FERRY TRAFFIC NOT A LEGITIMATE BASIS

Vehicular traffic carried across the Chesapeake Bay by ferries cannot be considered a legitimate basis for computing the amount of traffic which would use the proposed bay bridge, Theodore R. McKeldin, secretary to Mayor Broening, of Baltimore, said recently.

Speaking at the Engineers Club Mr. McKeldin declared the argument advanced against a bridge by former Governor Harrington, president of the Annapolis-Claiborne Ferry Company to be unsound in the statement that the Eastern Shore is being served adequately by ferries.

"There are many machines," Mr. McKeldin said, "which leave Baltimore for points on the Shore and take the Elkton route rather than use the ferries, because it often is impossible to leave Baltimore at a specific time in order to make the ferry connection at Annapolis.

"With only three or five trips across the bay each day, as the case may be, this service is entirely too infrequent. For example, it takes two hours to go from Baltimore to Tolchester and an hour and a half from Annapolis to Claiborne.

"It is entirely too long and too indirect a route for traffic to go around the head of the bay at Elkton; consequently only a small proportion of traffic is attracted by this route.

"It has been estimated by experts that, with the removal of these obstacles to travel between these two sections by the construction of a bridge, the existing traffic between the Eastern and Western Shores will be increased two and a half times.

"The Philadelphia-Camden bridge, for example, in June, 1927, completed its first year of operations. It experienced great competition from ferries, but continued to operate and it is significent to note that the traffic carried by the bridge and the ferries combined was more than one and one-half per cent. great than the traffic carried by the ferries during the preceeding years.

"The bridge secured 46.2 per cent. of its business from the ferry, and of the remainder 53.8 per cent, was newly created business.

This is the time of the year when many young men must decide whether to get married or to drive with one hand for another year.

PROF. ROBINSON SUPERINTENDENT

C. Romie Skirven Is School Board Head

Professor Louis C. Robinson was reappointed as Superintendent of Kent County Schools and secretary and treasurer to the Board of Education at the re-organization meeting of that body held yesterday at its offices in the Elementary School building here. Professor Robinson will have completed eight years as the Kent school head on July 31, 1930.

C. Romie Skirven was elected president of the school board and L. Bates Russell, vice-president. The vancancy on the board caused by the death of Harry Davis has not been filled.

The action on the appointment of a principal for the Chestertown High School was deferred until the next meeting of the board on Tuesday, May 20. The vacancy at the Chestertown school was caused by the sudden death of Professor Mark Creasy several months ago. Professor Owen C. Blades has been acting as principal since the death of Mr. Creasy but it is not eligible for permanent appointment.

Miss Esta V. Harrison was re-named as Supervisor of the Elementary Schools, Mrs. May Mills Beck was reappointed as Attendance Officer and Miss Grace Strickland as secretary and stenographer.

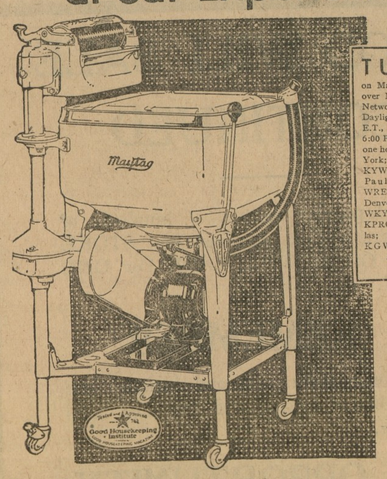

The budget for the 1930-31 school year was considered and adopted. The total cost of operating the schools of the county is approximately $170,000, of which amount about two-thirds is supplied from the county tax levy and the remainder from State sources.

The school calendar for 1930-31 as adopted at the meeting of the board calls for the opening of the white schools for the county on Monday, September 8. The colored high school will also open on this date. The colored elementary schools will open on Monday. September 29. The Christmas recess will begin on Tuesday, December 23 and end on Monday, January 5th. The white schools will close on Friday, June 19.

A general meeting for all white teachers of the county is set for Friday, September 5, prior to the beginning of the school year. Thursday and Friday, November 27 and 28 will constitute the Thanksgiving holiday and Good Friday and Easter Monday will be observed as holidays.

The white schools will be open a total of 191 days, the colored high school 181 days and the colored elementary schools 161 days. One day in April will be set by the director of the Playground Athletic League for Field Day for the colored pupils and one day in May for Field Day for the white students.

Let the NEW MAYTAG help you clean house at our Expense

TUNE IN on Maytag Radio Programs over N.B.C. Coast to Coast Network Monday Evenings, Daylight Saving Time—9:00 E.T., 8:00 C.T., 7:00 Mt.T., 6:00 P.T.—Standard Time is one hour earlier. WJZ, New York; KDKA, Pittsburgh; KYW, Chicago; KSTP, St. Paul; WSM, Nashville; WREN, Kansas City; KOA, Denver; KSL, Salt Lake City; WKY, Oklahoma City; KPRC, Houston; WFAA, Dallas; KECA, Los Angeles; KGW, Portland and Associated Stations.

For homes without electricity the Maytag is available with in-built gasoline motor.

A 'phone call brings a NEW Maytag without cost or obligation. Before you store your blankets, put them in the new one-piece, cast-aluminum Maytag tub and wash them beautifully clean. The new roller water remover with flexible top roll and hard bottom roll will remove the water evenly . . . the new, enclosed, positive-action automatic drain always returns the water to the right tub.

Your dainty draperies and curtains will also be safe in the NEW Maytag.

PHONE for a trial washing with the NEW Maytag. If it doesn't sell itself, don't keep it. Divided payments you'll never miss.

Dry Weather Is Affecting The Kent Milk Supply

These are trying times for the farmer. The excessive hot weather, coupled with the extreme dry weather has slowed up farm work to a great extent. This week quite a few fields had not yet seen the plow. Farmers first tried to break the ground with extra horses, but this was impossible.

Tractors were brought into use, and while some were successful in plowing by this means, others were unable to do much and had to stop until some future time when the ground is softer.

Peas are ready to blossom, but the dry weather is not doing them much good.

Pastures are drying up fast, and the farmer who depends on grass at this season of the year finds his supply of milk short, but believe that unless rain arrives before long the milk supply will be greatly reduced.

Already the dry spell is seen to influence the milk supply.

Very little garlic milk is brought in now. The letter of recent date threatening to drop all those dairymen who repeatedly bring in garlic milk had the desired effect. Dairymen who are greatly troubled with garlic refused to bring in their milk until it had been rid of the objectionable odor, and this corrected the complaint to a great extent.

But the dry weather has cut down the supply, and as the official stated on Monday, if it continues the supply will hardly equal the demand.

Berlin Model of Cleanliness

Berlin is the cleanest large city in the world. All things that tend to disturb this perfection are forbidden. One is not allowed to throw things upon the sidewalk, not even in the sacred precinct of one's own property is there allowed disorder or litter of any kind whatsoever. The result is cleanliness and comfort and order.

Nine Words on Grain of Rice

Mr. F. O. Roberts, minister of pensions, has received an inscribed grain of rice in a glass tube, accompanied by a magnifying glass, from a museum at Delhi. The inscription on the gift reads: "May God bless a long, happy, and prosperous life."—London Tit-Bits.
