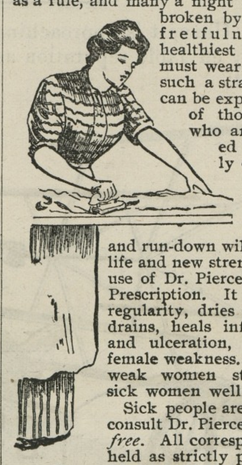
The 8 Hour Day

Which the working man has fought for and succeeded in obtaining is something the wife has no share in. Her day begins before his and ends long after it, as a rule, and many a night her rest is broken by the baby's fretfulness. The healthiest woman must wear out under such a strain. What can be expected then of those women who are weakened by womanly diseases?



Women who are weak, worn-out and run-down will find new life and new strength in the use of Dr. Pierce's Favorite Prescription. It establishes regularity, dries weakening drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

Sick people are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

"I suffered with female weakness about eight years—tried several doctors but derived no benefit until I began using Dr. Pierce's Favorite Prescription," writes Mrs. John Green, of Danville, Boyle Co., Ky. "This medicine was recommended to me by other patients. I have taken six bottles and I feel like another person."

The dealer who offers a substitute for "Favorite Prescription," is only seeking to make the little more profit paid on the sale of less meritorious medicines. His profit is your loss. Refuse all substitutes.

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

THE WAYS OF BIRDS.

In an unusual and interesting article on bird life in the *Outlook's* Magazine number for July, Mr. W. E. D. Scott, Curator of Ornithology at Princeton, talks about the ease with which relations may be established between man and bird. Among other things he says:

Birds out-of-doors in the struggle for existence pretty well appreciate that, as a rule, bad things happen when boys and men are around, and they are fearful and on their guard. In places where birds have not been molested by man, as in deserts, on the islands of the Pacific, and in parts of Arizona where I have been, birds have no fear. In the latter place I remember going to a bird's nest, and, wishing to see the eggs, I had to gently lift the bird off, found out what I wished and put her back. She did not appear to be disturbed or alarmed by this. Nor do I think that there was anything peculiar and special in my attitude; this bird had never been disturbed by man, and felt no fear; there was nothing occult about it, nor was it because of any peculiar influence which I possessed or exercised. I observed a few simple rules—that is, I did not make a noise or move rapidly, but that is all. For instance, in Central Park, New York, I have seen a policeman, after a few instructions, stand still, holding something in his fingers which birds like, and I have seen a titmouse fly and take it, simply because people there had established such a relation; the man had no special power; he was only a big burly policeman, who was not particularly in sympathy with nature. He simply put himself in the right attitude toward bird-life, and it responded.

It is easy to establish the right relationship with birds. I remember once an elm-tree blew down in front of our house in which there was a nest of young flickers. I did not wish to bring them into the house, as I did not care to have my birds hear their notes, and so put them into an old bird cage and left them outside. We fed them with the regular bird food and they grew up all right. They became so tame that when the door was left open they flew out and went all about, but always came back to the cage, and when the house door opened and any one appeared they fairly yelled with delight and begged to be fed.

The World's Work for July.

Perhaps the most striking article in *The World's Work* for July is Commander "Dick" Wainwright's story of the Naval Academy at Annapolis of which he is superintendent. The pictures with which Miss Frances B. Johnston has illustrated the famous veteran's article are as fine a series as *The World's Work* has ever published. Donal Murray, the well-known inventor, tells, with illustrations, the vividly interesting story of the great cable systems of the world—how they draw together the various nationalities and countries with a band of wire. Timely articles that add to an unusually full series of editorials are those on Martinique, The Real issue of the Coal Strike, and a fair presentation of the Philippine problem from President Roosevelt's Memorial Day address, Senator Hoar's famous opposition speech, and a clear statement of conditions in the islands by James A. Le Roy, who has just returned to America. The financial article this month in the important series *The World's Work* is publishing, is on the methods by which financial panics are now prevented in Wall Street. The rest of the magazine is filled with concise, clearly written articles on specific subjects, many of them illustrated, including the Americanizing of two boys of cannibal ancestry, by S. P. Verner, who brought them to this country; the new English method of lifting up saloons by Dr. W. H. Tolman; The White House as a Place of business—the Routine of the President's Labors, by Waldon Fawcett; A Giant Farm in the Middle West—a Farm as Big as Connecticut County, by C. H. Matson, and a description of the picturesque country along the Northwest Border, by Bailey Willis of the Geological Survey. Full-page portraits illustrate Dr. H. Morse Stephen's article on Living American Historians, and there are short articles on The Ministry as a Profession, by Rev. D. M. Steel; The Revival of the Handicrafts, by Charles Barnard, and The Art of Praising Living Men, by George Perry Morris. The March of Events is longer than usual, and Among the World's Workers shorter, but both are interesting.

FEMININE CHARITY—He—Don't you think Miss Buddington has rather a vivid imagination?

She—Indeed she has. She actually imagines she can sing.

Summer complaint is unusually prevalent among children this season. A well developed case in the writer's family was cured last week by the timely use of Chamberlain's Colic, Cholera and Diarrhoea Remedy—one of the best patent medicines manufactured and which is always kept on hand at the home of the scribe. This is not intended as a free puff for the company, who do not advertise with us, but to benefit little sufferers who may not be within easy access of a physician. No family should be without a bottle of this medicine in the house, especially in summer time.—Lansing, Iowa, *Journal*. For sale by M. A. Toulson, druggist Chestertown, Md.

NOW LOOK OUT!

"Take care of yourself," say our friends. "I'll try to," we answer. We do take a little care, yet in spite of warm clothes, rubbers and mackintoshes, an army of people were bowled out by pneumonia and other lung and chest diseases last winter. They caught cold, neglected it, let it fix upon them, were torn by coughs, choked by inflammations and congestions, wasted by fever, tired out by pain and then gave up the fight. The hour you realize that you have a cold on the chest, place a Benson's Porous Plaster where the pain or oppression is felt. If you think two are needed make it two. No harm if you were covered with them. They act quickly and prevent the engorgment of blood in the organs. In this way—with ordinary caution as to exposure—you will break up the cold and avoid a serious sickness. No other applications, or any other form of treatment, will accomplish this as certainly and speedily. Benson's Plasters have a distinct and positive action and are curative to the highest degree. Use them with the same confidence for coughs, muscular rheumatism, the grip (back and chest) and all similar ailments. Women, who are chief sufferers from cold weather complaints, should keep these plasters always within reach. Get the genuine. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each.
