Don't forget the league odd social Friday at the hall. The endeavor is to make this the best of the year.

Why Mention of Thrift Grates on Auto Driver

Charlie when he had his other car developed a system that saved him a lot of pennies—perhaps as many as 100 in the months he labored with it. Charlie lives in a street off Main street, in Montello, where it is possible to coast the length of it because of the grade, and ride right into his garage. Faithfully he always turned off his ignition at the head of his street and saved gasoline the rest of the way.

Recently when fortune smiled on him, he traded for a new car. On his first trip home with it from the club at night he turned off the ignition and coasted down the hill. However, he forgot that the new motor was equipped with a gimmick which automatically locks the steering wheel when the ignition is shut off.

Just as Charlie was about to turn into his street the front wheels failed to answer his tug and he rammed a telephone pole with the right fender before he could bring the machine to a stop.

"It'll cost at least a sawbuck to straighten that out," he moaned, "and all to save a little gasoline."—Brockton Enterprise.

Significance in Name Clemens Made Immortal

Probably the best known nom de plume ever adopted by an American writer is that of Samuel Clemens, "Mark Twain." Usually it is regarded as just a proper name, chosen by the humorist from a book or some family record, as most such names are chosen. But the fact is that it wasn't a proper name at all until Clemens made it such, says the Golden Book Magazine, which tells the story:

"From the carefree days of his life on the Mississippi, Clemens passed to setting type on his brother's newspaper, to piloting a steamboat, and to wandering in the West. Shortly after, he began writing articles for a Nevada paper—clever, fun-poking skits. It was in 1863 that he first adopted the name of Mark Twain. 'I want to sign them Mark Twain,' he wrote. 'It is an old river term, a leadman's call, signifying two fathoms or 12 feet. It has a richness about it; it was always pleasant for a pilot to hear on a dark night; it meant safe water.'"

Women Geographers
The Society of Woman Geographers is a society, organized in 1925, by a group who felt that there should be some medium of contact between women distinguished in geographical work and its allied sciences—ethnology, archeology, botany, natural history, sociology, folklore, arts and crafts, etc. For active membership in this society only those women are eligible who have done distinctive work whereby they have added to the world's store of knowledge concerning the countries in which they have traveled. Corresponding members are those who fulfill the requirements for active membership, but who reside outside the United States of America and Canada. The associate membership admits widely traveled women who are interested in furthering all forms of geographical exploration and research.

Facts and Figures on Your Telephone

By EDWIN F. HILL

Edwin F. Hill

That Canada leads the world in talking by telephone will be a surprise to many people, who know that the United States has the greatest telephone density. The Canadians make 257 calls per capita annually as compared with 231 in this country. The next "talkingest country" is New Zealand, where 212 conversations are made for each person.

Denmark leads in telephone conversations in Europe with 148.6 per capita; Sweden is next with 125.7. In Norway the calling rate in 1929, according to Telephone and Telegraph Statistics of the World, was 86.5 conversations. Austria makes 75.8 calls per person, Australia about 70, the Netherlands 60.4, Switzerland 53.2, Japan 48.8, Germany 40.6, Great Britain and Northern Ireland 32.1, Belgium 25.3, and France 19.1.

More than two-thirds of the world's telephones are operated by privately owned systems due to the relatively heavy American development, the report shows. In the United States all telephones are operated by private companies and this country not only has more telephones than all the rest of the world, but also excels in the number of telephones relative to population. In fact, the United States with 16.4 telephones for each 100 of its people has nearly nine times the relative telephone development of Europe, which has only 1.9 telephones for each 100 people.

Canada, with 14.2 telephones per 100 population, is the only country whose telephone density approaches that of the United States. New Zealand takes third place with 10.3, followed by Denmark with 9.6, Sweden with 8.3 and Australia with 7.9 telephones per 100 population. In both Canada and Denmark most of the telephones are owned and operated by private companies.

Women as a class are inclined to be obstinate. They do not want to get out of the beaten paths.—Thos. A. Edison.

We mortals are immortal in that we work together in never-ending achievement.—Albert Einsttin.

DRIVERS PENALIZED

Four drunken drivers were penalized by State motor officers on the Eastern Shore during the week ending Monday, according to State Officer Carl G. Storm, stationed here, while two were notified that their licenses were revoked for violations of Delaware laws. Seven licenses were revoked altogether and four were suspended, making a total of eleven penalties inflicted on Eastern Shore motorists during the week.

The follwoing were convicted of drunken driving and had their licenses revoked: Frank Adkins, Salisbury; Russell Milburn, Colora; Geo. D. Jarvis, Berlin, and Charles Rosetta, Cambridge, Henry Duff, of Rising Sun, and Edward Moore, of Crisfield had their licenses revoked for violation in Delaware and failure to appear when directed. The license of Robert Woodley, of Chestertown, was revoked for reckless driving and failure to stop after an accident.

The following licenses were suspended: Alonzo Briscoe, North East displaying markers of another car; Edward Johnson, East New Market using an expired chauffeur's license Blanche Loller, Worton, permitting an unlicensed person to operate, and Herbert Parker, East New Market, permitting another to operate on an expired chauffeur's license.

The American has received as a sort of religion the notion that blowing his trumpet is as important as the trump of doom.—G. K. Chesterton.

The men of science know no more about the ultimate than the fundamentalist preacher.—Elihu Root.

IN MEMORIAN

In loving remembrance of our father, Wm. Kernan, who passed away six years ago, June 15, 1926.
Peacefully sleeping, resting at last.
The world's worry troubles and trials are past.
In silence he suffered,
In patience he bore,
Till God called him home
To suffer no more.
His daughters, Dorothy and Mae.

From the Arabic, meaning
"BEST FODDER"
is the derivation of the word
ALFALFA
But no matter where its name came from, Alfalfa is a wonderful, rich forage, legume that only thrives and grows its best in a well-limed soil.

Consider your Adam's Apple!!*
Don't Rasp Your Throat With Harsh Irritants
"Reach for a LUCKY instead"
Eve started it and the daughters of Eve inherited it. Eve gave Adam the apple, and it seems that Adam must have passed it on. For every man and every woman has an Adam's Apple. Put your finger on your Adam's Apple—that is your larynx, your voice box—it contains your vocal chords. Consider your Adam's Apple—when you do so, you are considering your throat—your vocal chords. Don't rasp your throat with harsh irritants. Reach for a LUCKY instead. Here in America LUCKY STRIKE is the only cigarette which brings you the added benefit of the exclusive "TOASTING" Process, which includes the use of modern Ultra Violet Rays. It is this exclusive process that expels certain harsh irritants present in all raw tobaccos. These expelled irritants are sold to manufacturers of chemical compounds. They are not present in your LUCKY STRIKE. And so we say "Consider your Adam's Apple."

TUNE IN—The Lucky Strike Dance Orchestra, every Tuesday, Thursday and Saturday evening over N. B. C. networks.
