of the land. It makes proper distribution of weight on the wheels possible, resulting in less wear and longer life. This is a patented feature.
2. With the weight correctly distributed on the main axle, ground pressure per inch is less. The load is easier to pull. There is no sinking in of one wheel to cause side draft.
3. The header is counterbalanced by the thresher unit without weights or springs. Another patented feature.
4. There is no undue strain on any part of the machine. Rigid steel frame prevents weaving and twisting and maintains the working parts in correct alignment regardless of ground conditions. Galvanized steel covering is weather, rust and fire-proof.

You can readily see that the Case combine pulls easier, runs smoother, and does better work. And there is still another feature that especially means much to the man who has never had a combine before—it is surprisingly simple and easy to operate. It will pay you to investigate. Come in.

Est. 1842

5 CASE Advantages

1. Gets all the grain from any field because it has a floating header, counterbalanced by the thresher unit and quickly adjusted.
2. Fast threshing in light or heavy straw by big capacity, all-steel, unbreakable cylinder.
3. Complete separation beginning at the perforated concaves and finger grates and finished over a non-clogging, steel straw rack.
4. Thorough cleaning of grain by two complete cleaning shoes equipped with underblast fans. Final cleaning under eyes of the operator.
5. Light draft because the weight is correctly distributed on main axle.

There is a Case Combine for every farm—four models—width of cut from 8 to 26 ft.

Only STUDEBAKER gives you *all* these fine car improvements for $895

to $1125 at the factory

114-inch Wheelbase —*roomy, better roadability*
70 Horsepower —*CHAMPION performance*
1 Horsepower to every 42.1 lbs. of car —*surplus power, longer life*
Double-Drop Frame —*lower, safer*
Full-power muffler —*increases usable power*
Cam-and-lever steering —*easier handling*
Clutch torsional damper —*smoother power flow*
Lanchester Vibration Damper —*a high-priced car feature*
Self-adjusting spring shackles —*quieter, easier riding*
Starter button on dash —*convenient, no groping*
Thermostatic control of cooling —*all year efficiency*
Engine-driven gasoline pump —*eliminates vacuum tank*
Hand brake on four wheels —*safer, more effective*

THERE are 22 cars in the price range between $700 and $1000. Not one of these cars except this great new Studebaker, offers you all these features.

Check over the list. Extra length, for roominess and beauty. Costly lowness, for steadier travel, style, safety. Seventy horsepower, providing champion Studebaker performance. Engine, chassis and body improvements which insure economy and enhance style, comfort and luxury.

Don't let another day pass without experiencing the thrill of driving this new champion Studebaker. Seventy-eight years of manufacturing integrity provide added reassurance of honest quality and long-lived service.
