ROAD BONDS PAID

County Treasurer H. Stockton Startt has received from the State Treasurer a check for $80,000. which has been used in liquidating a similar amount of the $1,000,000 road bond issue, floated two years ago by the Board of County Commissioners for concrete and slag road building in the county. At the same time Treasurer Startt paid in interest on coupons due $18.900. This makes a total of $160,000 worth of the original bond issue which has been retired during the past two years.

It is estimated that at the rate at which bonds are being paid at present the entire bond issue of $1,000,000 will be liquidated within the next eight years, and Kent county will have one of the best systems of stone and slag highways in the State with a minimum cost to the county taxpayers. The money received from the State Treasurer represents Kent county's portion of the annual State gasoline tax. The manner in which Kent's road-building project is being financed is so satisfoctory that other counties in the State as well as many sections of the country are adopting the plan in road-building schemes.

MAKING THE FARM PAY

That "cooperation pays," is evidenced by the fact that the Dairymen's League Cooperative Association of New York State handled a bigger percentage of its supply and surplus products for its farmer members during the past April than for any April since 1923. While the dairy outlook May first was not bright, nevertheless dairy and poultry farmers are in a better economic position than other farm industries. On April 15 dairy products were 27 points below prices of a year ago, fruits and vegetables 67, cotton 41, meat animals 40 and grain 36 points.

It looks as if scientific cooperation did pay in the dairy industry.

Someone has defined a frown as a smile turned wrong side out.

How can a man love his neighbor when his neighbors chickens are playing smash with his young beans.

With gangsters death seems to be more certain than taxes.

McCORMICK-DEERING
ENCLOSED GEAR
ENSILAGE CUTTER

The McCormick-Deering No. 12 Ensilage Cutter is another International Harvester achievement. It sets a new standard in ensilage-cutter design and construction. Here is an ensilage cutter that embodies improved features taken from automobile and tractor construction.

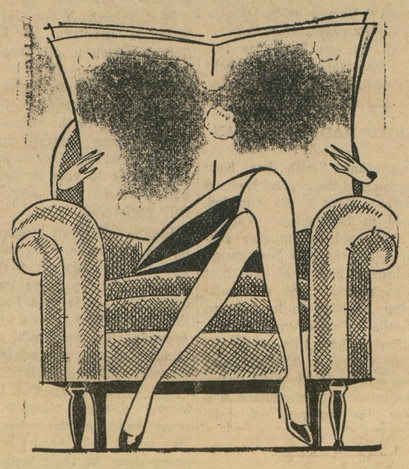

The foundation of the No. 12 ensilsage cutter is a one-piece main frame enclosing the flywheel, cutter, transmission and apron drive. All the working parts are enclosed in an oil-tight and dust-proof housing, permitting all parts to run in a bath of oil. This construction, combined with the use of specially cut and heat-treated gears, assures exceptionally long life and efficient operation.

Other features of McCormick-Deering construction are:

Knife-on-flywheel type with four knives secured to flywheel of boiler plate steel.
Positive drive on feed apron with high and wide feed throat.
Working parts mounted on high grade, anti-friction bearings.
Length of cut can be changed without stopping machine.
