TWO JUDGES DIE

William Howard Taft Died in Washington at 5.15 P. M. Saturday.

No member of the family except Mrs. Taft was at the bedside. Mrs. Helen Taft Manning, the daughter, wasout riding. The two sons, Charles P. and Robert A., were in Cincinnati.

Mr. Taft was in his seventy third year. Saturdaymorning one of his closest friends, Associate Justice E. T. Sanford, of the Supreme Court, passed away in his sixty-fifth year. Day after day Mr. Sanford had called at the Taft residence for news of the former Chief Justice's condition. They died within five hours of each other.

The flag at the White House will ge at half staff throughout the mourning period, and the President will cancel all engagements for that time.

The mark of respect of lowering theWhite House flag to half staff is one paid only to Presidents or former Presidents.

Mr. Taft will be buried in Arlington National Cemetery. The funeral will be conducted from the Unitarian Church in Washington which he attended during all his life in the capital.

A person who calls a pumpkin a "pumpkin" probably wouldn't care forthat type of pie anyway.

KENT SPORTSMAN COMPLAINS

Complaint of an alleged raid being made by a pilot of an airplane upon flocks of swan and wild geese which are feeding on the flats in the Chesapeake Bay and Chester River surrounding Eastern Neck Island was made here Monday.

JohnWilson, a sportsman living on the island, which is one of the most famous shooting grounds in the country for all kinds of wild fowl, was in Chestertown and reported he saw an airplane chasing large flocks of geese for several miles up and down the flats.

When opposite Hail Point, in Chester River, he claims, the plane flew through a flock of geese, one of which was reported to have been struck and killed.

Mr. Wilson said that he did not think to get the number of the plane as it flew low over his home on the island.

He stated, however, that the plane came from the direction of the upper bay. He declared the affair will be reported to State Game Warden E. Lee LeCompte, with a view to putting a stop to the practice which is having a tendency to frighten the swan and geese from the feeding grounds. Mr. Wilson said that the geese have not returned since the incident, but that the swan came back.

Radio tenors who are "tiptoeing through the tulips" at this time may catch cold and become baritones.

Mr. Trotzky wants permission to sojourn in Holland. In case of a leak in the dike he could put his foot in it

Fifth Living White House Widow

With the passing of William Howard Taft, Mrs. Taft became the fifth living woman to have been widowed by the death of a former President.

The others are: Edith Galt Wilson, Mrs.Edith Carow Roosevelt, Mrs. Mary Dimmick Harrison and Mrs. Thomas J. Preston, who before her marriage in 1913 was Mrs. Frances Folsom Cleveland.

MAYTAG ANNOUNCES A NEW WASHER

At Newton, Iowa, the washer center of the world, the great Maytag factory, which dominates the commercial activities of the lively Iowa city is teeming with action. It has started on the most ambitious program in Maytag history, and the reason is a New Maytag washer.

This new washer comes at the peak of a Maytag success which has been one of the outstanding achievements of the industrial world. With a record business in 1929, The Maytag Company completed its seventh successive year of world leaderhsip. Public acceptance which made this tremendous business possible, required continuous increases in production facilities, improvement in methods and new special machinery.

The modern aluminum foundry and the immense gray iron foundry, owned and operated by Maytag, cost $2,000,000 to build. The balance of the plant steps the investment in plant, equipment and development work up to more than $4,000,000. An additional investment of half a million dollars in special machinery and equipment was necessary before the new Maytag could be produced.

The New Maytag has a quiet, enclosed lifetime, oil-packed drive. This exceedingly quiet and smooth-running, self-oiled drive operates in a sealed housing. The gear is always in mesh so that there is no clashing when the washer is started or stopped. A new, handy auto-type shift lever is easily operated from any side of the washer.

The features of this new washer offer equally desirable advantages to city and farm homes. Homes without electricity may have the NEW Maytag equipped with an in-built gasoline Multi-Motor. This compact Maytag engine is now equipped with a new air cleaner. See a sample at George W. Baldwin's office. Voshell House Annex.

DR. COOKE MAY GET ALBANY PASTORATE

The Rev. George W. Cooke, evangelist, who has done extensive work in the east for the past eight years, it is reported, may be appointed pastor of a Methodist Church in Albany.

Dr. Cooke recently visited Albany and is said to have conferred with the authorities of the church which is one of the largest of te denomination in the east. The Rev. Carlisle L. Hubbard, formerly pastor of St. Paul's M. E. Church, in Wilmington, suggested the name of Dr. Cooke for the pastorate.

A ski slide 60 miles in length has been constructed in Sweden, and plans are already well along, we hear, for a stock exchange at the summit.
